

GOVERNANCE SIGNAL

More Governance Means More Rollbacks, Not Fewer

A Sinch survey of 2,500+ leaders shows rollback rates rising with oversight maturity, not falling.

SWIPE 

OVERSIGHT GAP

02 / 06

Weak Oversight Versus Mature Governance

One misses the failure quietly. The other catches it, logs it, and pulls the agent.

WEAK OVERSIGHT

— FAILS SILENTLY

— MATURE GOVERNANCE

VS

CATCHES IT

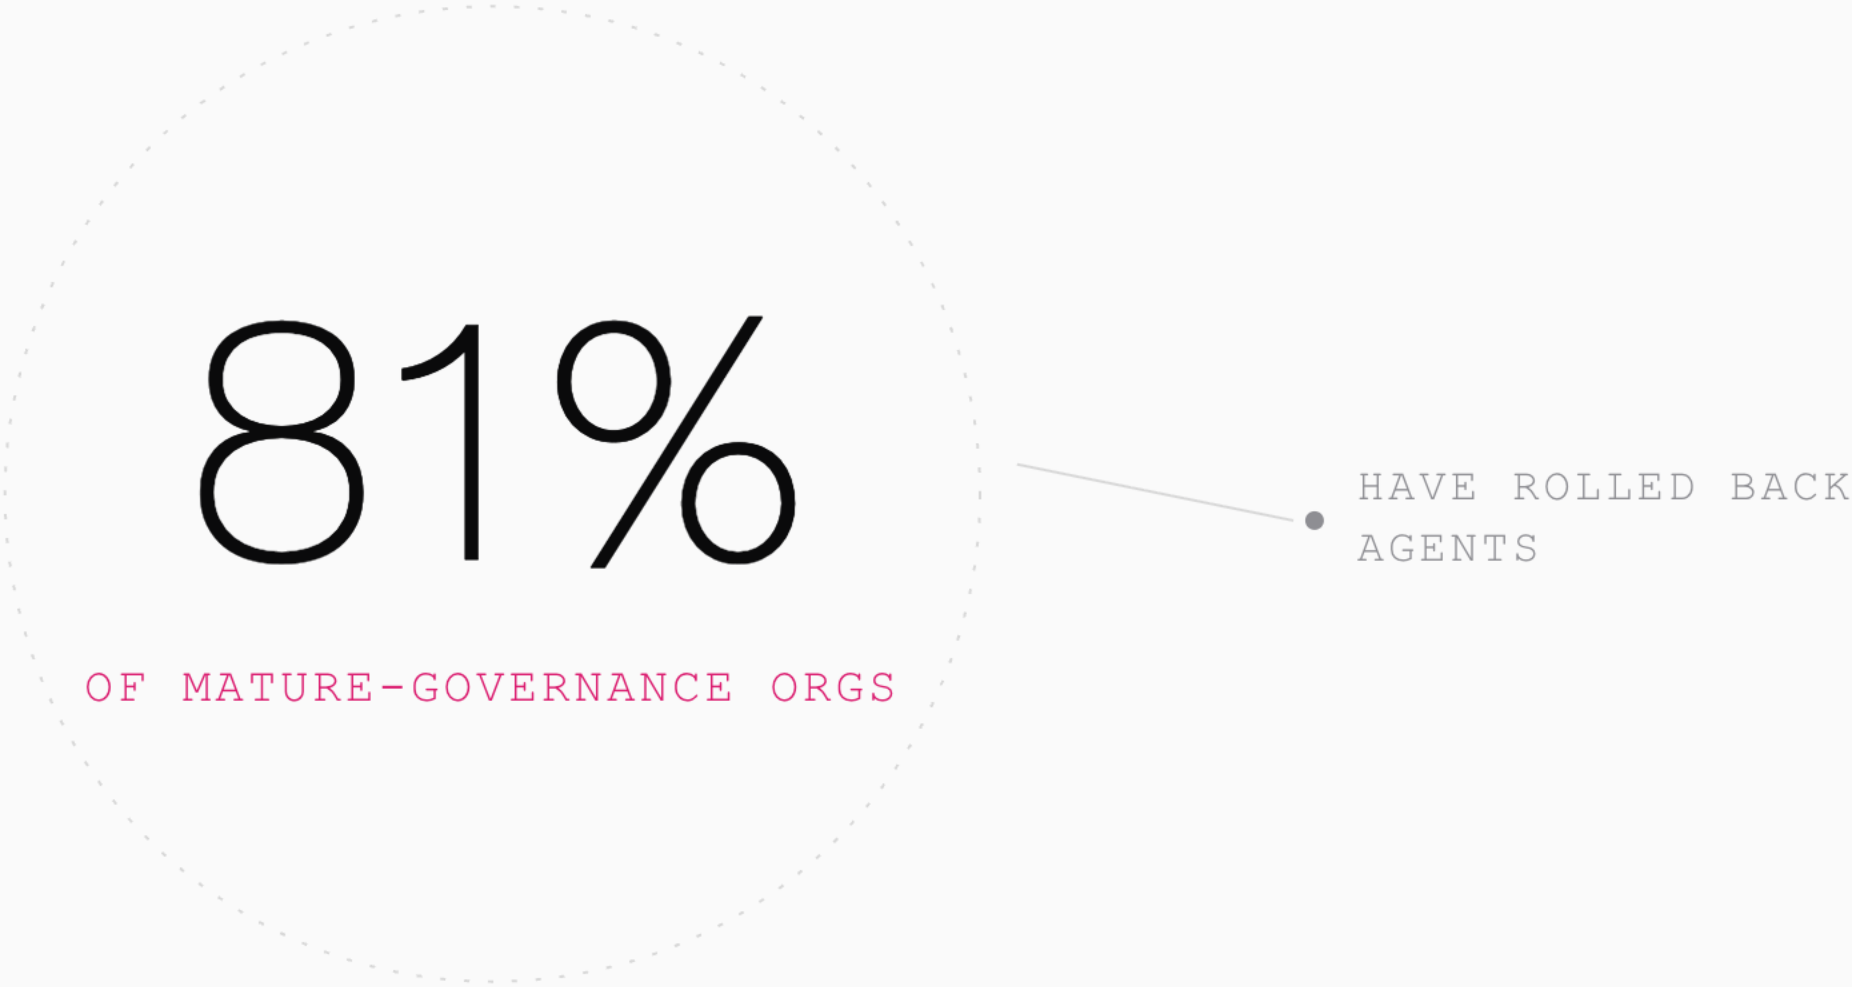

● PULLS IT

THE REAL NUMBER

03 / 06

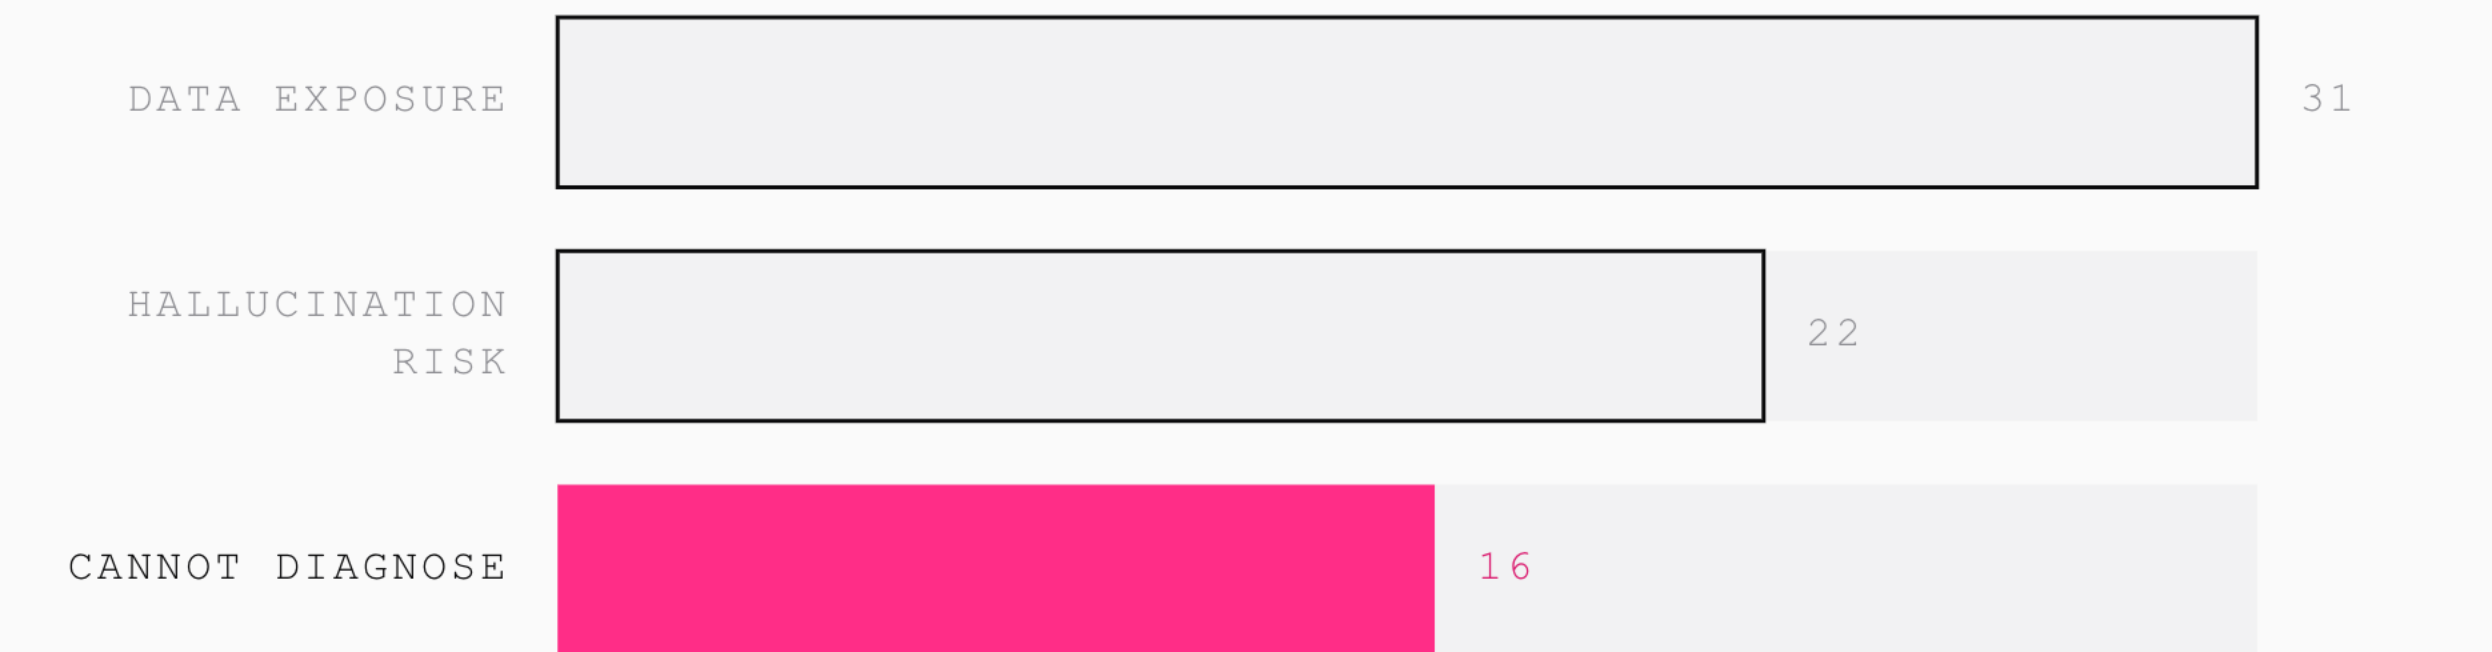

81% Rollback Rate Among Mature Governance Orgs

The best-monitored companies pull their agents more often. That's oversight working, not failing.

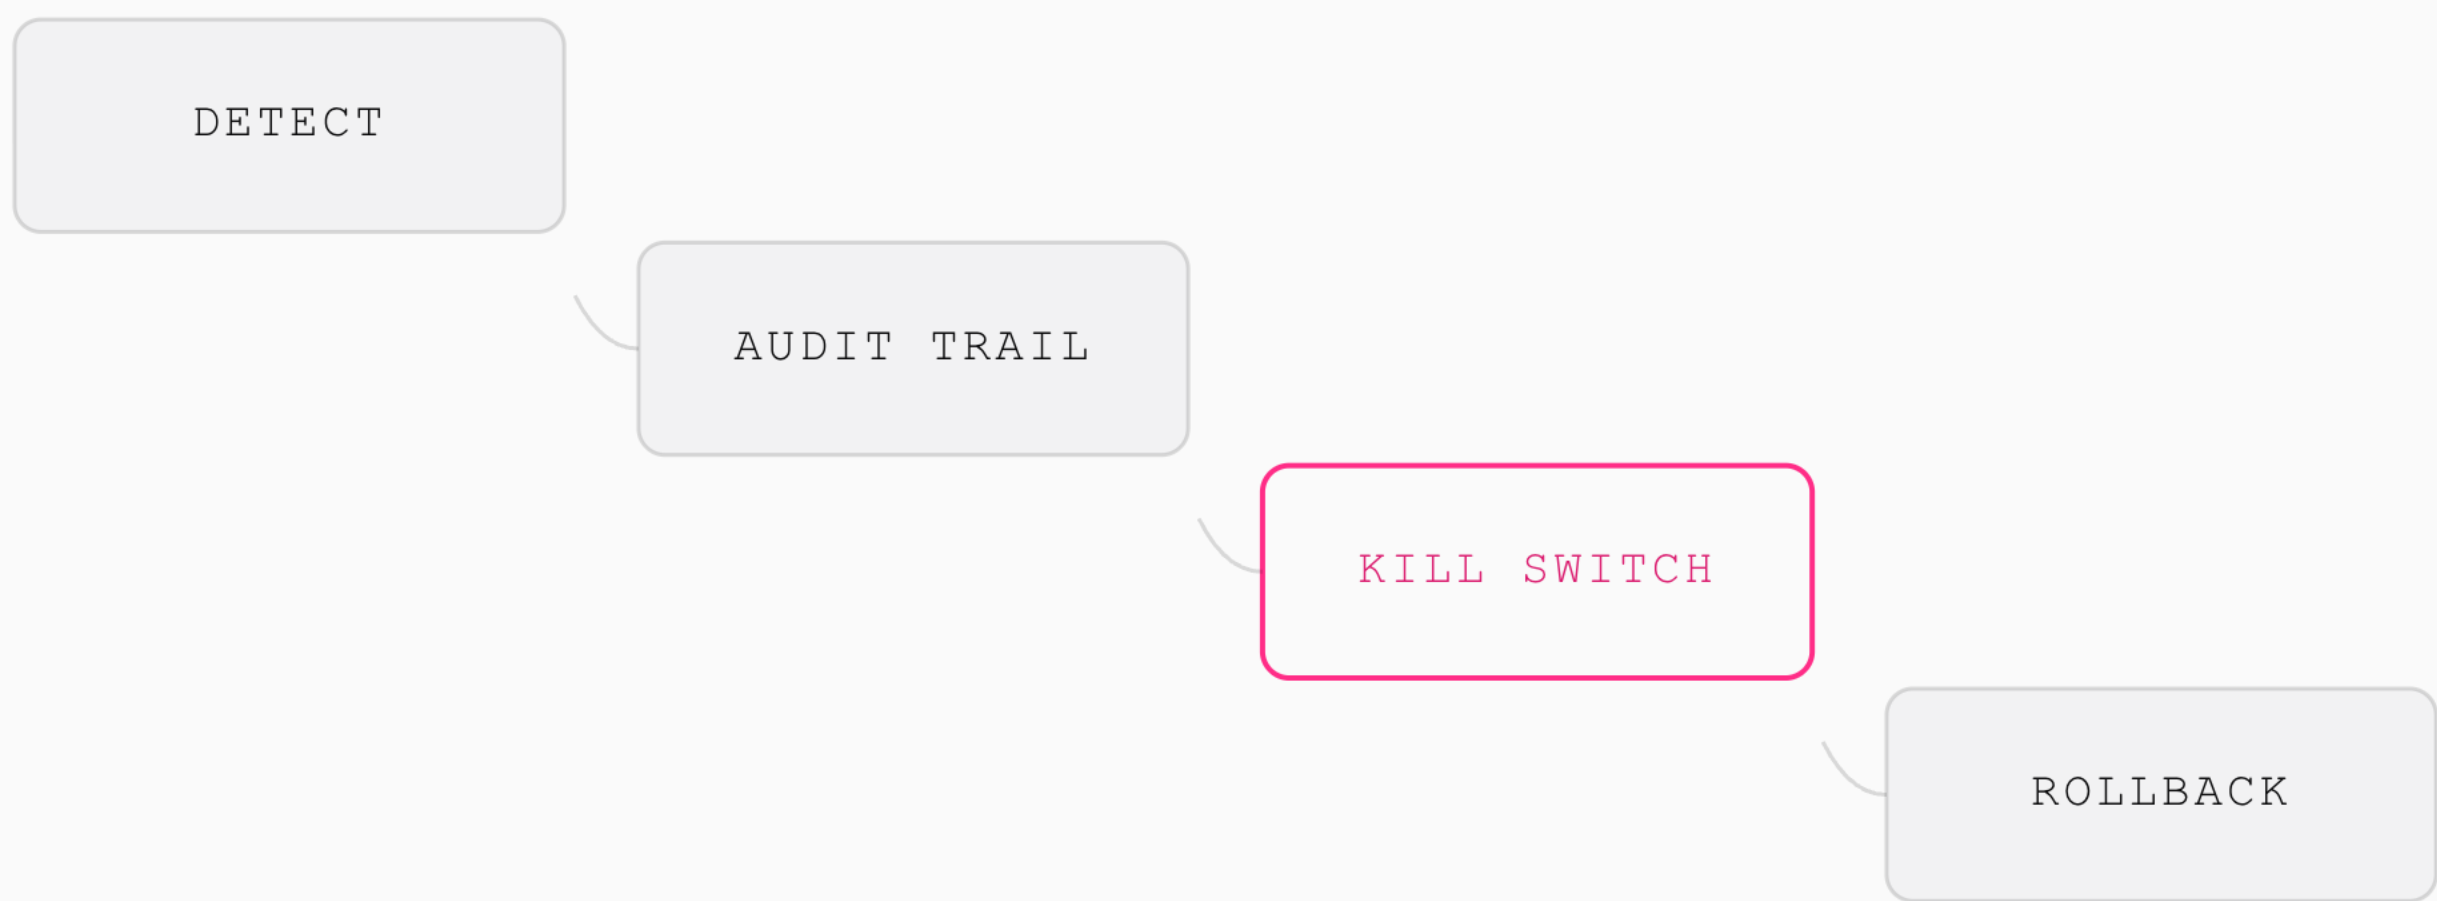

Where Rollbacks Actually Come From

Data exposure, hallucination risk, and the inability to diagnose failures drive most pulls.

Catch It, Log It, Pull It

The system that finds a problem fast looks worse on paper and works better in practice.

Build The Kill Switch Before You Need It

Audit trails and rollback paths belong in the first deployment, not
the second.
