

UNGLAMOROUS ROI

47 Days Saved. No Case Study Headline.

Musixmatch automated recurring engineering requests and saved 47 days in four months.

SWIPE

02 · the build timeline

27 Workflows, Four Months, 47 Days Saved

A week of build time on one workflow turned a recurring client request into something automatic.

FIG. 2 · VERYDIAN

03 · the actual number

A Manual Request Became 15 Seconds

The lyric-alphabet-switching request runs automatically now, with no engineer in the loop.

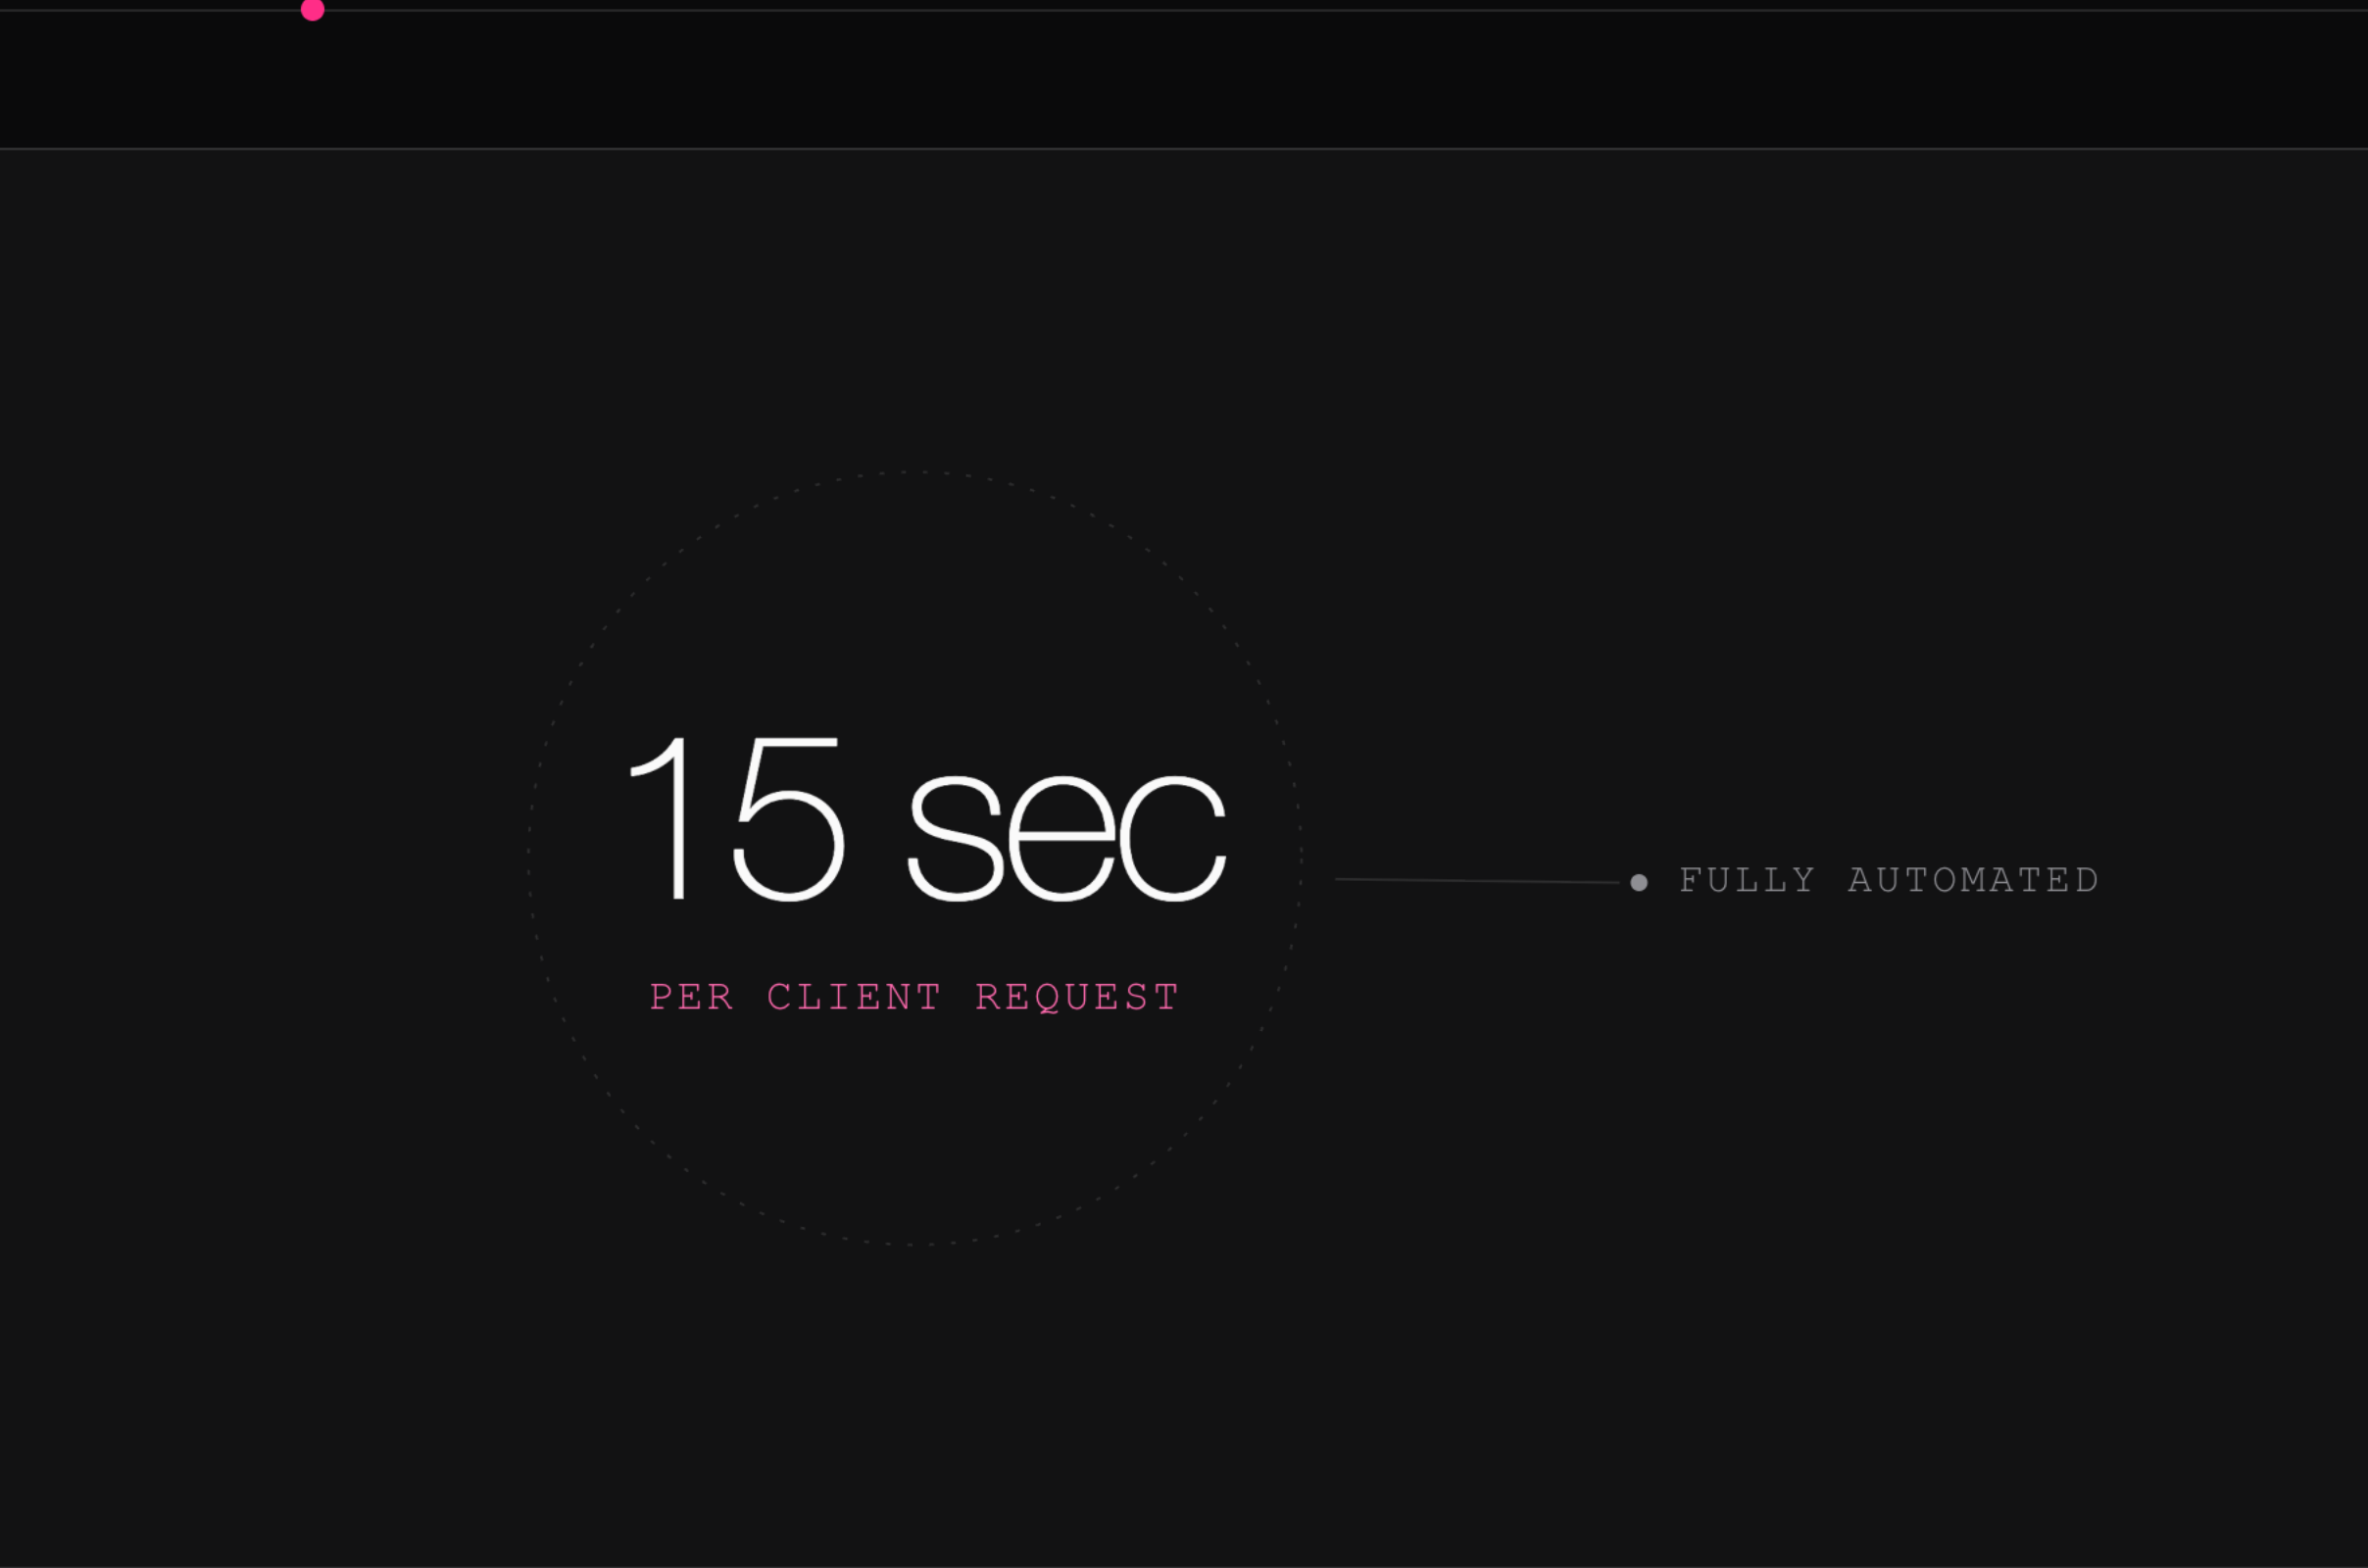

FIG. 3 · VERYDIAN

04 · my version

My Own Version Was A Validator Script

An hour of manual review every week became a script that runs in seconds.

FIG. 4 · VERYDIAN

05 · the checklist

What The Validator Actually Checks

Em dashes, banned phrases, word counts, missing visuals, and repeated diagram families.

☒	EM DASHES	PASS
☒	BANNED PHRASES	PASS
☒	WORD COUNTS	PASS
☒	MISSING VISUALS	PASS
☒	REPEATED FAMILIES	LIVE

Find The Task Eating Your Week

The biggest ROI is usually the boring task nobody put on a roadmap.

AUTOMATE THAT TASK
