WHERE MOST PROJECTS DIE

02 ·

The Data That Should Slow You Down

80% of companies that cut headcount for AI saw no return improvement. Most 'scale without headcount' stories skip this number entirely.

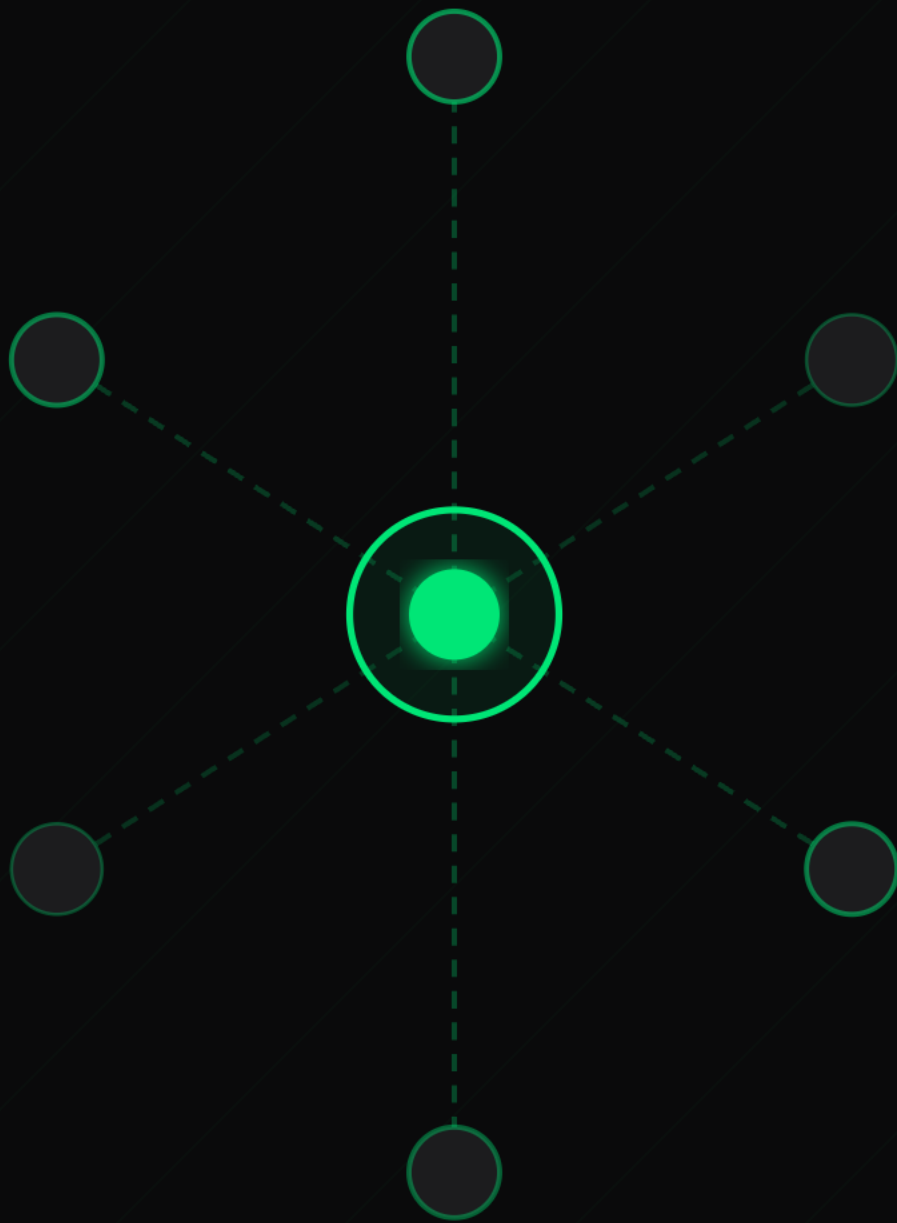

SYS.METRIC

03

What the 80% Did: Cut First

Removed ops layers, then tried to backfill with AI tools. The tools couldn't absorb that load without infrastructure to support them. The result was operational chaos.

04 ·

What the 20% Did: Build First

Rebuilt infrastructure: automated monitoring,
structured handoffs, agentic workflows. Then let
attrition reduce headcount over 12-18 months.
Nobody got fired.

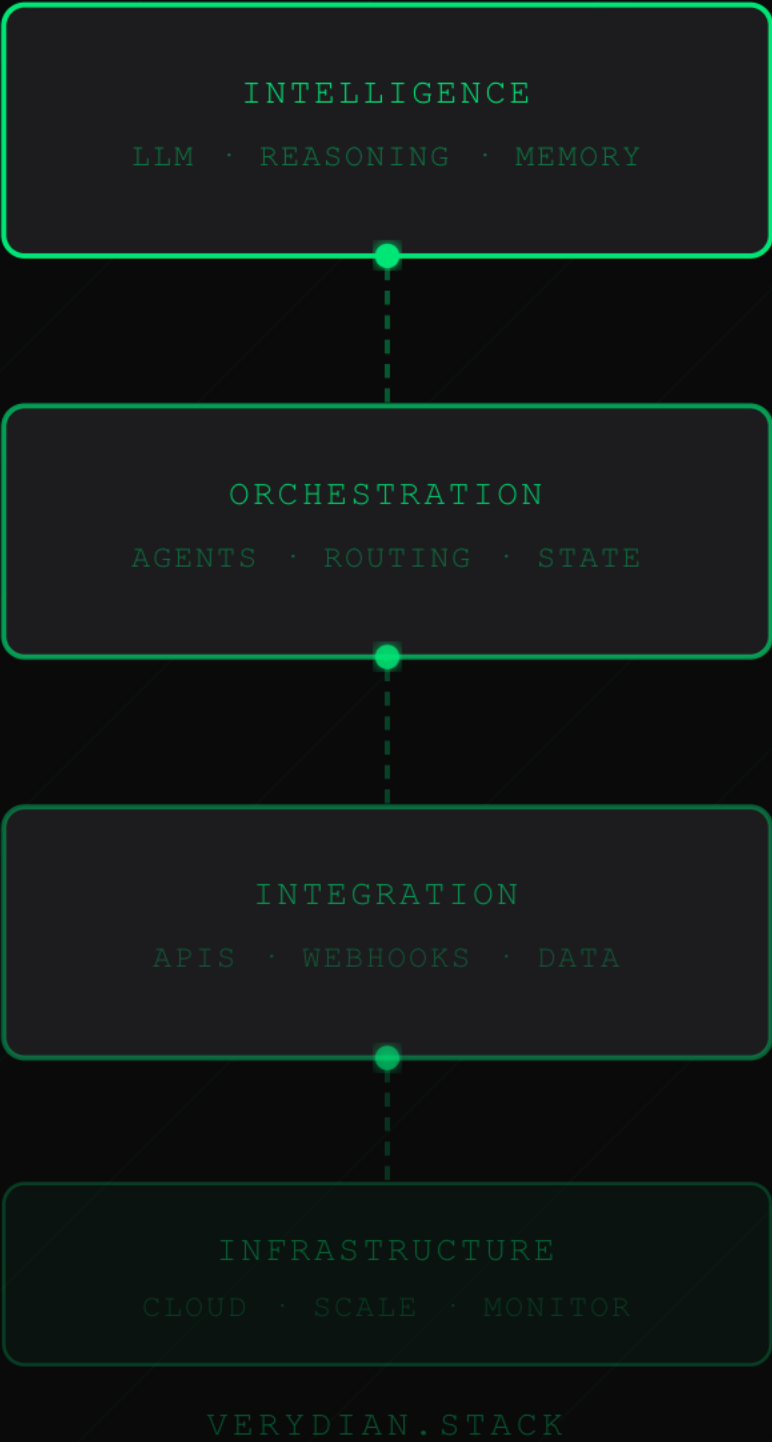

PIPELINE

05 ·

Ops Teams Become Glue Between Broken Tools

That's not a people problem. It's an infrastructure problem. Fix the infrastructure and the ops burden shrinks. The team that remains does higher-value work.
