

GTM SYSTEMS

39% Of Pipeline Traced To One Signal Layer

It wasn't a new AI tool. It was old data finally reaching reps at the right moment.

SWIPE

02 · the number

39% Of Active Pipeline, One Source

Seismic's sellers attribute 39% of active pipeline to opportunities identified or influenced by ZoomInfo's signals, per ZoomInfo's own case study.

FIG. 2 · VERYDIAN

03 · the mechanism

The Signal Was Already Sitting There

The data existed before this. What changed is it now surfaces inside the CRM, right when a rep decides who to call.

FIG. 3 · VERYDIAN

04 · reported gains

11.5 Hours Back, 54% More Productive

Seismic reports sellers save 11.5 hours a week, run 39% of pipeline through this signal, and are 54% more productive because of it.

FIG. 4 · VERYDIAN

05 · the pattern

Check What You Already Have First

Most teams buy a new tool assuming the value is missing. Usually it's already paid for, just disconnected from where the decision happens.

FIG. 5 · VERYDIAN

Stop Buying Tools You Don't Need

Connect what you already have to where decisions actually happen.
