

Claude Code will audit my old instructions

2.1.283 added /doctor prompt-audit. My CLAUDE.md files
and pipeline briefs were written for older models.

SWIPE 

What the audit covers

/doctor prompt-audit, also /checkup prompt-audit, checks four kinds of file for prompting patterns written for older models.

COMMANDS

■ NO. 03 · MY SETUP

Everything I'm pointing it at

A long global CLAUDE.md plus one brief per pipeline subagent. Most were written months ago for earlier models.

■ NO. 04 · KEEP OR CUT

The test for every rule

A rule stays only if I can name the failure it prevents. Everything else is a candidate to cut.

☒	NAME THE FAILURE	PASS
☒	REPRODUCE IT WITHOUT THE RULE	PASS
☒	KEEP IF IT RETURNS	PASS
☒	CUT IF IT DOESN'T	LIVE

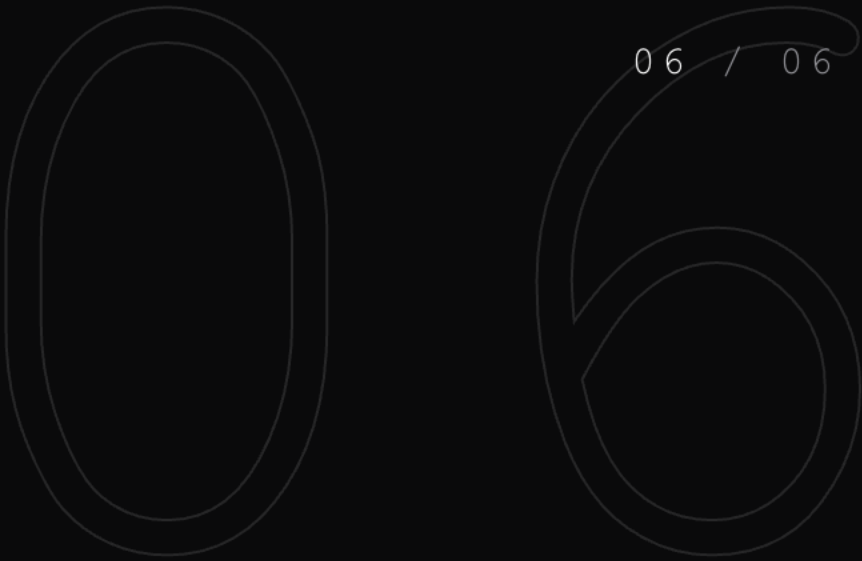

■ NO. 05 · THE PLAN

The plan, in order

Run the audit, read every flag, test each rule against a real run, then keep or cut. Results come after I run it.

Audit your own instructions.

Run `/doctor prompt-audit` on the repo you trust most.
