

PIPELINE EXPERIMENT

I Forced One Model Onto Every Subagent

Claude Code's new flag collapses per-agent model choice
into one setting. Here's what happened.

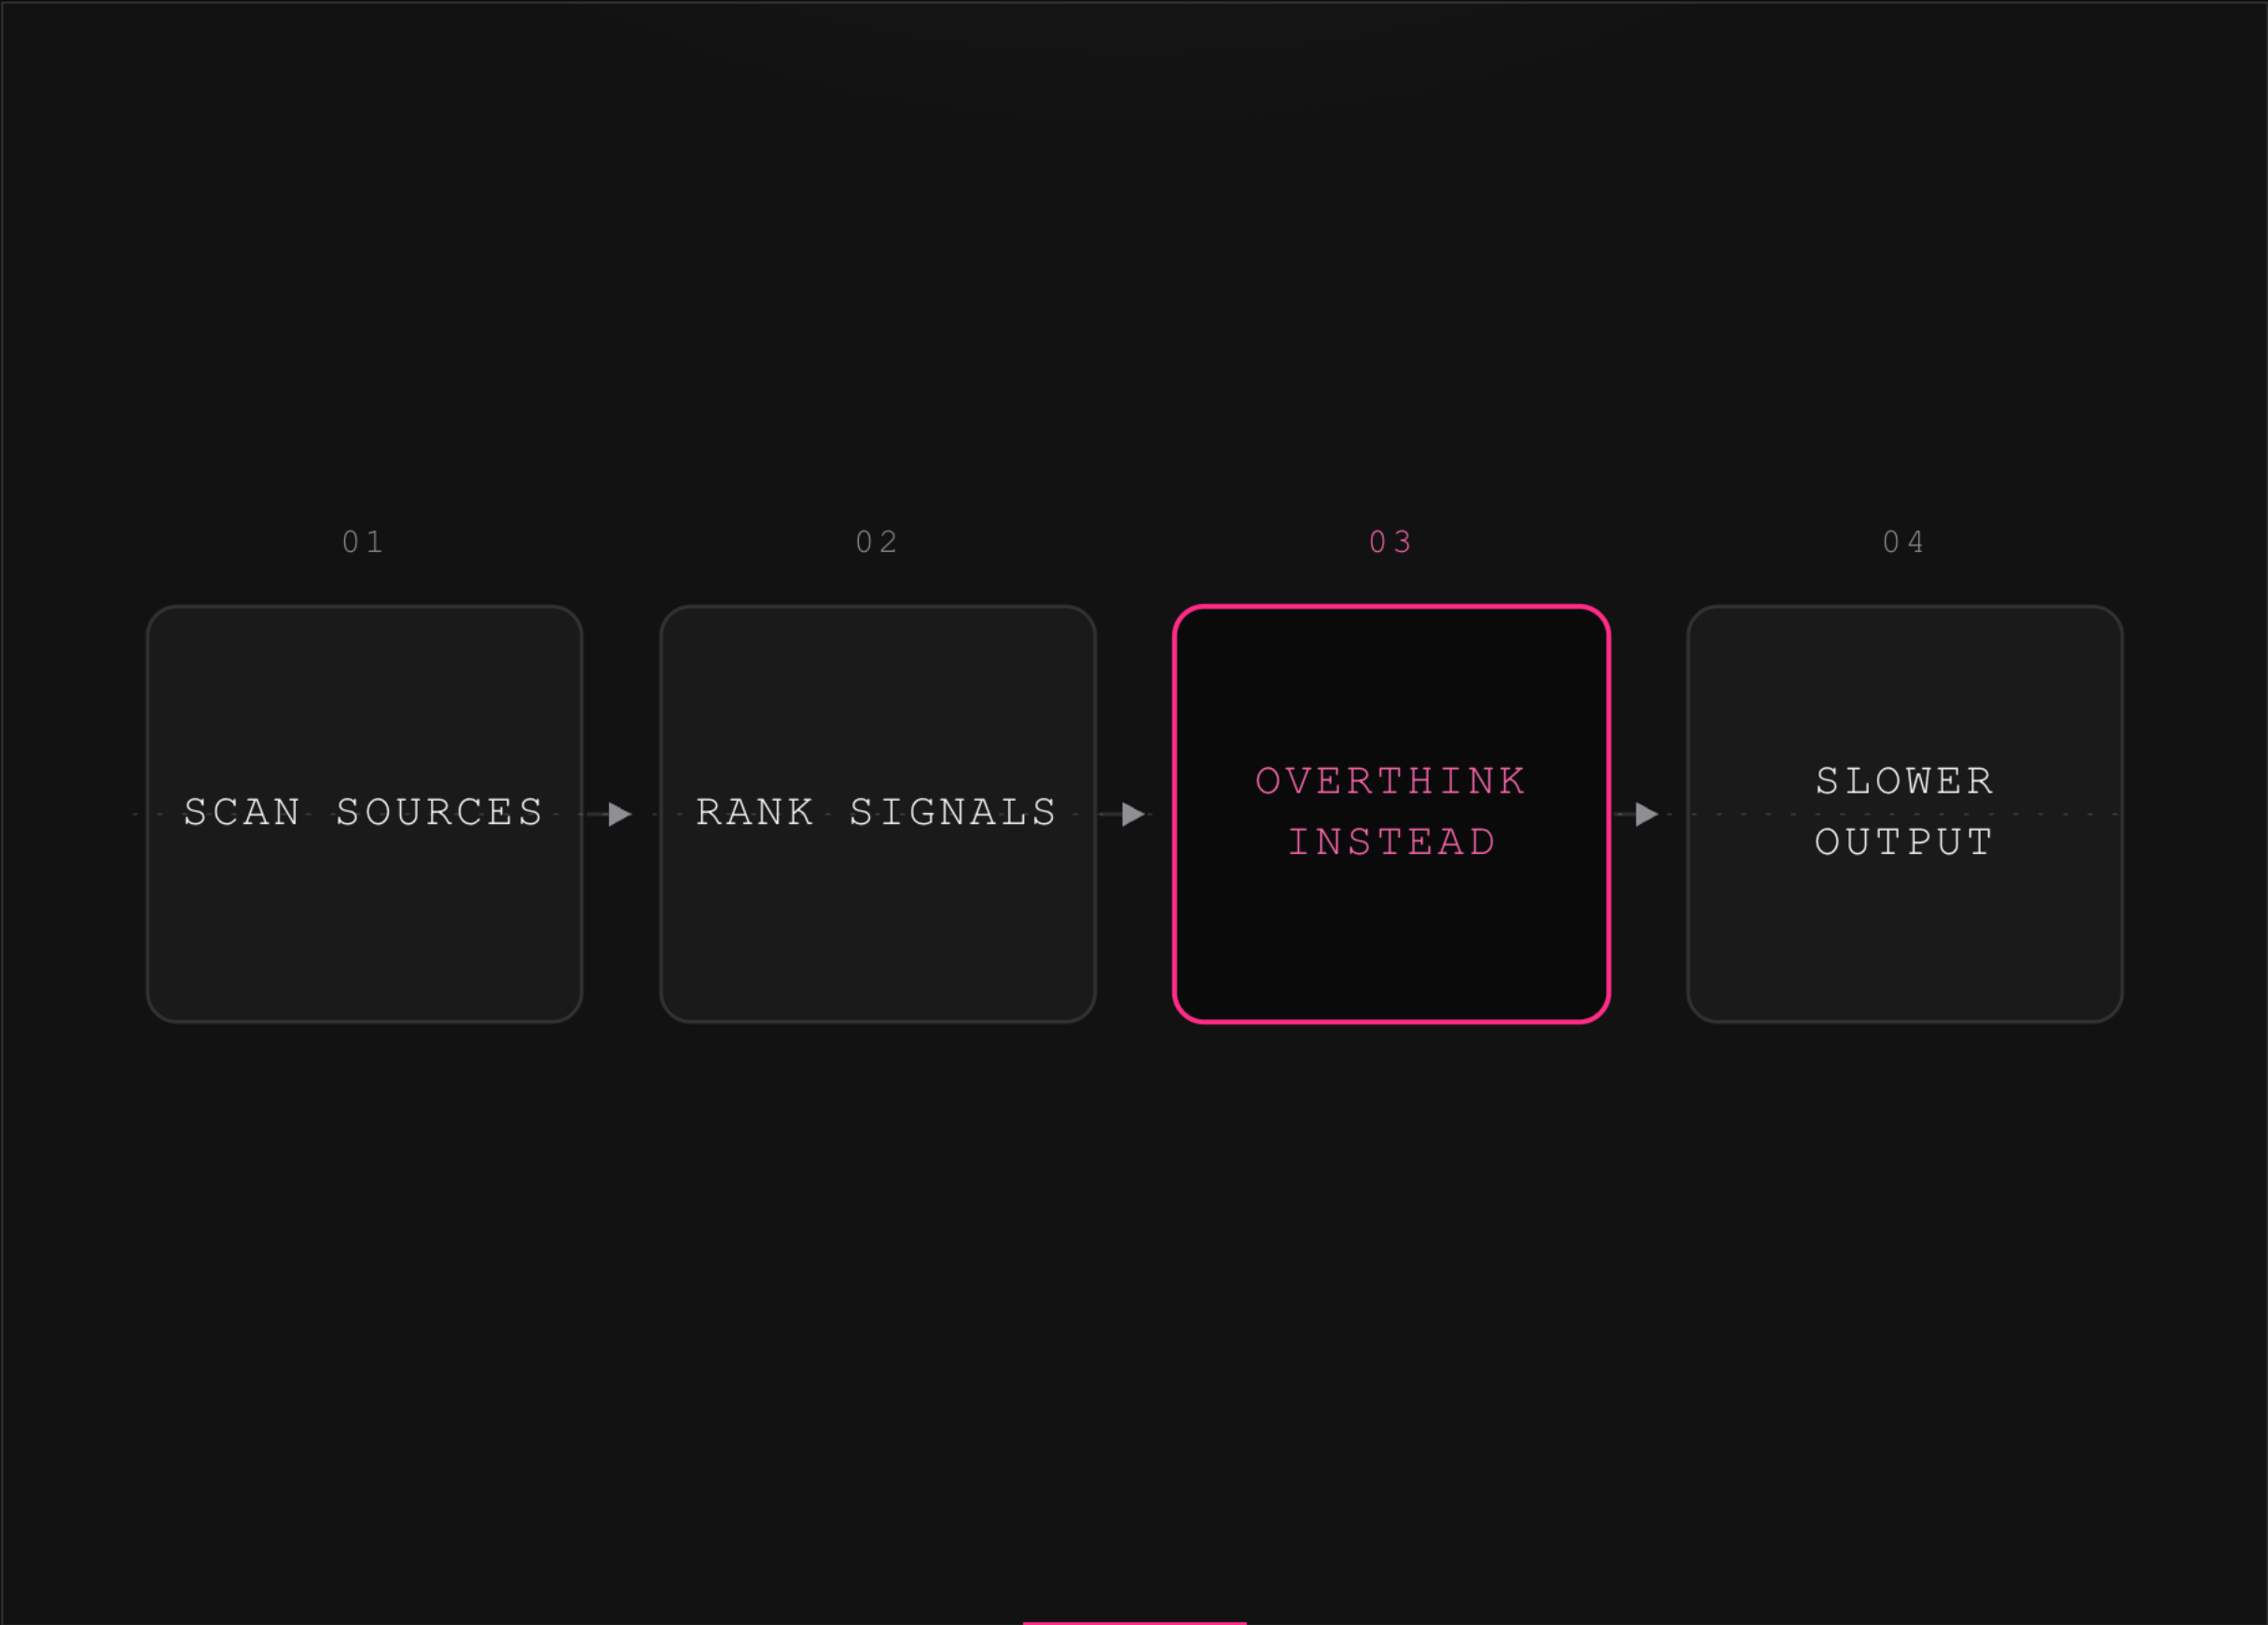

ENTER

```
> EXPORT FORCE MODEL SET   
  
$ RESEARCHER OVERRIDDEN  
  
$ WRITER OVERRIDDEN  
  
$ EDITOR OVERRIDDEN  
  
$ NOTION MANAGER OVERRIDDEN
```

● EXHIBIT 02 · THE NEW FLAG

One Flag, Every Subagent, Same Model

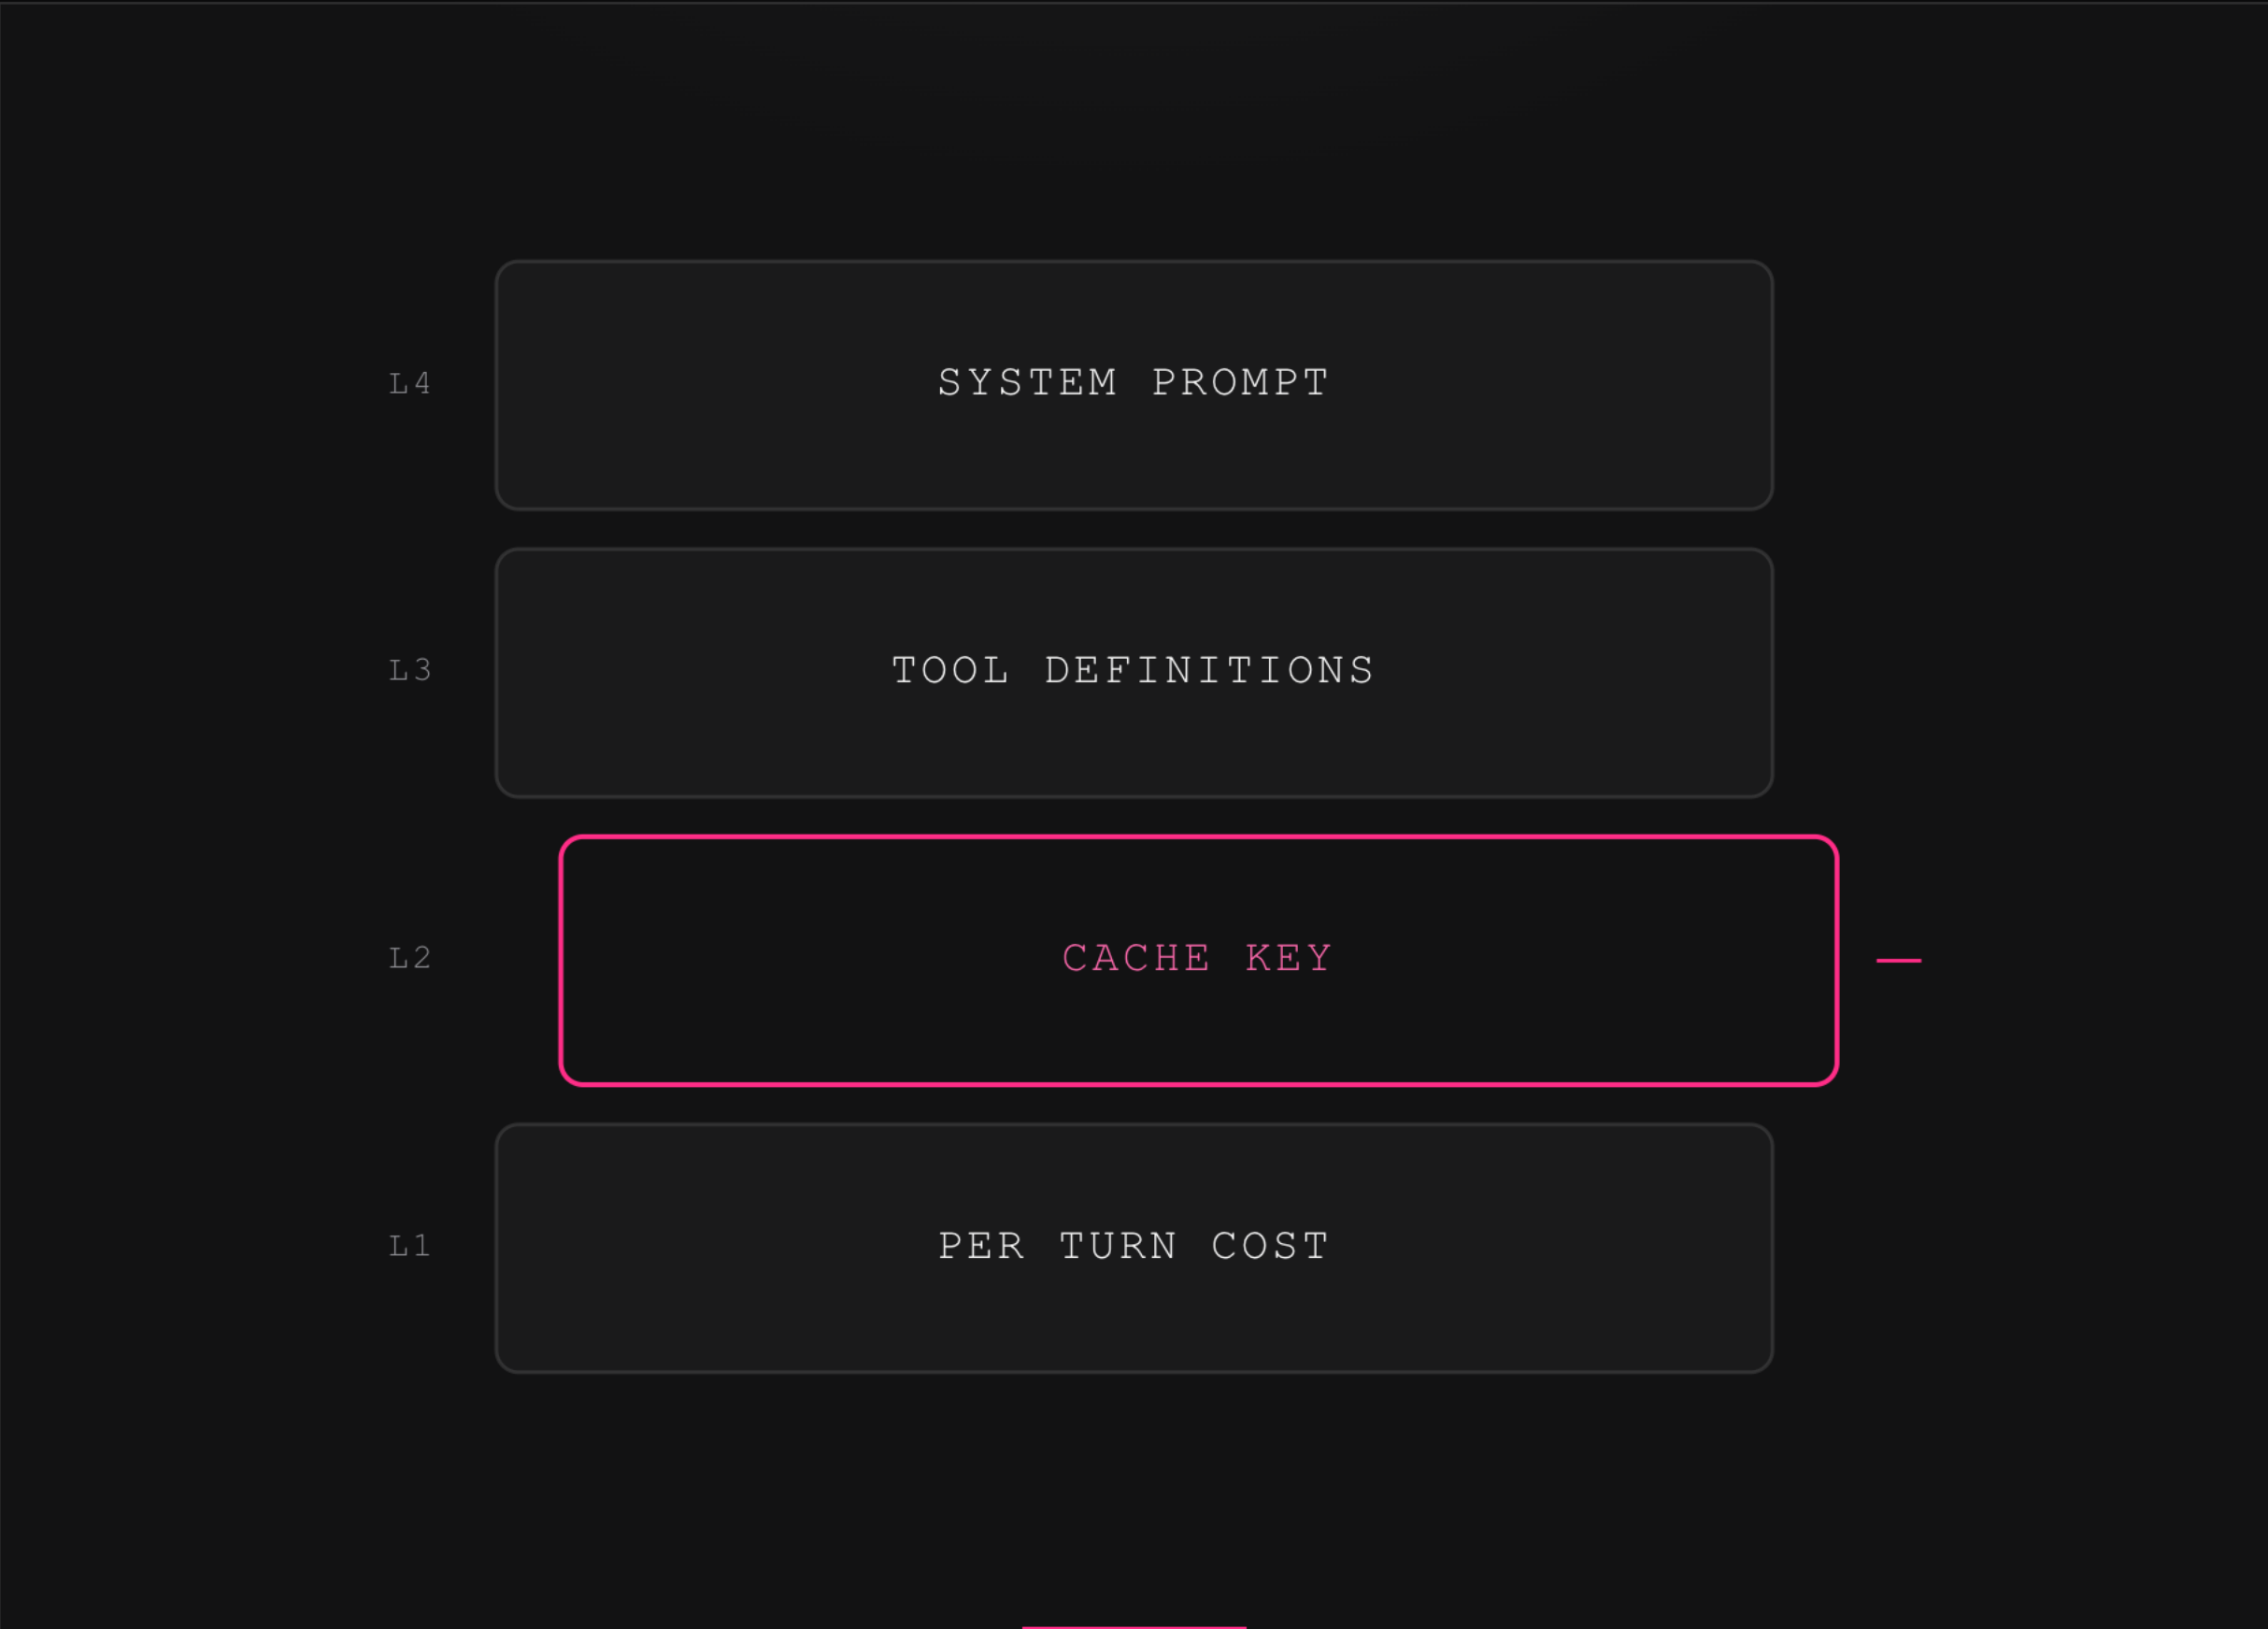

CLAUDE_CODE_SUBAGENT_MODEL_FORCE overrides every per-agent model choice in a session.

● EXHIBIT 03 · WHAT BROKE

Research Got Worse Under One Model

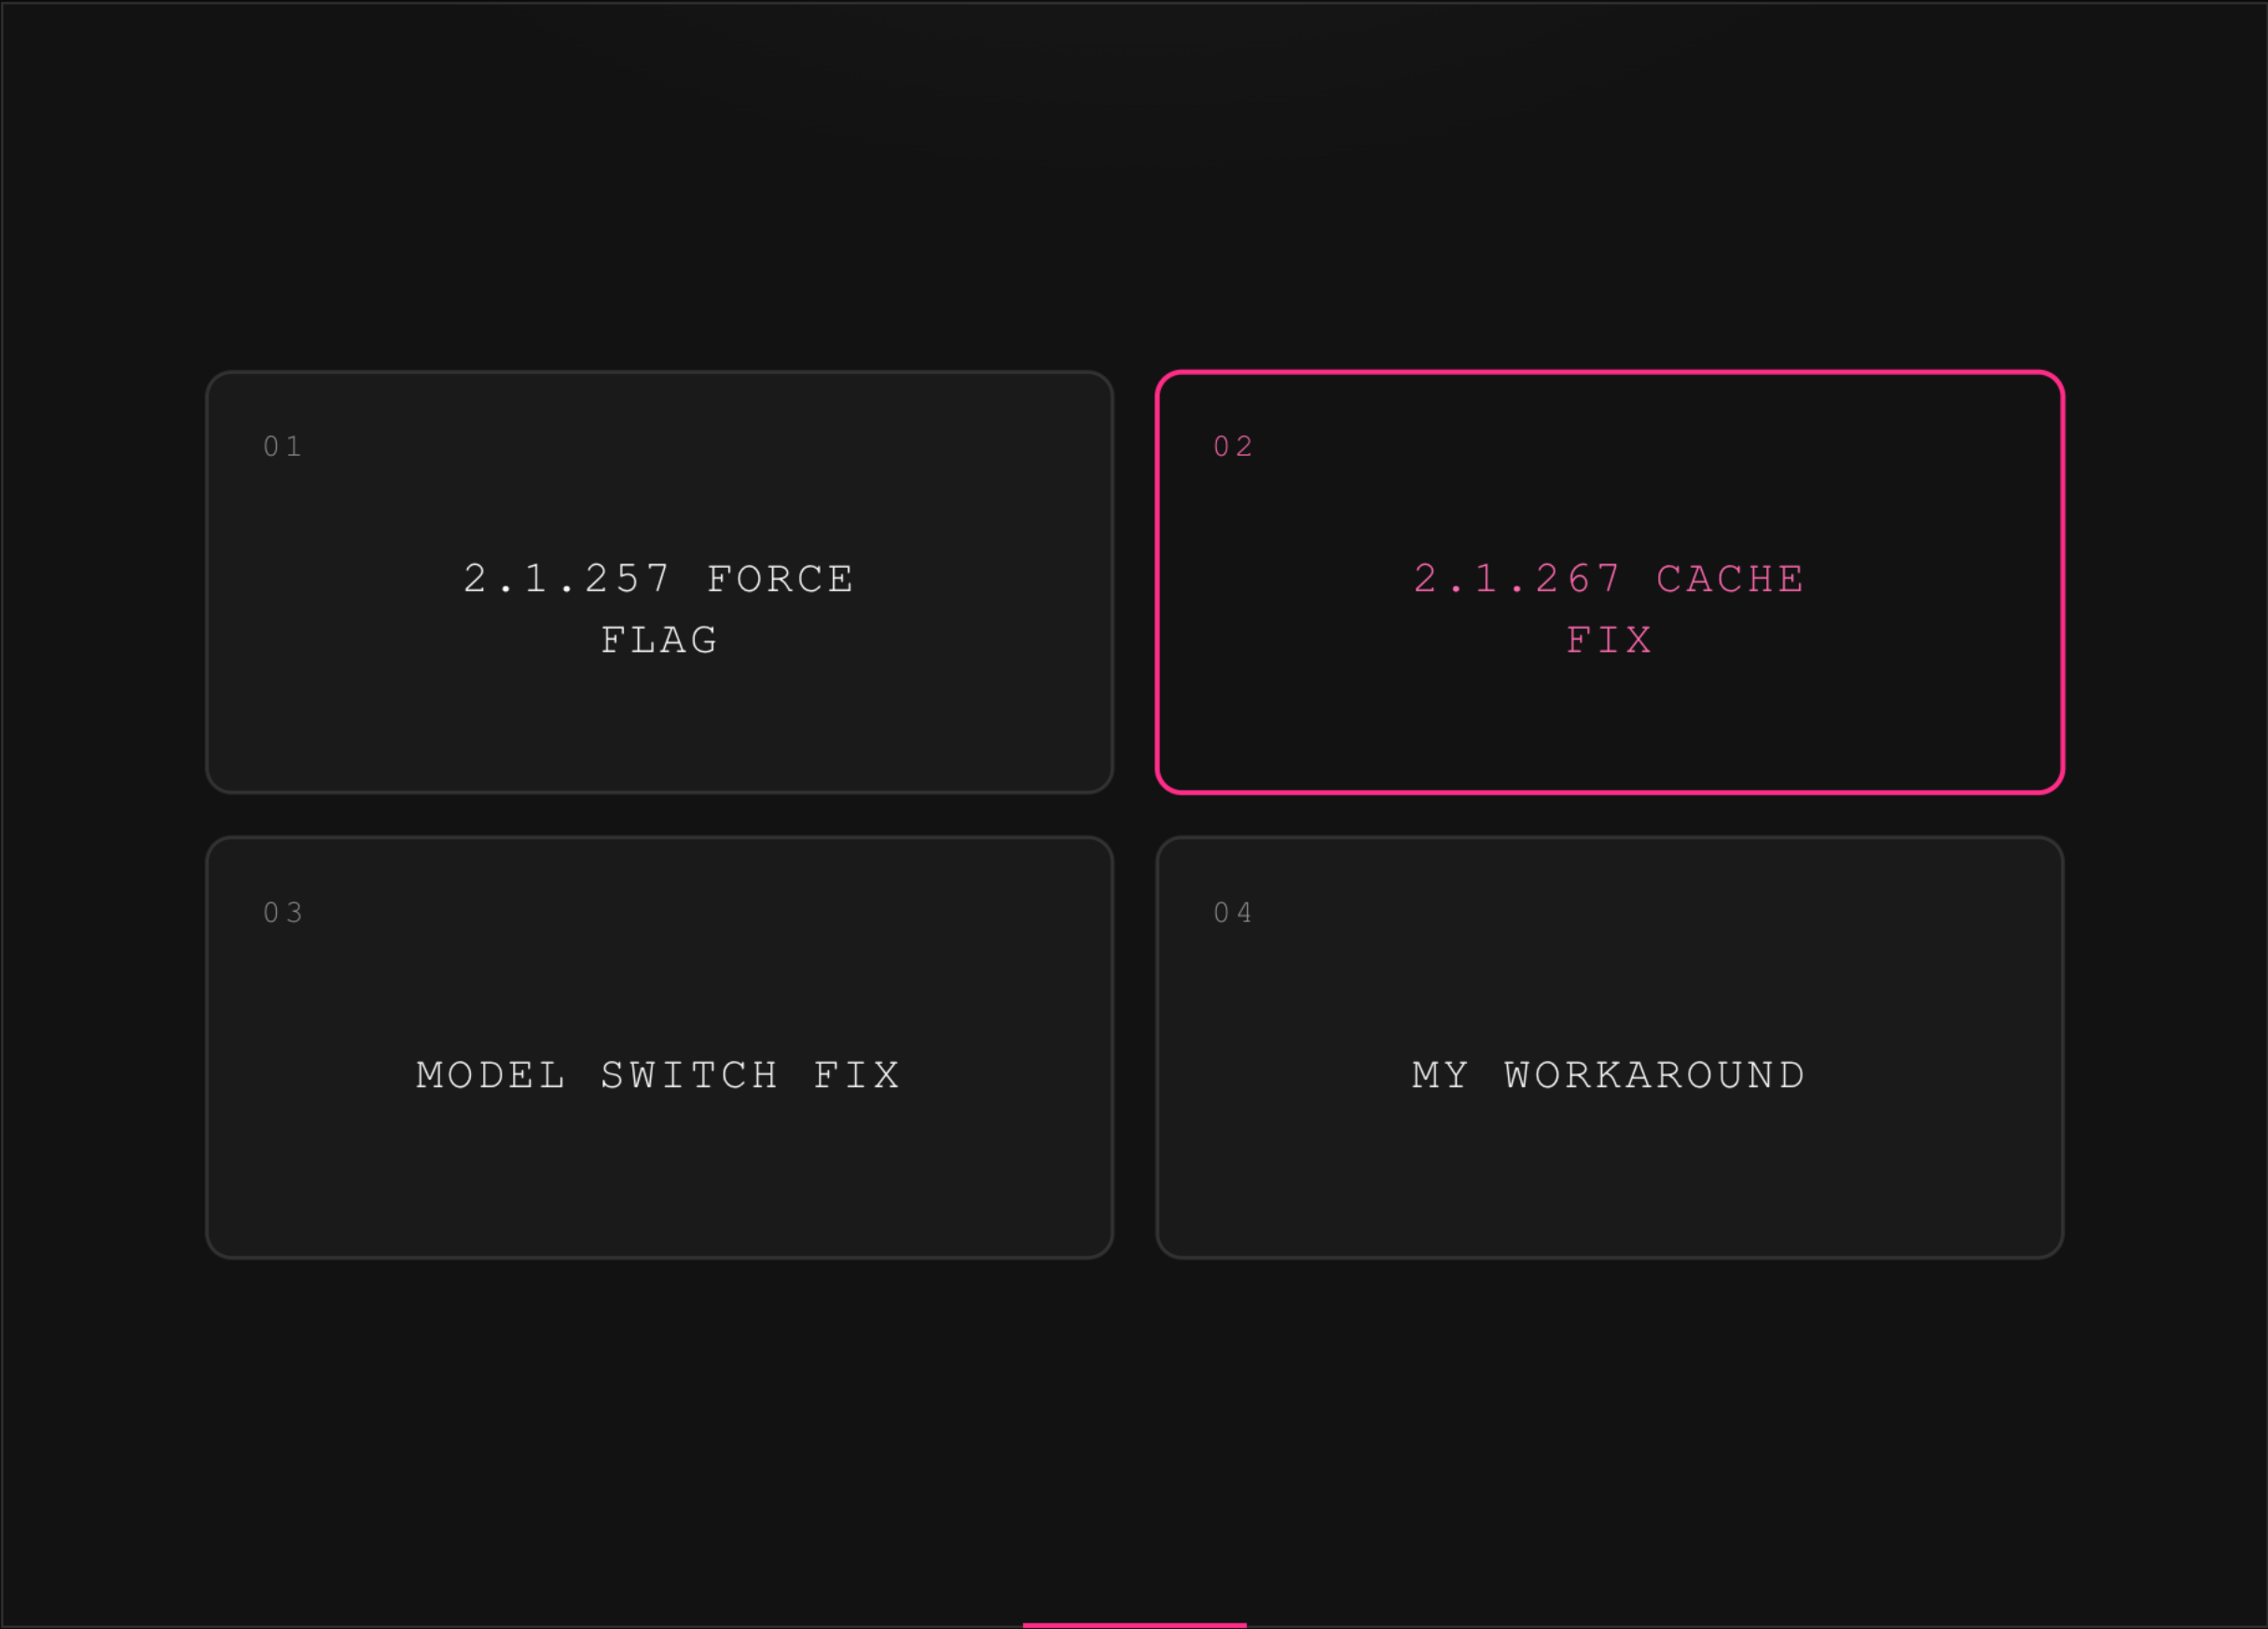

Wide, cheap signal-scanning turned into slow overthinking on every single source.

● EXHIBIT 04 · WHAT FIXED

The Real Win Was Buried In The Cache

Forcing one model normalized how prompts got cached and cut cost I didn't know I was paying.

● EXHIBIT 05 · THE CHANGELOG

The Changelog Had Already Fixed It

2.1.260 records the system prompt and tool definitions once instead of re-rendering them. My workaround chased a patched bug.

Audit Your Own Subagent Cache

Check whether you're re-paying for the same tokens every single run.

CHECK YOUR CACHE
