

Your AI Outbound Isn't A Copy Problem

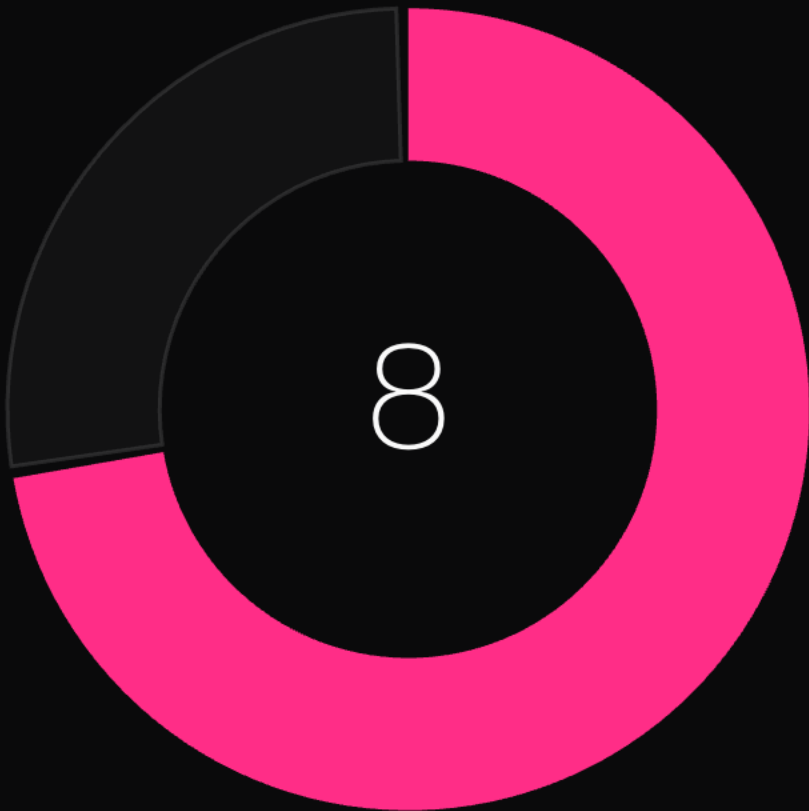

A hundred thousand emails, half AI, half human. The gap
wasn't in the writing.

SWIPE

■ NO. 02 · SPAM FLAG RATE

The Number Everyone Skips

Same bounce rate for both batches. The AI batch got flagged as spam far more often.

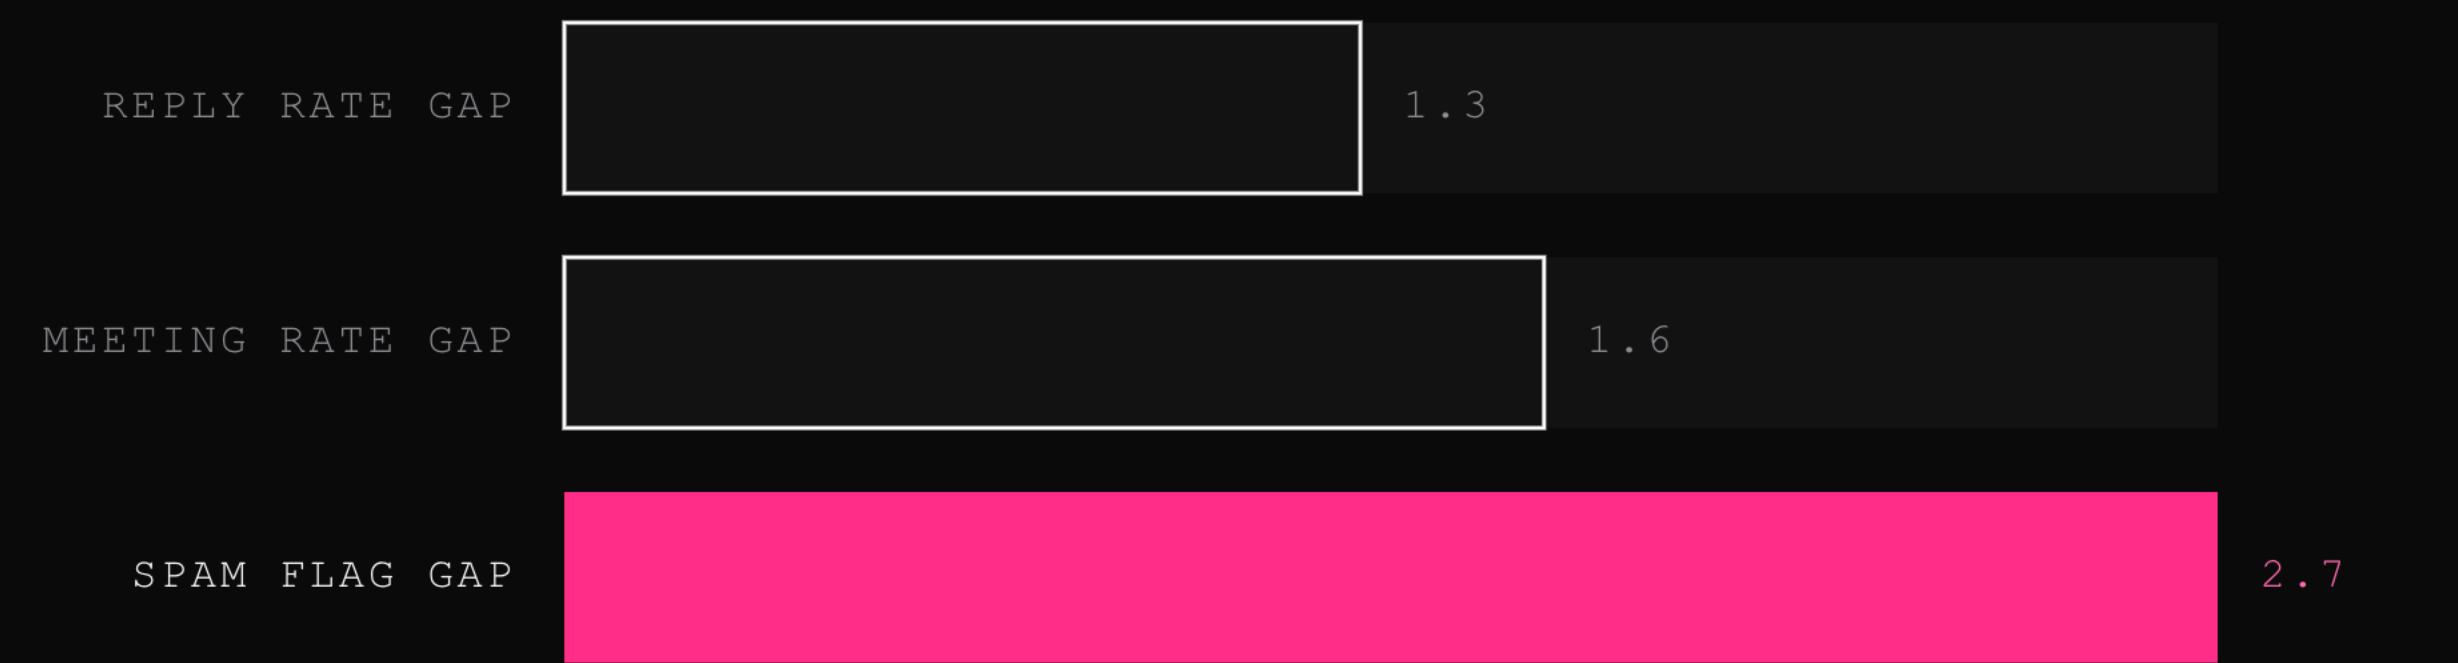

■ AI-GENERATED 8

□ HUMAN-WRITTEN 3

■ NO. 03 · THE RATIOS

Where The Real Gap Opens Up

Reply, meetings, and spam flags all favor human copy, but one gap is far bigger than the rest.

■ NO. 04 · CADENCE, NOT COPY

The Lever That Actually Moved Placement

Not the copy. Changing send cadence from daily to every three days lifted placement from 71% to 93%.

■ NO. 05 · THE REAL DIAGNOSTIC

Check This Before You Rewrite Anything

Everyone touches the copy first. Almost nobody checks the layer underneath it.
