

GTM Systems Showed Me a Bigger Problem

Two years of client work. One pattern everywhere.

Cloud 24: Pipeline Systems for SaaS Founders

Outreach infrastructure, lead research, sequences. Founders focused on product. Revenue moved. The thesis worked.

MOMENTUM

03

But the Pipeline Exposed What Was Underneath

Follow-up depended on memory. CRM data went stale. Reporting took half a day. Ops became glue between tools that didn't connect.

DECISION.POINT

04

The Pattern Wasn't GTM-Specific. It Was Everywhere.

Finance. Support. HR. Every function with repeatable processes and human memory dependencies had the same structure. Same operational drag.

05

Verydian Is the Extension, Not a Pivot

GTM was the first use case. Autonomous infrastructure for every repeatable business process is the bigger thesis. Same diagnosis, wider scope.

ECOSYSTEM

EXEC.BRIEF / AI INFRASTRUCTURE

Follow me — I build in public

Building Verydian in Public. Follow Along.
