Verydian.

01

91% expect quotas to rise. 8% see AI lift attainment.

BCG surveyed 398 revenue leaders. Its own executive says the plans assume a payoff AI has not yet delivered.

SWIPE

NO. 02 · THE GAP

91% expect quotas up. 8% see attainment up.

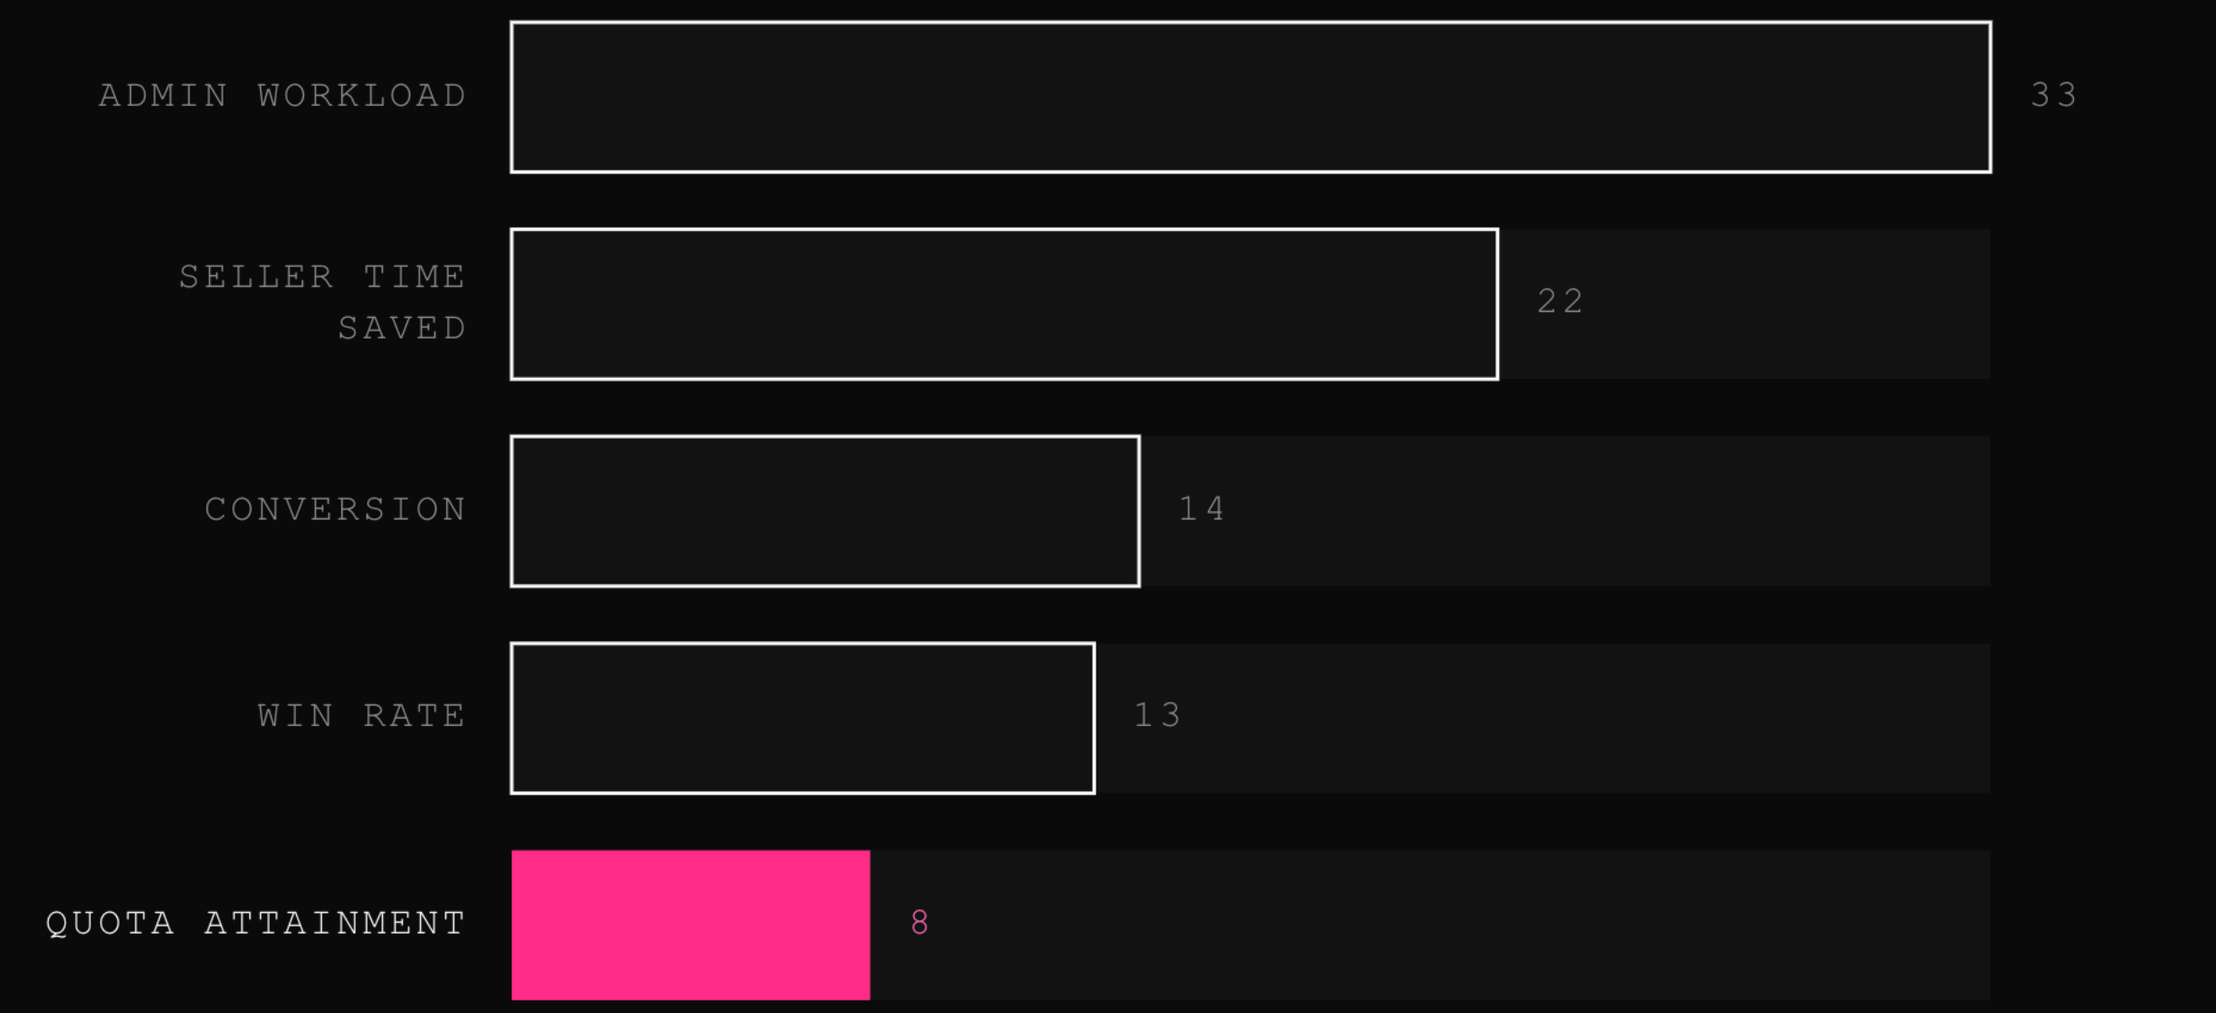

BCG: 91% expect per-seller quotas or productivity requirements to rise. Only 8% see higher quota attainment from AI. Expectations for headcount and budget are rising too.

NO. 03 · REPORTED IMPACT

What leaders say AI improved

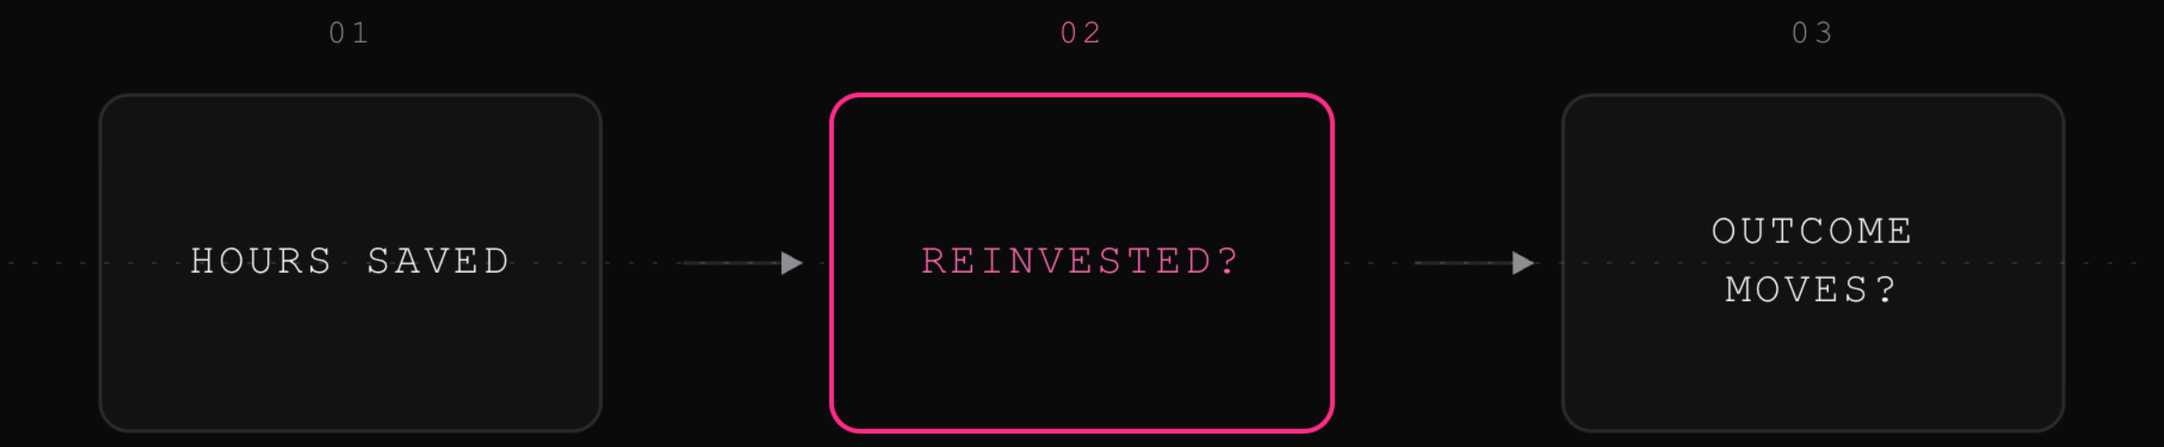

Shares of leaders citing each impact, per BCG. Not revenue outcomes. The time-based answers lead and the commercial ones trail.

NO. 04 · REINVESTMENT

Hours saved only count if they land somewhere

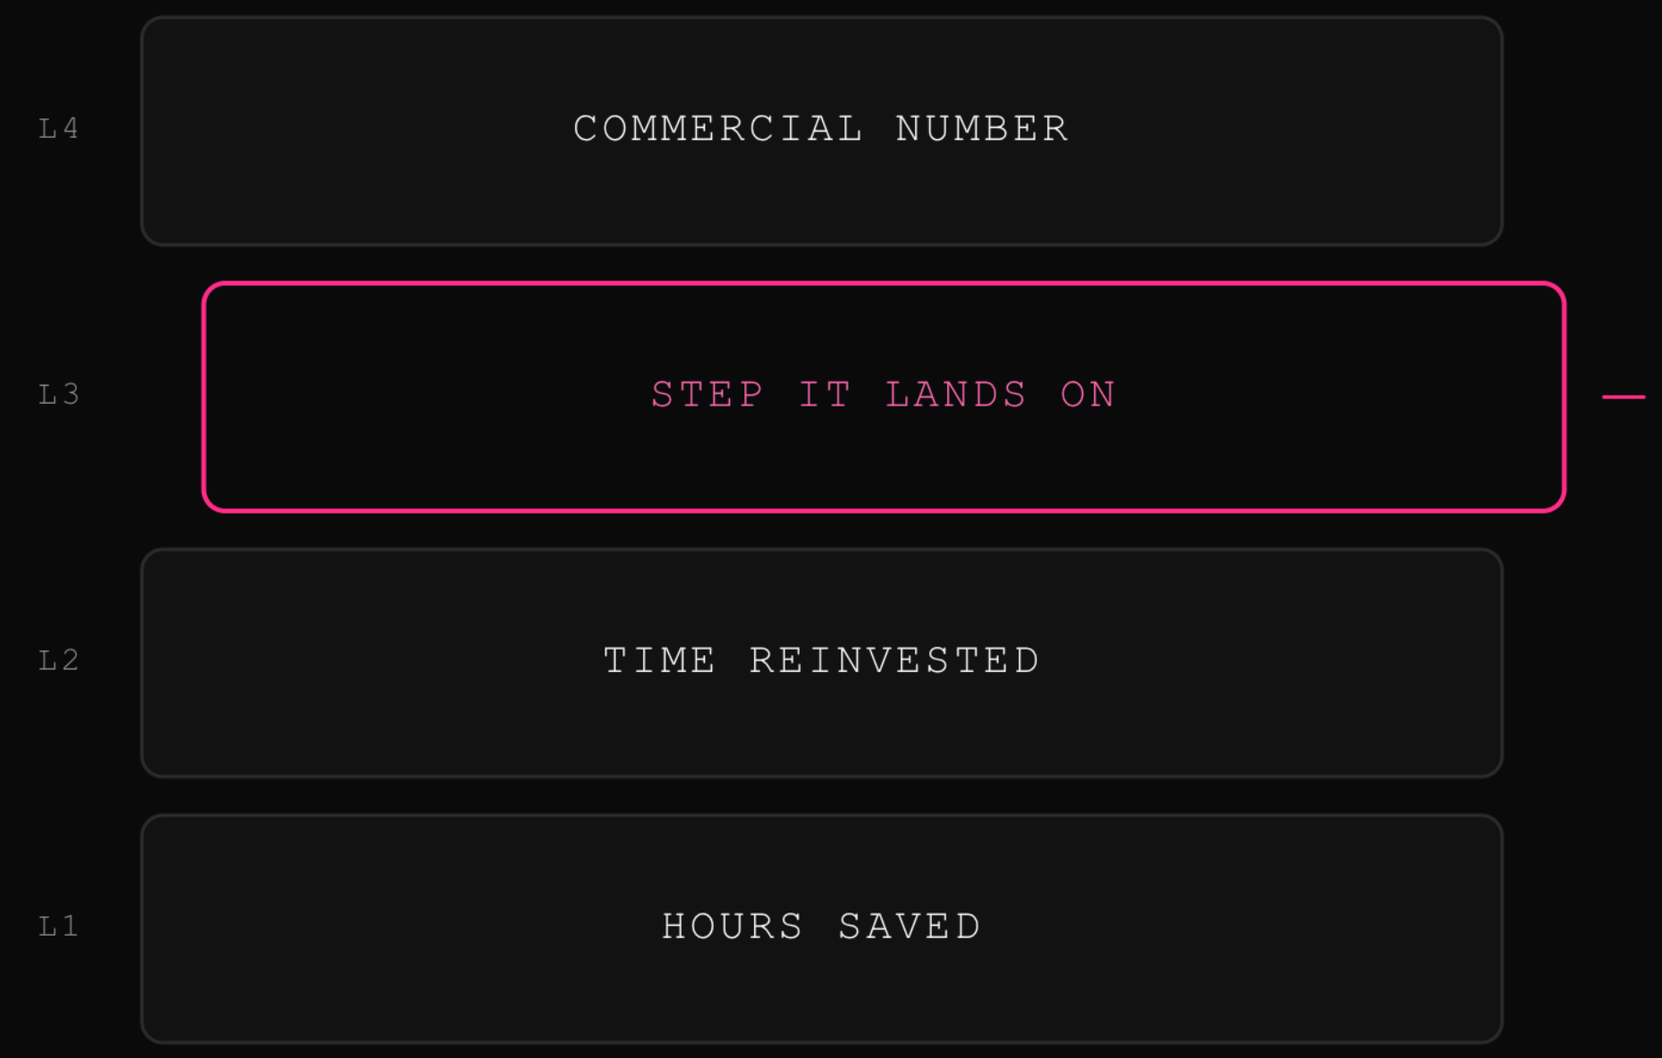

Gartner's survey, released May 2026: AI saves sellers 4.8 hours a week on average, and 72% of sales organizations report low reinvestment of that time.

NO. 05 · METRIC LADDER

Instrument the step the saved hour lands on

My rule, not BCG's: put a number on the step downstream of the saved hour before you add agents. Hours saved sits at the bottom of the ladder.

Name the step your saved hour lands on

Put one commercial number on it before the next agent ships.

PICK ONE STEP
