THE AGENT IS CHEAP

Salesforce's AI SDR page lists the real work

Salesforce says its own AI SDR books more than 60 meetings a week. The same page lists the work behind it.

OPEN THE LEDGER

ENTRY 02 · STAT VS WORK

One page quotes the result and lists the work

Since an April 2026 go-live, Salesforce says Piper booked more than 60 meetings a week on average. The same page lists six items of work done in four weeks.

RECORDED SYSTEM	VERYDIAN
THE QUOTED RESULT	THE LISTED WORK
— 6% CONVERSION	• SIX WORK ITEMS
VS	
— 60+ MEETINGS A WEEK	• FOUR WEEKS

ENTRY 03 · THE WORK LIST

Six work items. By my read, one is the agent.

CRM integration, routing configuration, agent tuning, seller enablement, end-to-end testing, governance reviews. My read: only agent tuning is about the agent itself.

01 CRM INTEGRATION	02 ROUTING CONFIG	**03 AGENT TUNING**
04 SELLER ENABLEMENT	05 END-TO-END TESTING	06 GOVERNANCE REVIEWS

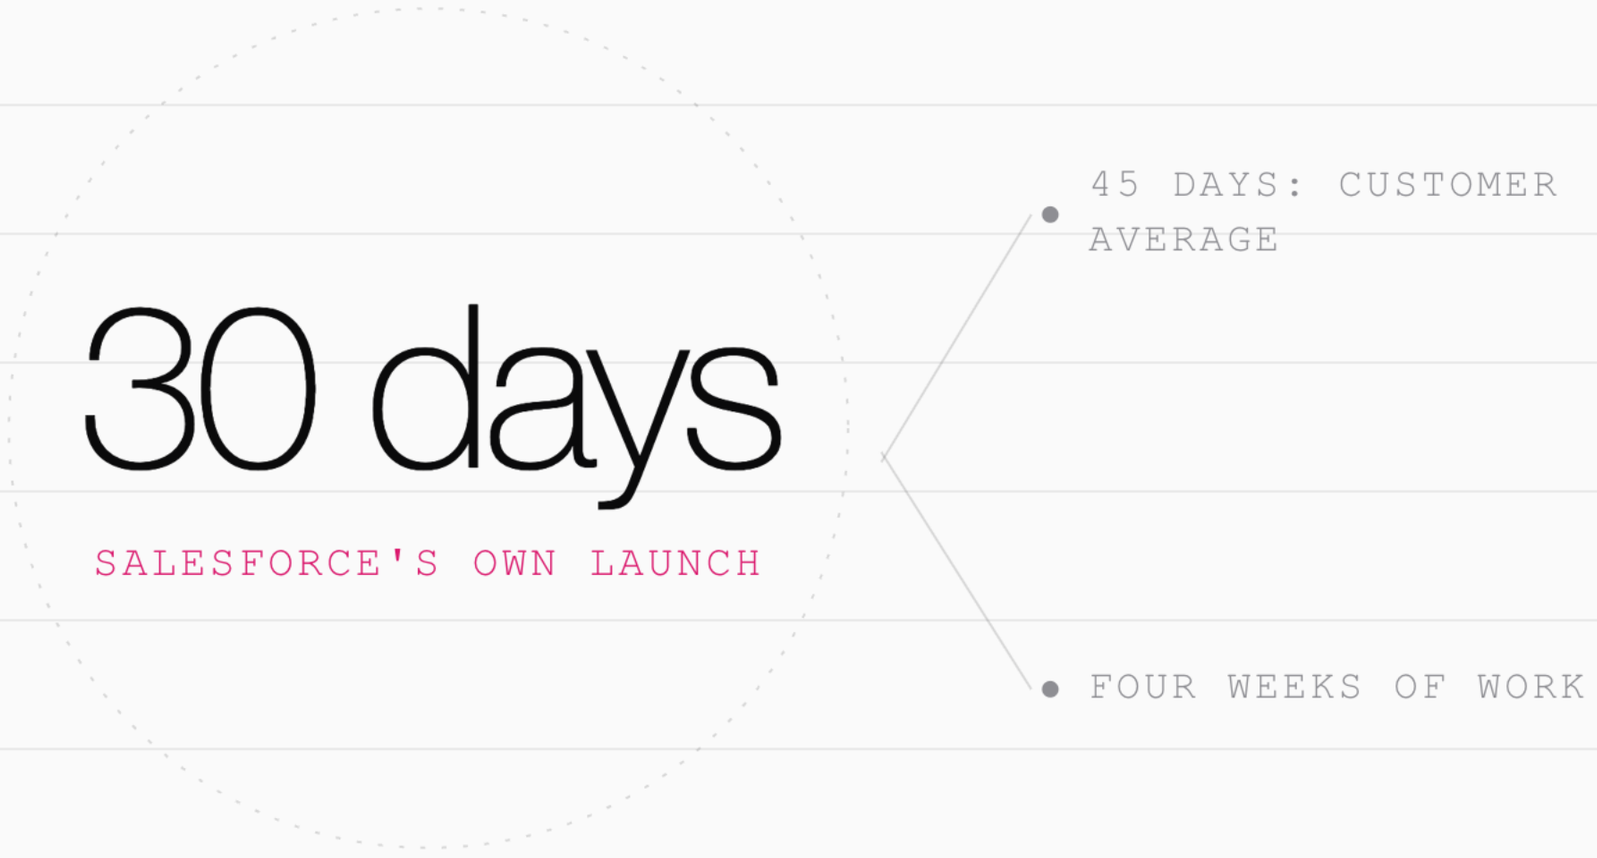

ENTRY 04 · DEPLOY TIME

30 days for Salesforce. 45 for customers.

Salesforce says it configured and launched Piper in 30 days. Its September release says customers deploy Piper in 45 days on average. Both are the vendor's own numbers.

RECORDED SYSTEM

ENTRY 05 · STATUS LINE

Inbound is live. Outbound is still a pilot.

On September 11, Salesforce listed Piper as GA now and Hunter, its outbound agent, as pilot now with GA in November '26. The page doesn't say how Perk's Hunter figure was measured.

ENTRY 06 · VENDOR QUESTIONS

Four questions before you buy an AI SDR

My four questions, drawn from the work list on Salesforce's own page. A vendor who can't answer all four is selling you the cheap part.
