

47 Agents. One Night. Under \$80.

What Claude Code Dynamic Workflows replaced for me

02

The Task That Used to Cost \$3,500

Multi-tenant data pipeline refactor across six microservices. Contractor estimate: two weeks, \$3,500 minimum. Dynamic Workflows: overnight, under \$80.

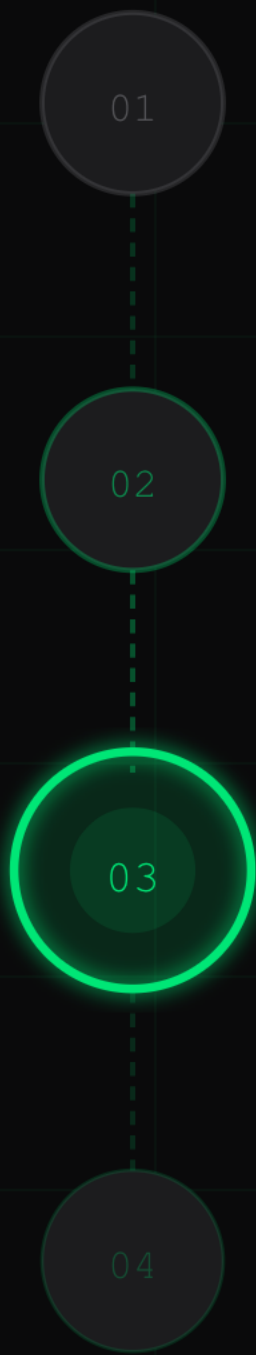

03

This Was Production Work, Not a Prototype

Agents handled service isolation, wrote tests, flagged a dependency conflict. PR needed 45 minutes of review. Not a demo environment.

04

Coordination Is the Unlock, Not Parallelism

Hundreds of agents running in parallel means nothing if they conflict. Dynamic Workflows handles coordination. That's what changed the output quality.

05 ·

The Backlog Question Has a New Answer

It's not 'can I afford this contractor' anymore. It's 'how do I scope this for the workflow.' Four production tasks in. The cost math holds.
