

I Use Both Codex and Claude Code. Here's Why.

—
They're not competing for the same job.

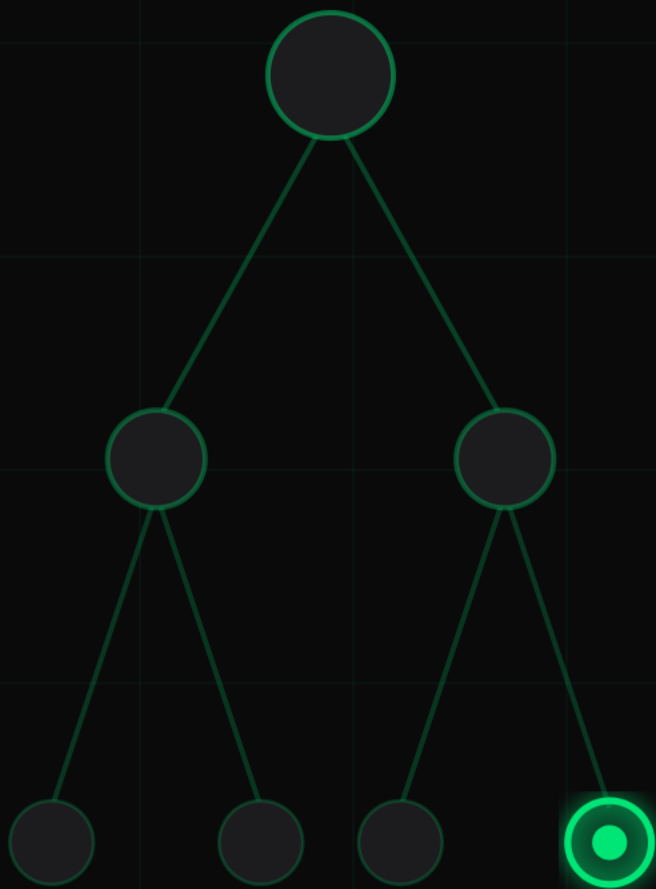

DATA.SCATTER

02 ·

Codex: Terminal-Native, Narrow Output, No Conversation

Defined task, exact spec, let it run. Best when you know what you want and don't need the tool to ask questions.

TREE.NODE

03

Claude Code: Orchestration, Reasoning, Multi- Agent Coordination

When the output of one agent changes what the next one does. When intermediate judgment matters. Claude Code holds the coordination layer.

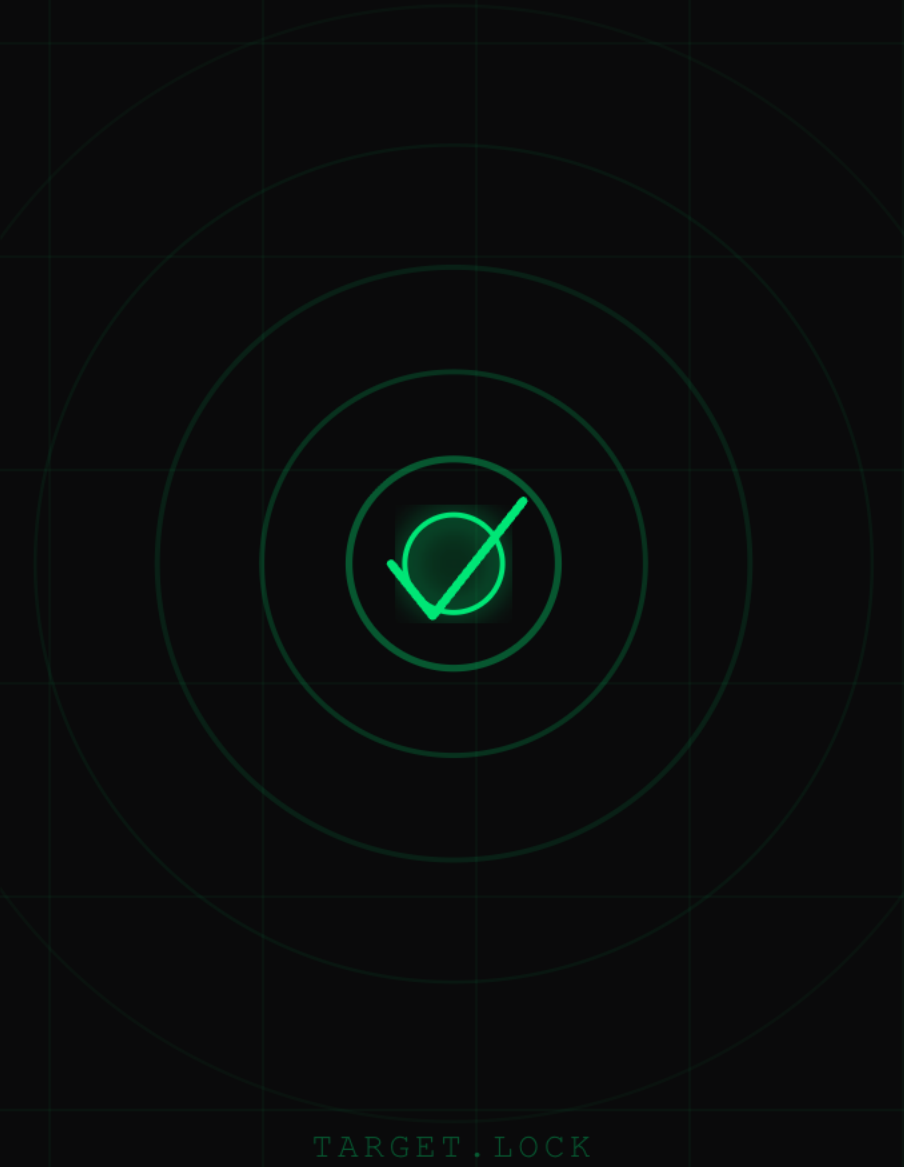

04 ·

SEG.RING

60% of My Claude Code Use Is Orchestrating Other Tools

Including Codex tasks. The two tools layer. One reasons, one executes. That division is the actual workflow.

05 ·

Which One to Start With: Claude Code First

Build something complex enough to have parts worth delegating. Then you'll know exactly what Codex is for. The sequence matters.
