

STACK ECONOMICS

The model just stopped being your moat

GPT-6 Sol launched at half the price of GPT-5.6 Sol. Opus 5.5 became Claude Code's default Opus the same day.

SWIPE

02 · openai pricing

Everyone reads the same price sheet

GPT-6 Sol is \$2 in and \$10 out per million tokens. GPT-5.6 Sol was \$4 and \$20. Exactly 50% cheaper in both directions.

FIG. 2 · VERYDIAN

03 · anthropic default

Opus 5.5 became the default at \$4 and \$20

Claude Code 2.1.280 made Opus 5.5 the default Opus model on September 22. It carries 1M context at \$4 and \$20 per Mtok.

FIG. 3 · VERYDIAN

04 · durable layers

The value sits around the model

Scoped workflow, validators and approval gates stay put when the model underneath changes. That layer is what a client is actually buying.

FIG. 4 · VERYDIAN

05 · vendor test

Ask what survives a model swap

Swap the model inside a vendor's system. If the output still stays inside the rules, the system is real. If not, you were buying a model.

FIG. 5 · VERYDIAN

Audit your vendor's real moat.

Ask what still works if the model changes tomorrow.

RUN THE SWAP TEST
