

FOUNDER LOG / BUILD IN PUBLIC

BUILD IN PUBLIC

First Build: Six Weeks. Fourth Build: Four Days.

Where the speed actually comes from

JOURNEY
● IDEA BORN
Week 01

○ FIRST PROTOTYPE
Week 02

○ FIRST CLIENT CALL
Week 03

○ ZERO CLOSES
Week 04

○ PIVOT STRATEGY
Week 05

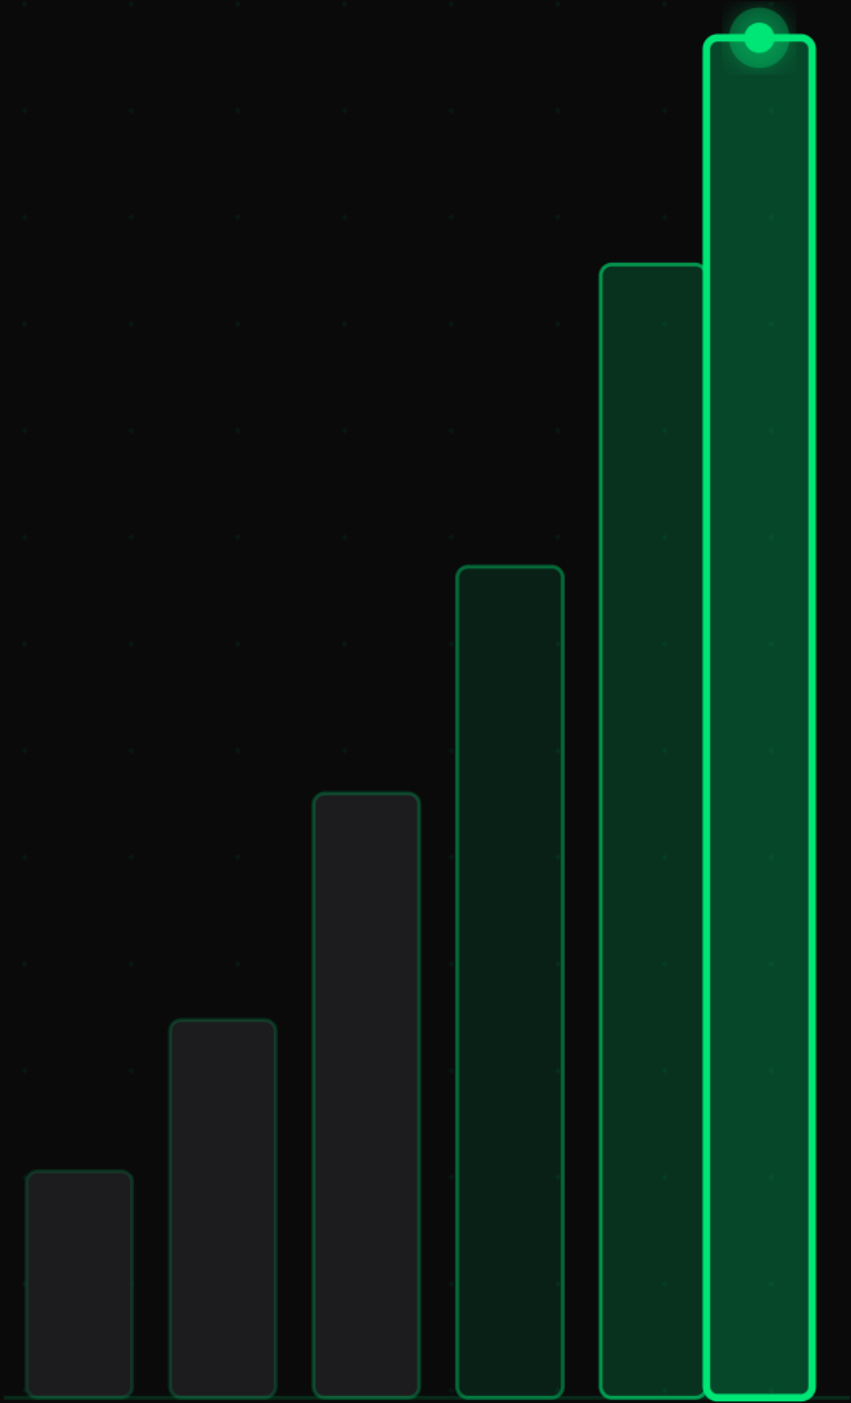

○ 2× CLOSE RATE
Week 07

● STILL BUILDING →
ONGOING

02

The first build forces questions you didn't know existed

Where does authority end, what happens on malformed input, who gets notified on failure.

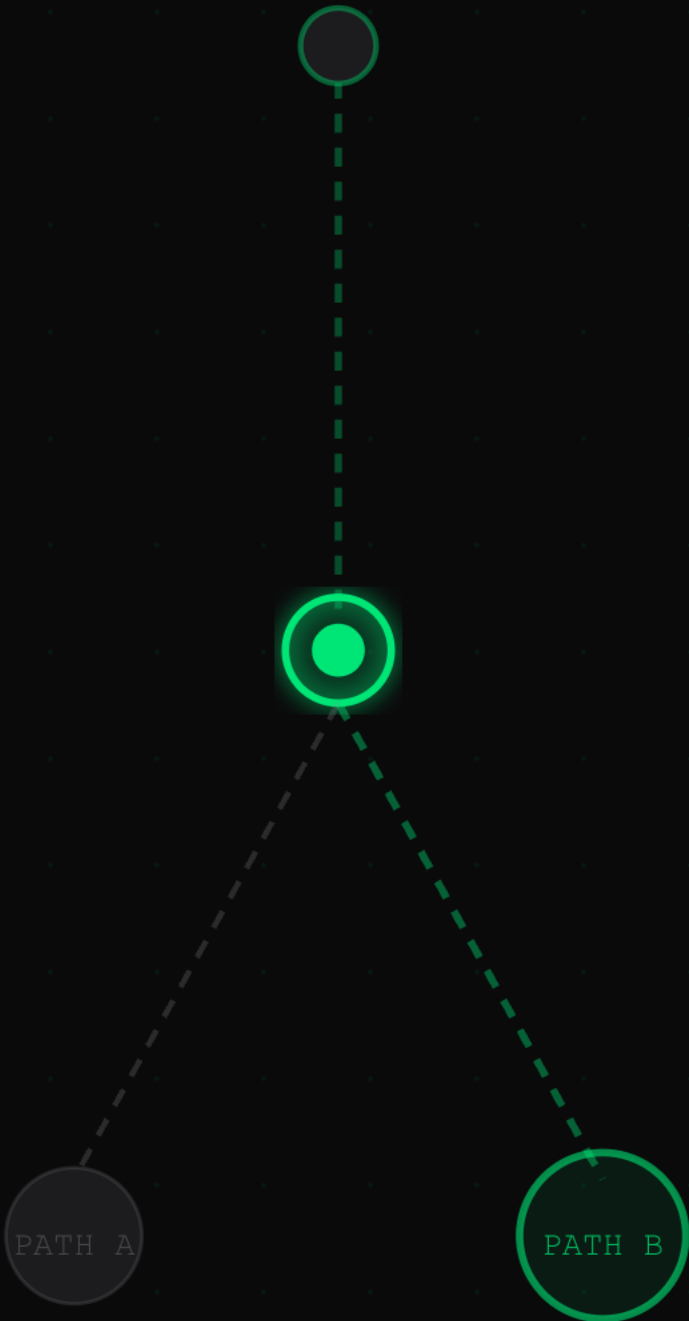

MOMENTUM

03

A date format edge case cost me two full days

Not because the bug was hard. Because I hadn't built visibility into where the pipeline actually failed.

DECISION.POINT

04

n8n operators
running 40-plus
systems report the
same jump

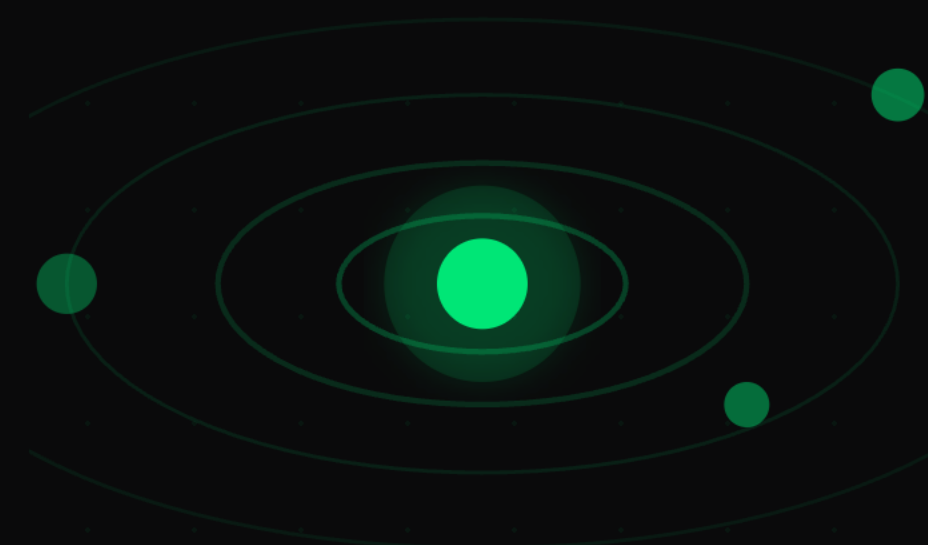

Boundaries and interfaces become durable
knowledge, not a cost you pay again on every
build.

05 ·

By build four, the checklist finally left my head

Standard error escalation, standard input validation, standard checkpoint placement. Built in, not improvised.

ECOSYSTEM

EXEC.BRIEF / AI INFRASTRUCTURE

Follow me — I build in public

Own the infrastructure and the knowledge compounds
