The scarce thing in AI is no longer the model _

Anthropic is committing \$100 million to train deployment engineers.
Read the program order as a buyer's checklist.

RUN SESSION _____

```
arhem@verydian:~/the commitment$ step 2
```

A model vendor is paying for deployers

Anthropic's commitment: \$100 million, with a goal of training 10,000 Frontier Deployed Engineers by the end of 2027.

STDOUT

\$100M

TRAINING COMMITMENT

• 10,000 ENGINEERS

• BY END OF 2027

```
arhem@verydian:~/program order$ step 3
```

Anthropic's program order is the checklist

A multi-day program, a graded practical, then a 12-week residency leading a real use case at the engineer's own organization. Assessed again at the end.

STDOUT

MULTI-DAY
PROGRAM

GRADED
PRACTICAL

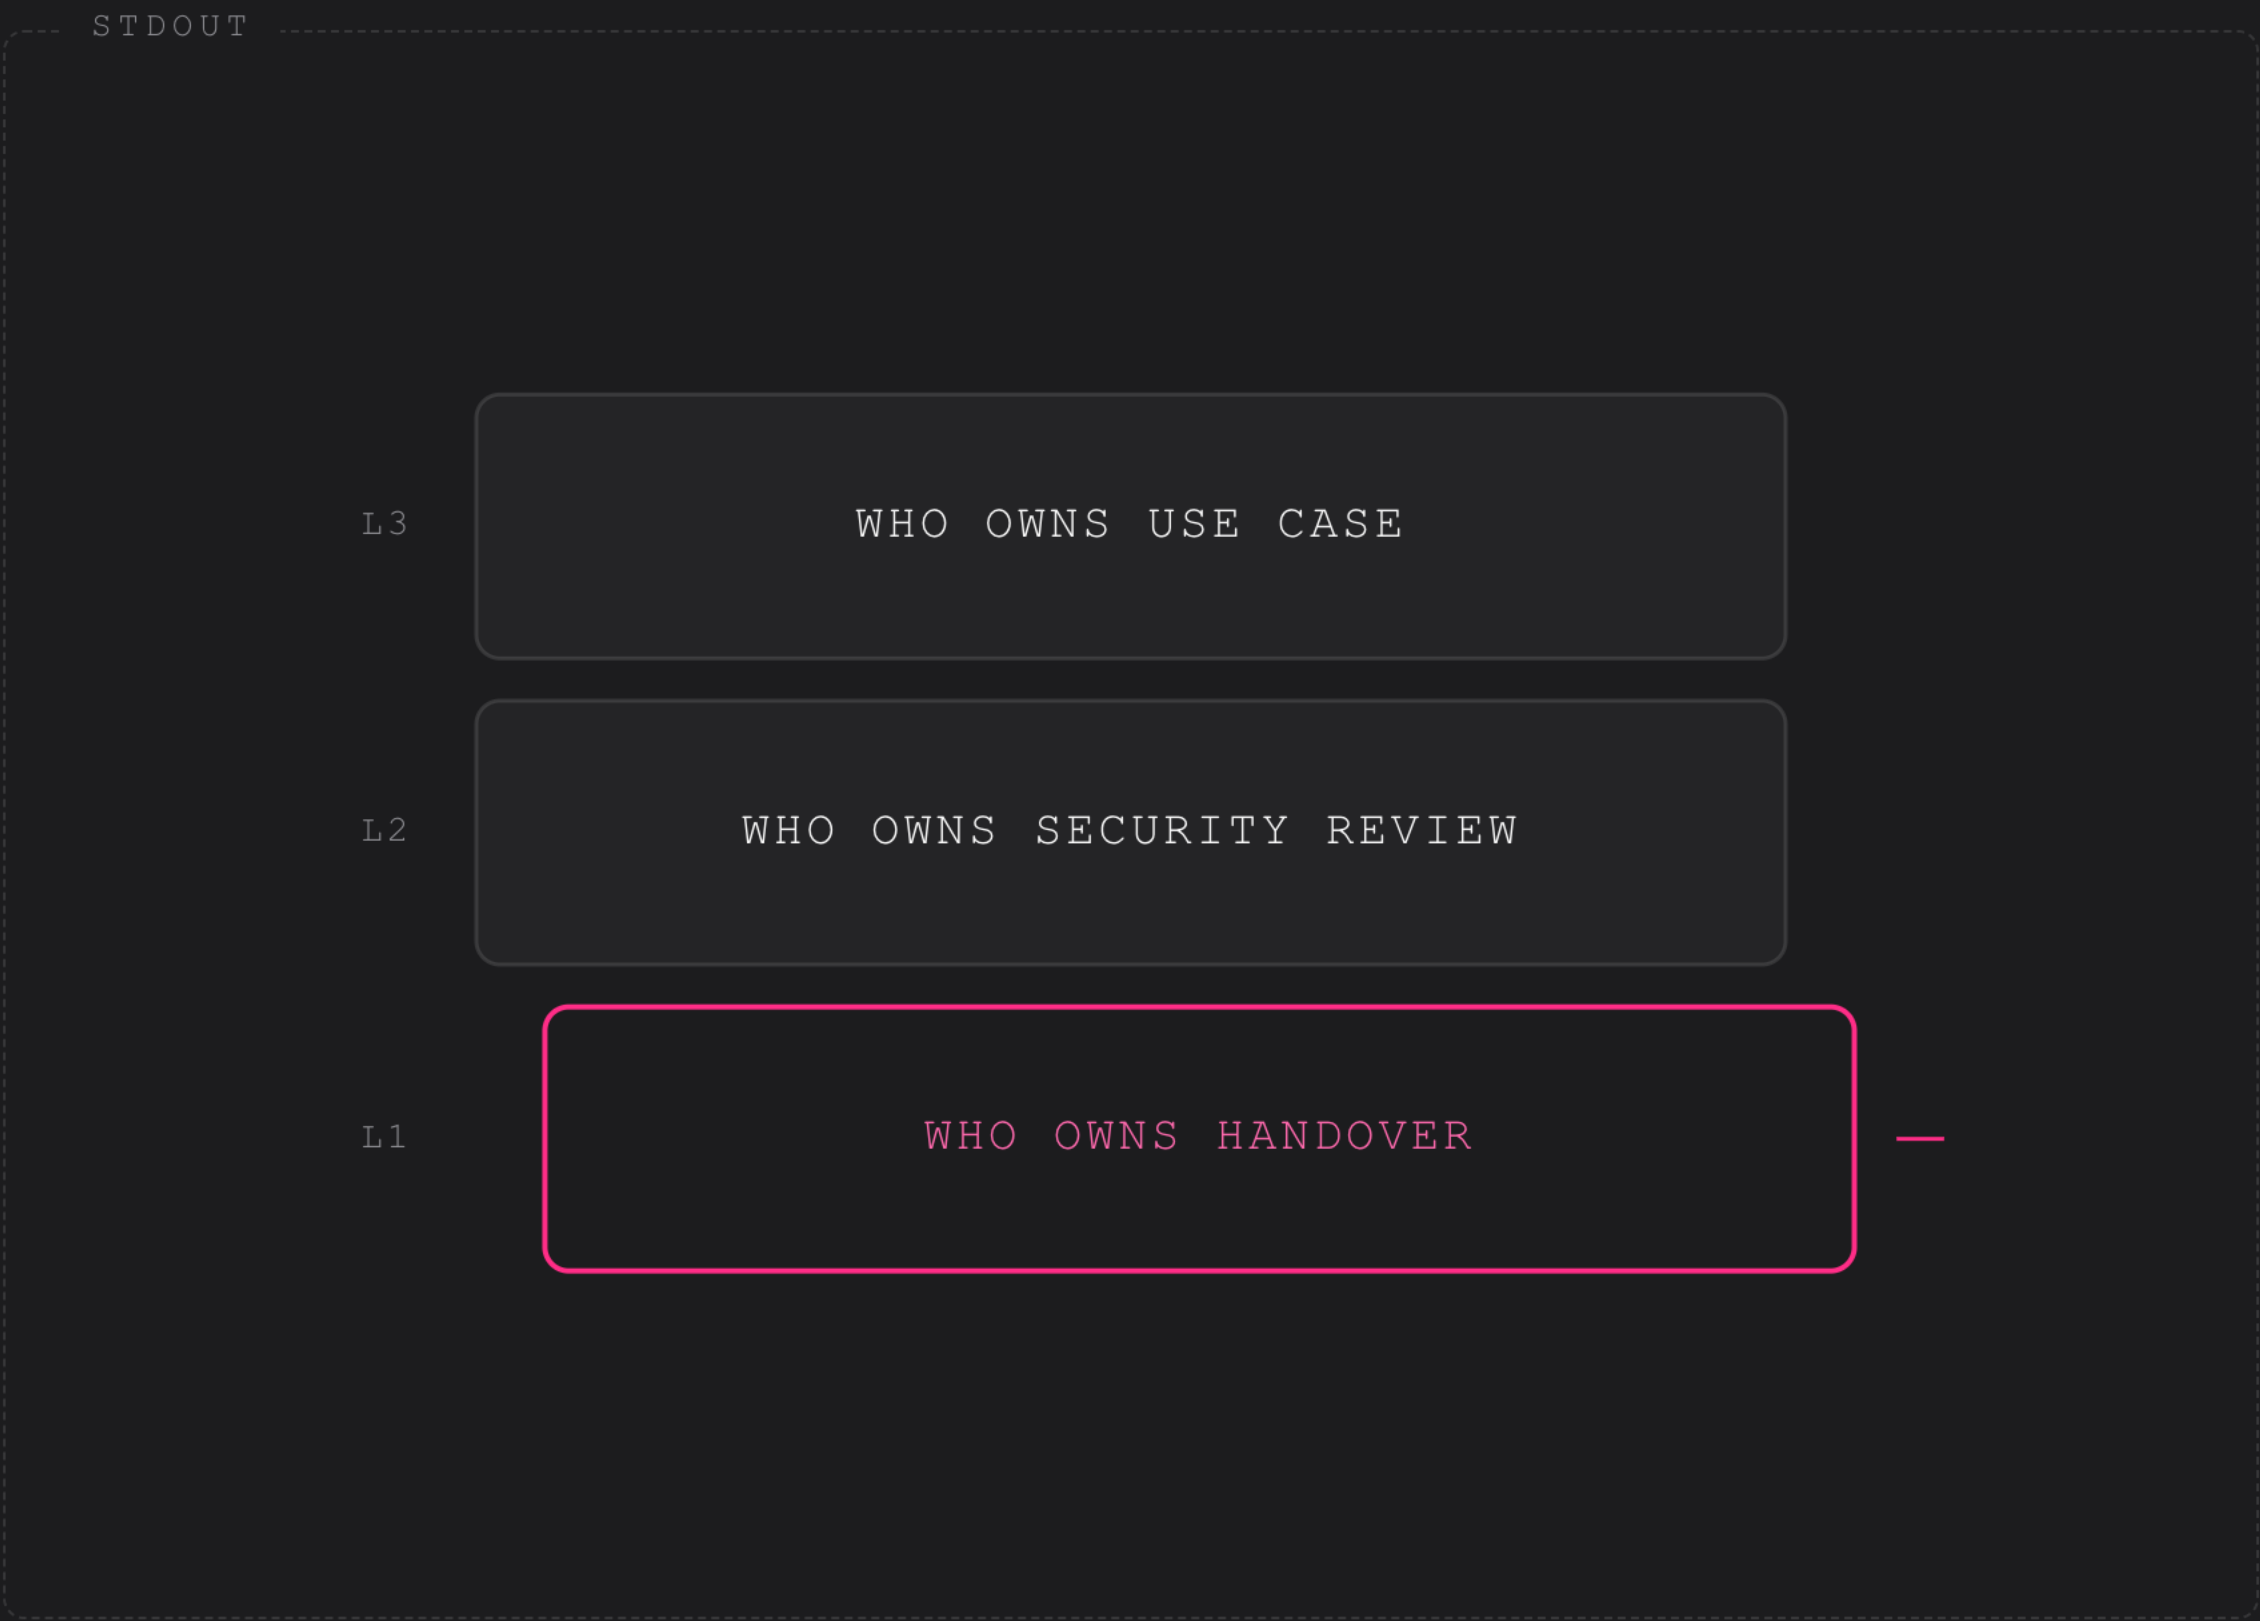

12-WEEK
RESIDENCY

FINAL
ASSESSMENT

```
arhem@verydian:~/buyer questions$ step 4
```

Turn the curriculum into questions for your builder

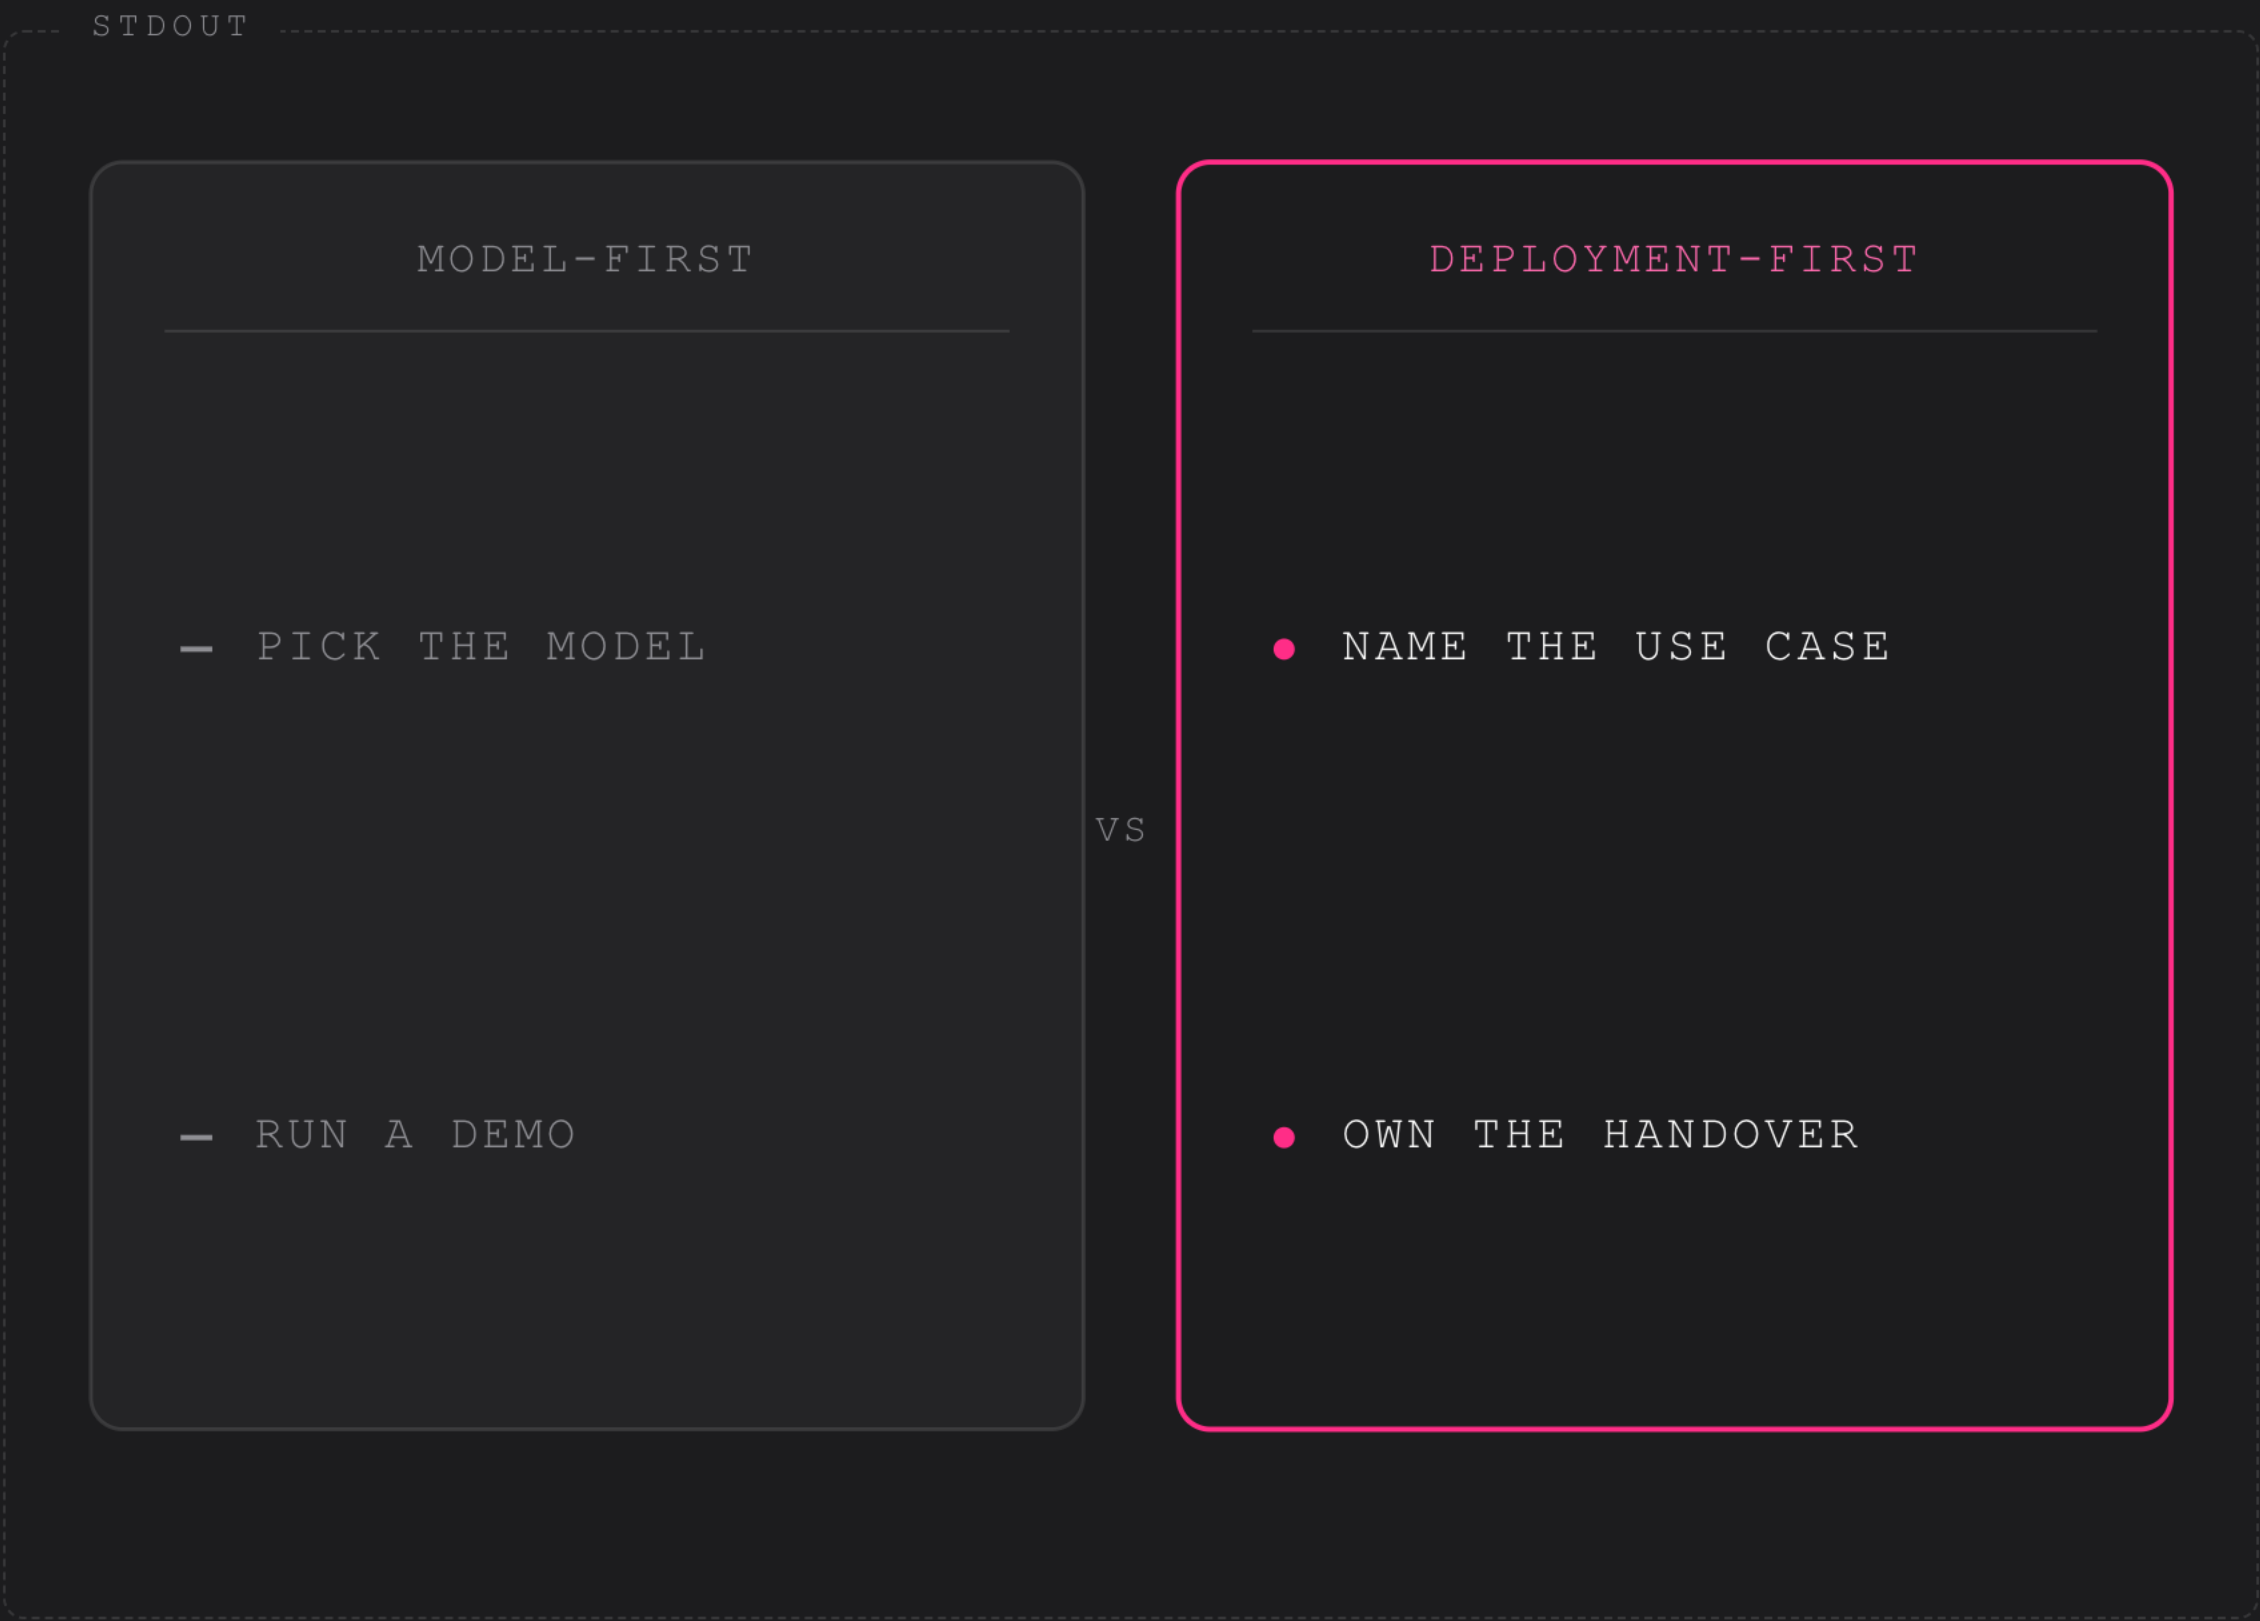

The program runs from the right use case through security review to handover. Ask who owns each stage. A blank answer is your risk.

arhem@verydian:~/two ways to buy\$ step 5

Model-first buying skips the hard part

Model-first buying starts with the vendor name. Deployment-first buying starts with who carries the system to production and keeps it running.

Put an owner on every stage

Before you buy, name who owns use case, security review and handover.

ASK BEFORE YOU BUY
