

No new model. That was the message.

What Anthropic actually shipped at Code with Claude
2026

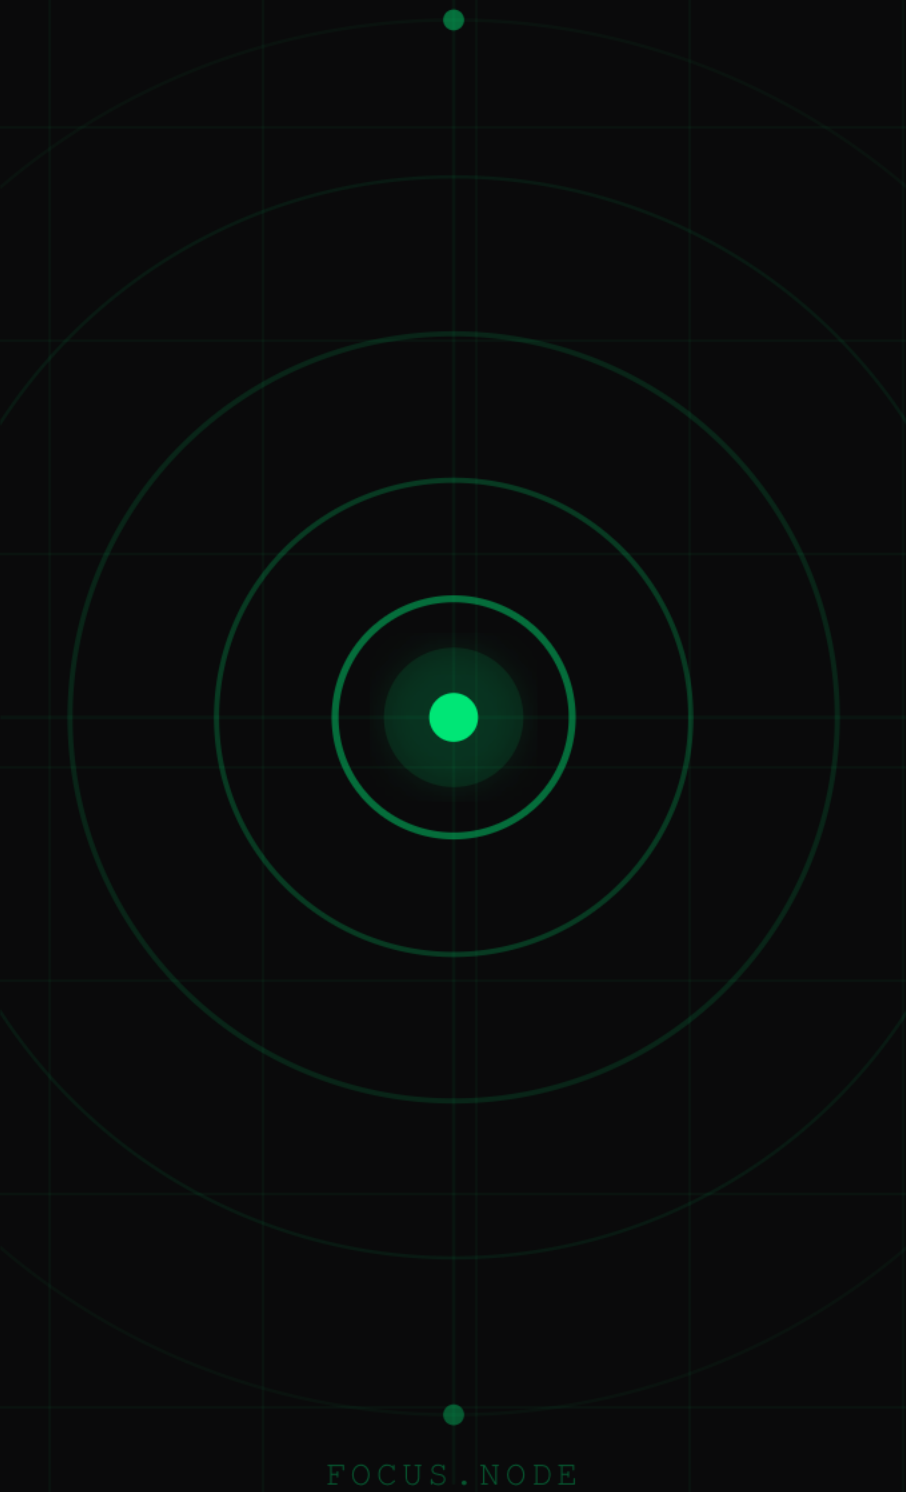

SYS.SIGNAL

02 ·

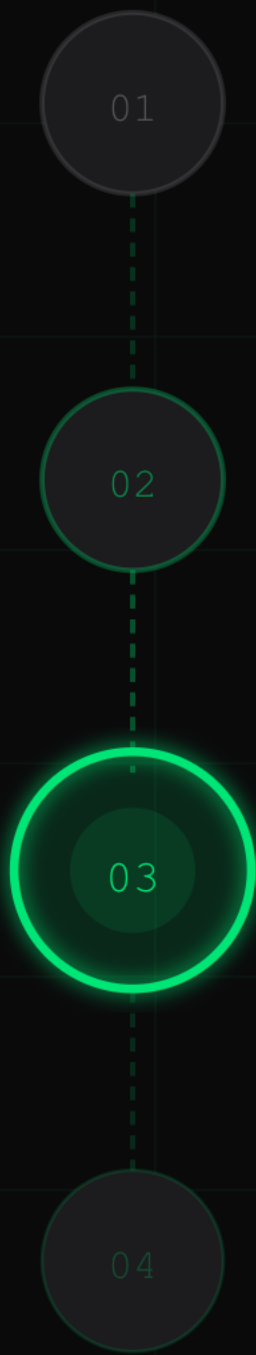

Every lab ships models. Anthropic shipped infrastructure.

Orchestration, session memory, outcome-based execution. Not a benchmark play. A production play.

The model isn't what breaks in production.

Context that doesn't persist. Workflows that don't recover. Agents that need humans to coordinate. That's what breaks.

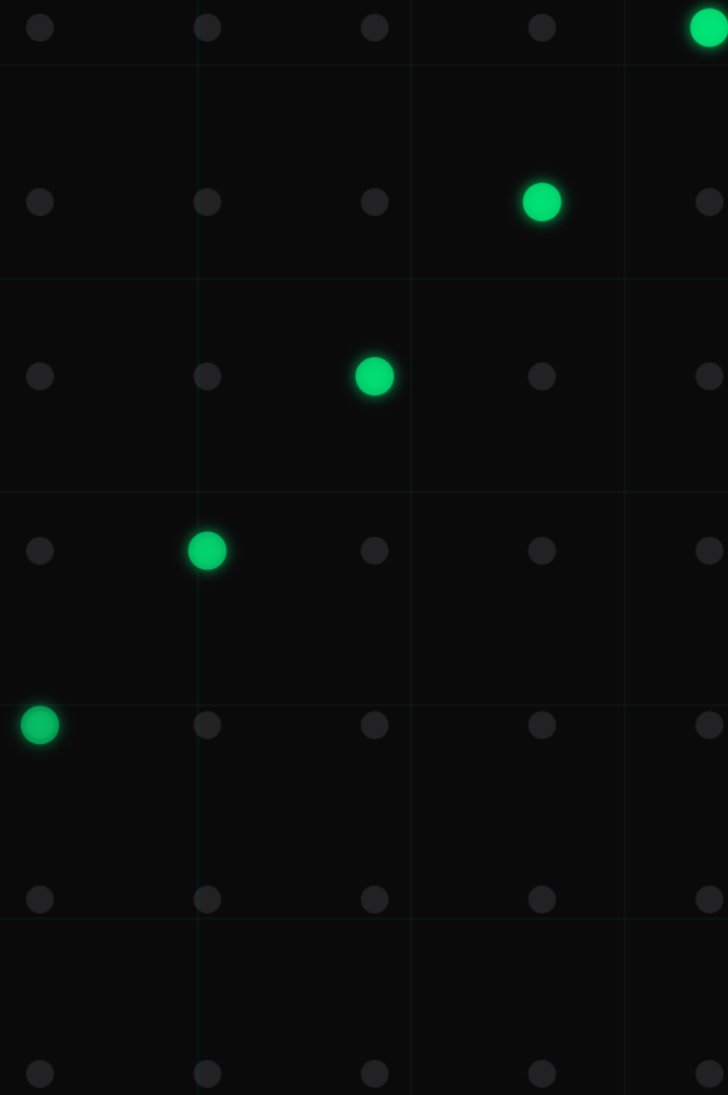

SEQUENCE

04 ·

Anthropic diagnosed the real bottleneck.

Not capability. Infrastructure. They built for what's actually stopping teams from shipping reliable systems.

05 ·

The capability ceiling isn't the problem.

The gap between demo and production is an engineering problem. Orchestration, recovery, coordination. Not benchmarks.
