WEEK 34 SHIP

THE EXCEPTION

03 / 05

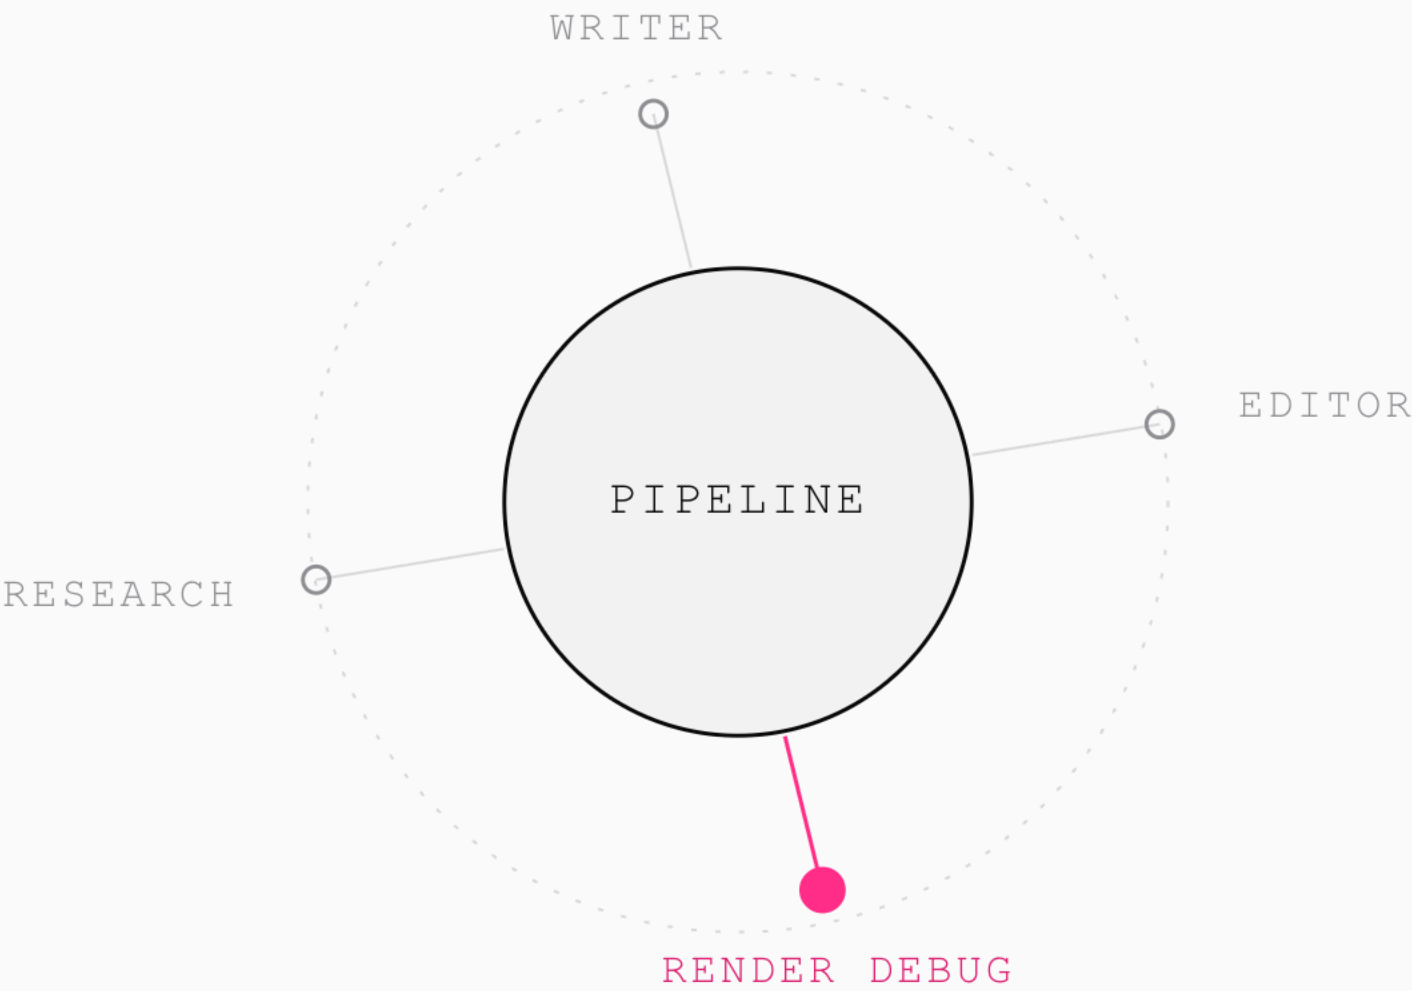

It Helped Everywhere Except One Stage

Research, writing, and editing got faster to review. Debugging a broken render is the one place I wanted the reasoning trail back.

One Pipeline, One Setting Flipped Back

Concise mode runs across every agent in the pipeline except render review, where I need to see why a slide broke, not just that it did.

Default Settings Aren't One-Size-Fits-All

Test every new default against your actual workflow before trusting it everywhere.
