The Most Capable Model Ships Turned Off

GPT-6 Astra is rated Critical for cyber risk, so it defaults to disabled.

RUN SESSION 

```
arhem@verydian:~/the rollout$ step 2
```

Astra's Staged Rollout

Limited orgs first, then admin-gated enterprise workspaces, then broader API access.

```
arhem@verydian:~/the rating$ step 3
```

Rated Critical For Cybersecurity

The first model OpenAI has ever assessed at this threshold, capable of building working exploits.

arhem@verydian:~/the_parallel\$ step 4

Same Question, Different Scale

OpenAI gates a model used by millions. I gate one client's database access.

MY ACCESS
DECISION

```
arhem@verydian:~/the decision$ step 5
```

Why I Said No To Full Access

No read-only layer, full write to production, and the blast radius outweighed the time saved.

STDOUT

NO READ ONLY LAYER

PASS

FULL WRITE ACCESS

PASS

BLAST RADIUS TOO LARGE

LIVE

TIME SAVED TOO SMALL

PASS

Default New Access To Off

Make someone prove they need it before you grant it.

GATE IT FIRST
