

My Claude Code Sessions Talk to Each Other Now

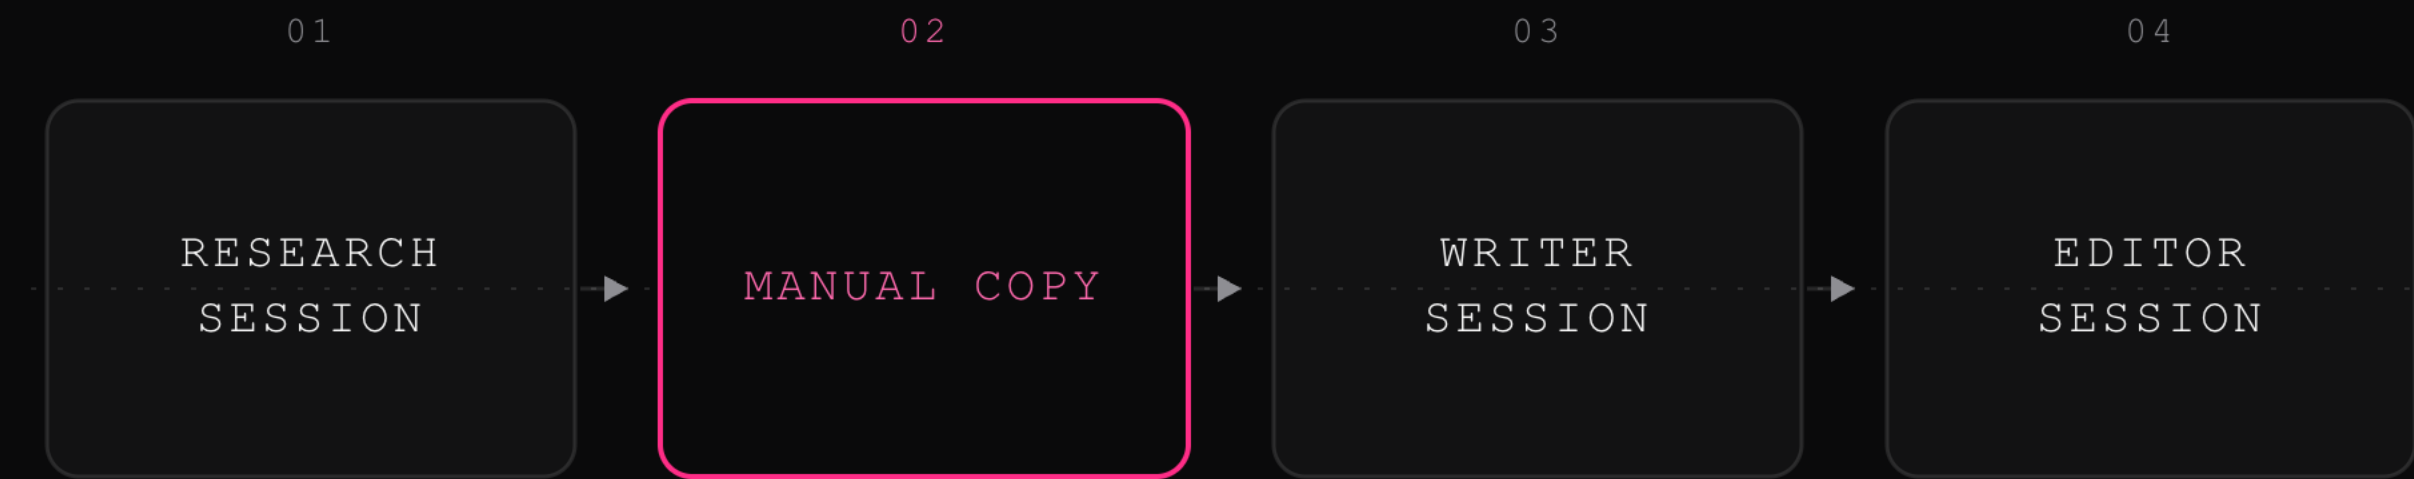

The week 32 update let separate sessions hand off findings directly. Here's what changed in my actual pipeline.

SWIPE 

The Old Way: I Was The Relay

Research session finishes. I copy its json output by hand into the writer agent's prompt. Six times a week, every week.

■ NO. 03 · WEEK 32 RELEASE

Cross-Session Messaging Shipped In Week 32

On macOS and Linux, one Claude Code session can now message another directly. No human relaying context between them.

\$ SESSION A: RESEARCH DONE

\$ MESSAGE SENT TO SESSION B

\$ SESSION B: RECEIVED, CONTINUING

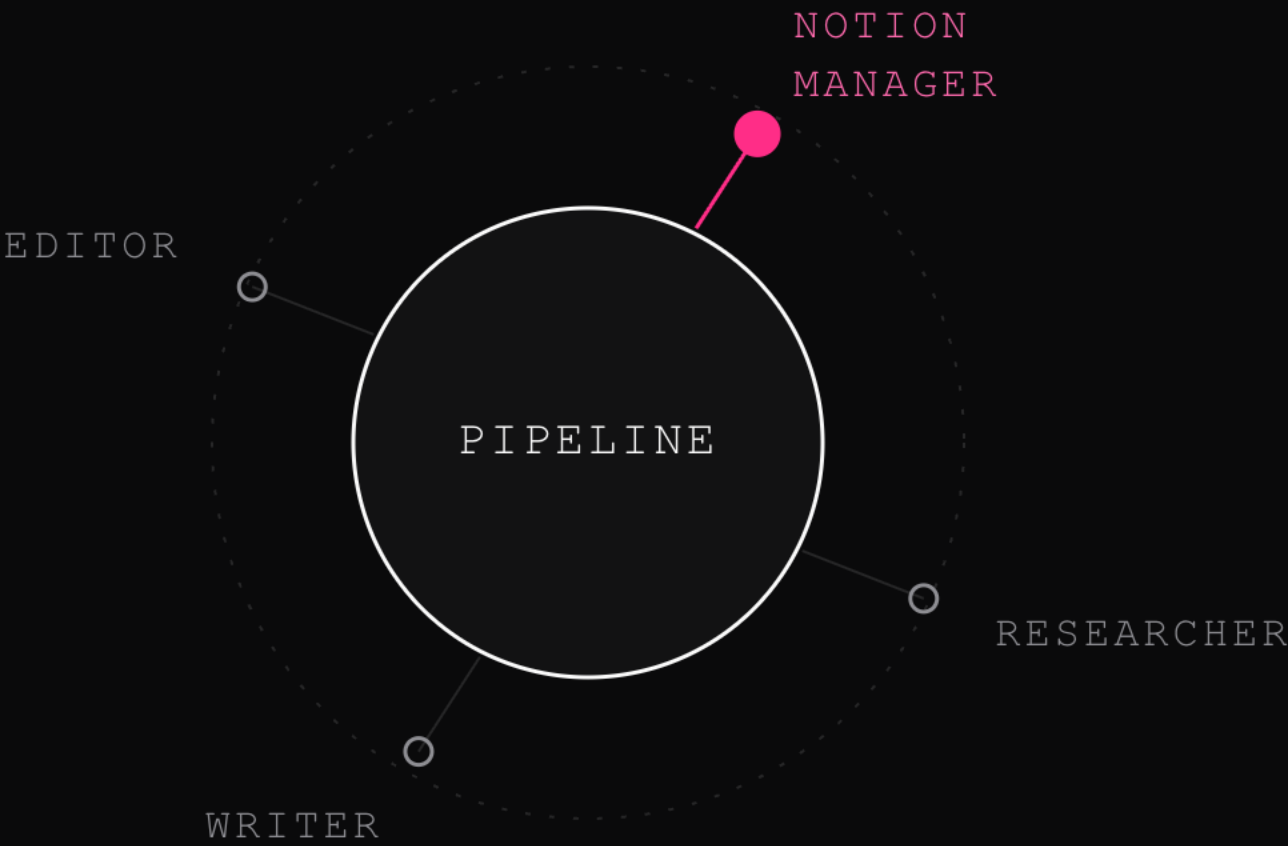

> NO HUMAN IN THE LOOP

■ NO. 04 · THE ACTUAL PIPELINE

Four Agents, One Pipeline, No Relay

Researcher, writer, editor, notion-manager. They hand off findings to each other now. I check the result at the end.

■ NO. 05 · REMOVING THE LOOP

Same Release, Same Direction

Auto mode became the default permission setting. Self-hosted cloud environments shipped in beta. Fewer places a human has to sit and wait.

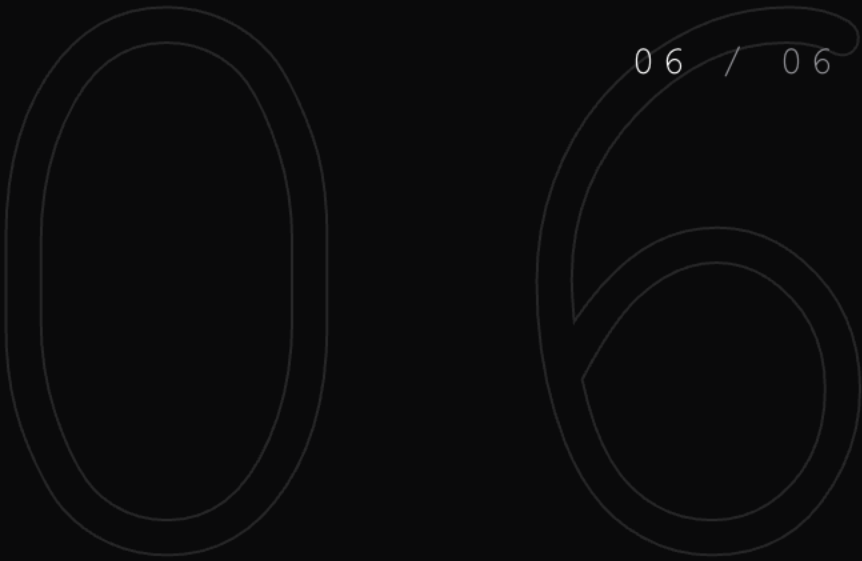

BEFORE

- MANUAL APPROVAL STEP EVERY
- HUMAN RELAYS CONTEXT

VS

NOW

- AUTO MODE DEFAULT
- SESSIONS MESSAGE DIRECTLY

Stop Being The Relay Between Agents

The infrastructure to remove yourself from the loop already shipped.
