

BUILDER JOURNEY

# I Let an Agent Handle a \$40K VP Deal

It ran the standard sequence on her exactly like every other lead.  
That was the mistake.

SWIPE

STANDARD CADENCE

02 / 06

# The Sequence That Worked on Everyone Else

Research the account, draft the opener, follow up day 3 and day 7, escalate on day 10 if there is no reply.

BUYER TIER GAP

03 / 06

# What a VP Notices That Others Don't

A generic case study and a templated cadence read as thoughtful to some buyers. To a VP evaluating a \$40K spend, it reads as an insult.

CONVERSION GAP

04 / 06

# The Gap New Data Confirms Is Real

The AI to human conversion gap in outbound is widest exactly at the VP and above tier, where the deal size is also highest.

THE NEW RULE

05 / 06

# The Rule I Built the Next Morning

Research, monitoring, and the first draft still run on the agent. Anyone senior enough to sign gets handed to a human before the next touch.

# Know Exactly Where to Take the Agent Off

The close rate lives in that handoff.
