

ANTHROPIC 2026 DATA

The ROI Gap Isn't Adoption. It's Completion.

Anthropic's own usage data draws the real line between AI that helps and AI that finishes.

UNROLL THE DRAWING

SECTION 02 · THE REAL SPLIT

Chatbot Versus Agent Isn't About Sophistication

A chatbot handles one step and hands the rest back. An agent finishes the job without a person closing the gap.

FIG. 2

CHATBOT

— DRAFTS ONE REPLY

— HANDS BACK TO HUMAN

VS

AGENT

● RESEARCHES AND DELIVERS

● FINISHES WITHOUT A HUMAN

SECTION 03 · ANTHROPIC, 2026

80% Report ROI. The Split Is Underneath.

Anthropic's 2026 State of AI Agents Report puts 80% of organizations at measurable ROI, with the shift running from single-step automation toward multi-stage workflows.

FIG. 3

SECTION 04 · THE LEAK POINT

Most Teams Automate the Easy Middle Only

Research, draft, check, deliver. Skip any stage and a human closes the gap, which is where the ROI leaks out.

FIG. 4

SCALE · PRODUCTION

VERYDIAN

SECTION 05 · THE DEFINITION

What 'Finished' Actually Requires

Completes the full workflow with no human closing the gap, and checks itself against a rule set before it ends the process.

FIG. 5

☒	COMPLETES THE FULL WORKFLOW	PASS
☒	NO HUMAN CLOSES THE GAP	PASS
☒	CHECKS AGAINST A RULE SET	PASS
☒	ENDS THE PROCESS, NOT ADVANCES IT	LIVE

Stop Measuring Adoption. Measure Completion.

Build the workflow that finishes, not the assistant that helps.
