

TOOL STACK

Claude Code and Codex Aren't Competing

They split into two different jobs. Buying one to do both is where the output goes missing.

OPEN THE LEDGER

ENTRY 02 · HEAD TO HEAD

The Reddit Verdict From 500 Developers

Claude Code wins blind quality tests 67 percent of the time. Codex wins on daily usability for execution, browser tasks, and computer use.

RECORDED SYSTEM

VERYDIAN

CLAUDE CODE

— 67% QUALITY WIN RATE

— BEST FOR PLANNING

— HITS LIMITS FASTER

VS

CODEX

• HIGHER DAILY USABILITY

• BEST FOR EXECUTION

• RUNS LONGER PER SESSION

ENTRY 03 · DIVISION OF LABOR

How the Two Actually Split the Build

Claude Code plans the architecture and makes the judgment calls.
Codex executes the plan and runs the grind work without stopping.

ENTRY 04 · CODEX V0.116

What Codex Shipped That Changed the Math

Custom CA certificates for corporate proxies now work out of the box.
A hooks system intercepts policy before code runs.

ENTRY 05 · PLANNING VS EXECUTION

The Real Split Isn't Quality. It's Job Type

Planning work and execution work are not the same job wearing two different masks. They need different tools, and pretending otherwise costs output.

RECORDED SYSTEM

VERYDIAN

□ PLANNING WORK 45

■ EXECUTION WORK 55

Stop Picking One. Run Both On Purpose

The teams shipping fastest are not loyal to a tool.
