CENSUS DATA

AI-related job cuts show up in 2% of firms

The Census Bureau counted. Among firms using AI, most stop at three functions or fewer, and Sales and Marketing is the most common.

ENTER

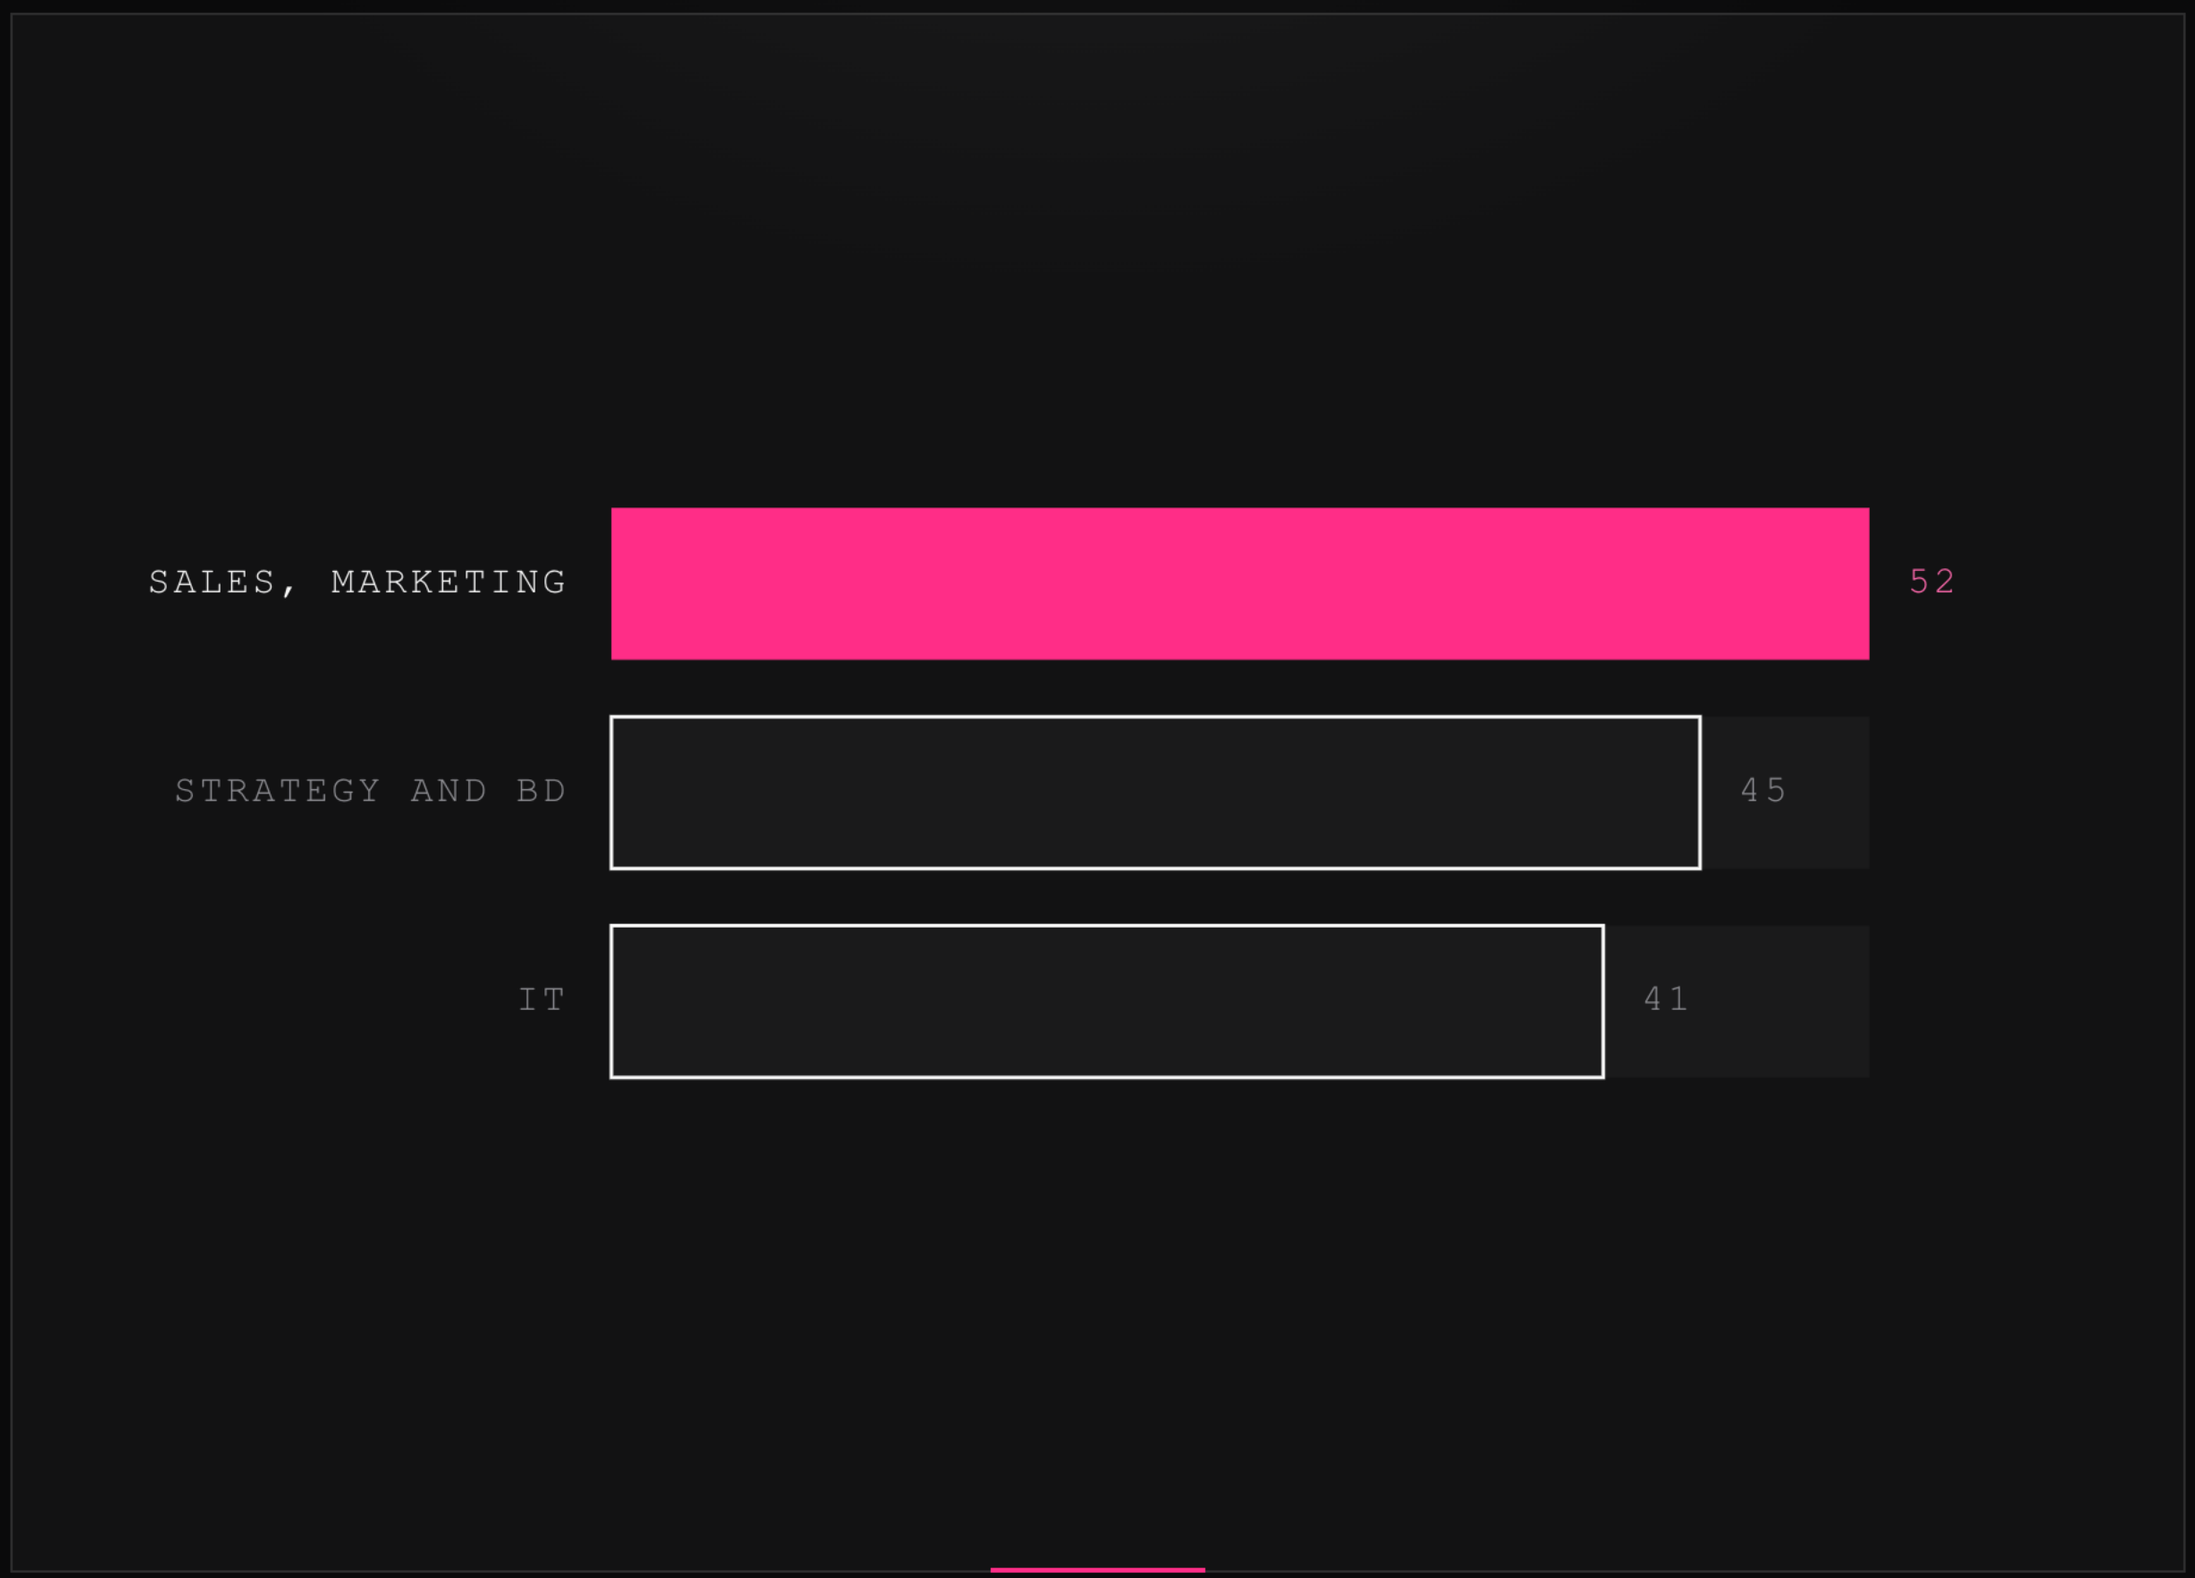

EXHIBIT 02 · MOST COMMON

Adopting firms use AI most in Sales and Marketing

Among adopting firms, Census lists Sales and Marketing most commonly at 52%, then Strategy and Business Development at 45% and IT at 41%. Working paper, Nov 2025 to Jan 2026.

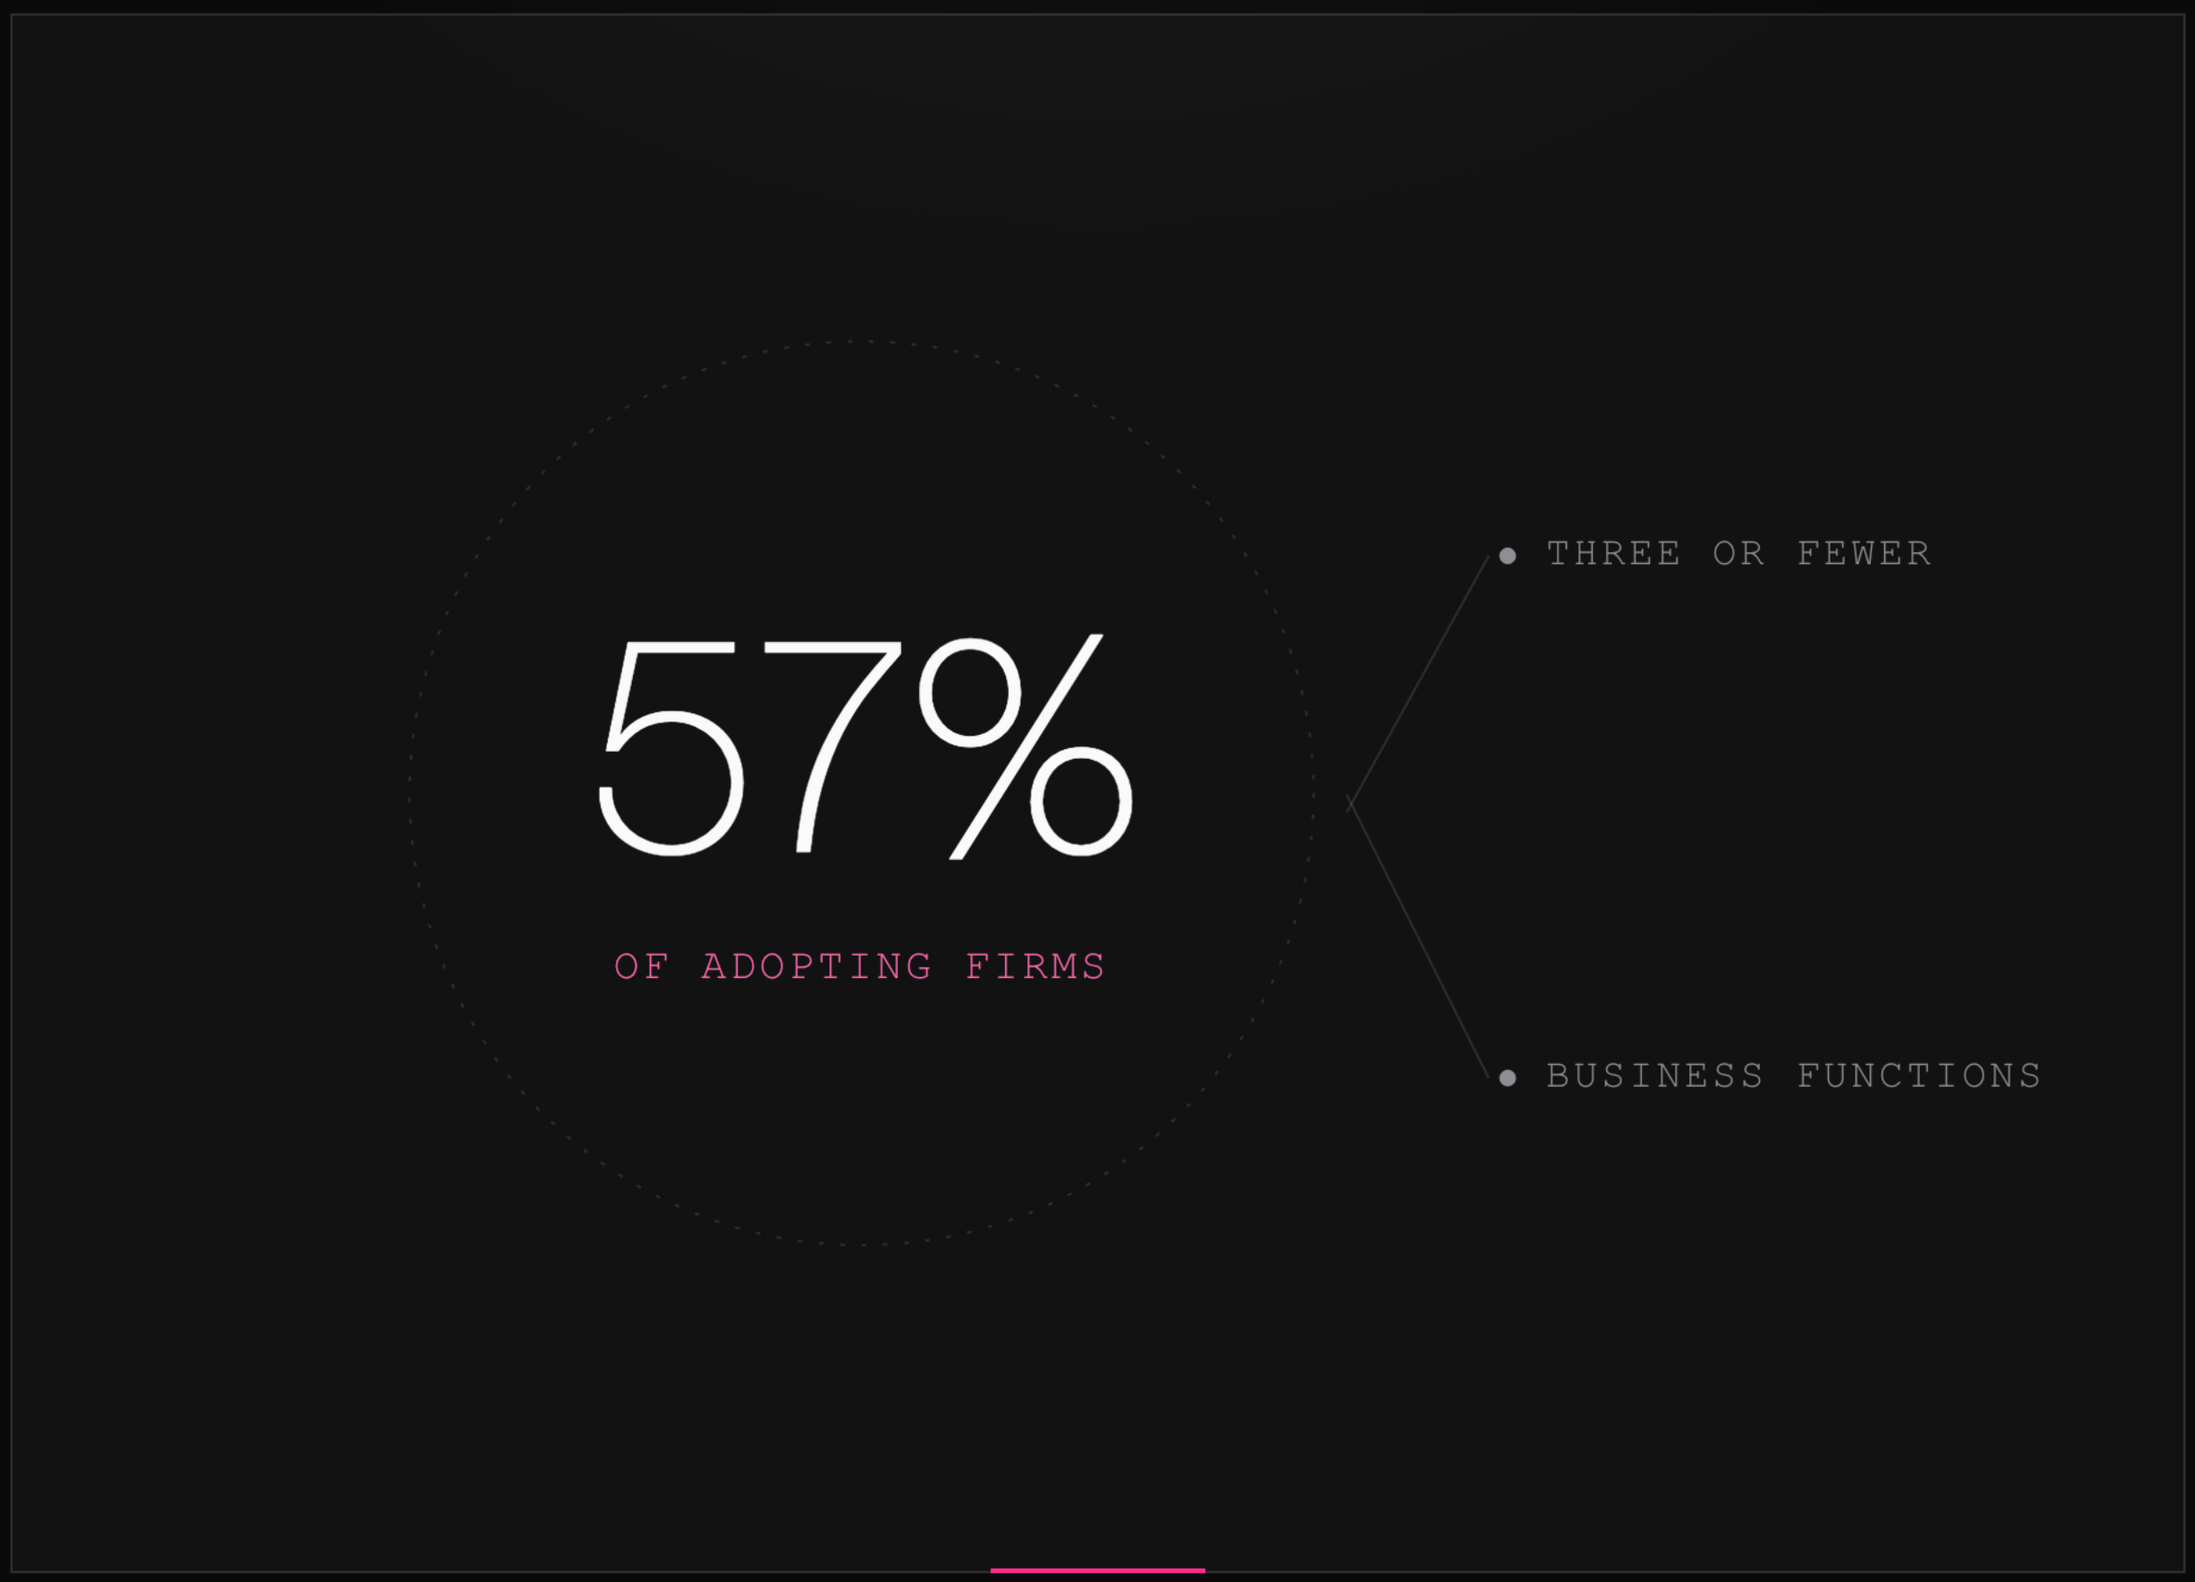

EXHIBIT 03 · NARROW USE

Most adopters stop at three functions or fewer

57% of users integrate AI in three or fewer business functions. Overall, 18% of firms used AI in a business function in the Nov 2025 to Jan 2026 reference period.

AUGMENT TASKS

— 66% OF USERS

VS

JOB DECREASES

• 2% OF FIRMS

• EXHIBIT 04 · RECONCILING THE TWO

Most users augment. Job cuts are rare.

66% of users rely on AI solely to augment tasks. AI-related employment decreases occur in only 2% of firms. Scaling execution is not cutting people.

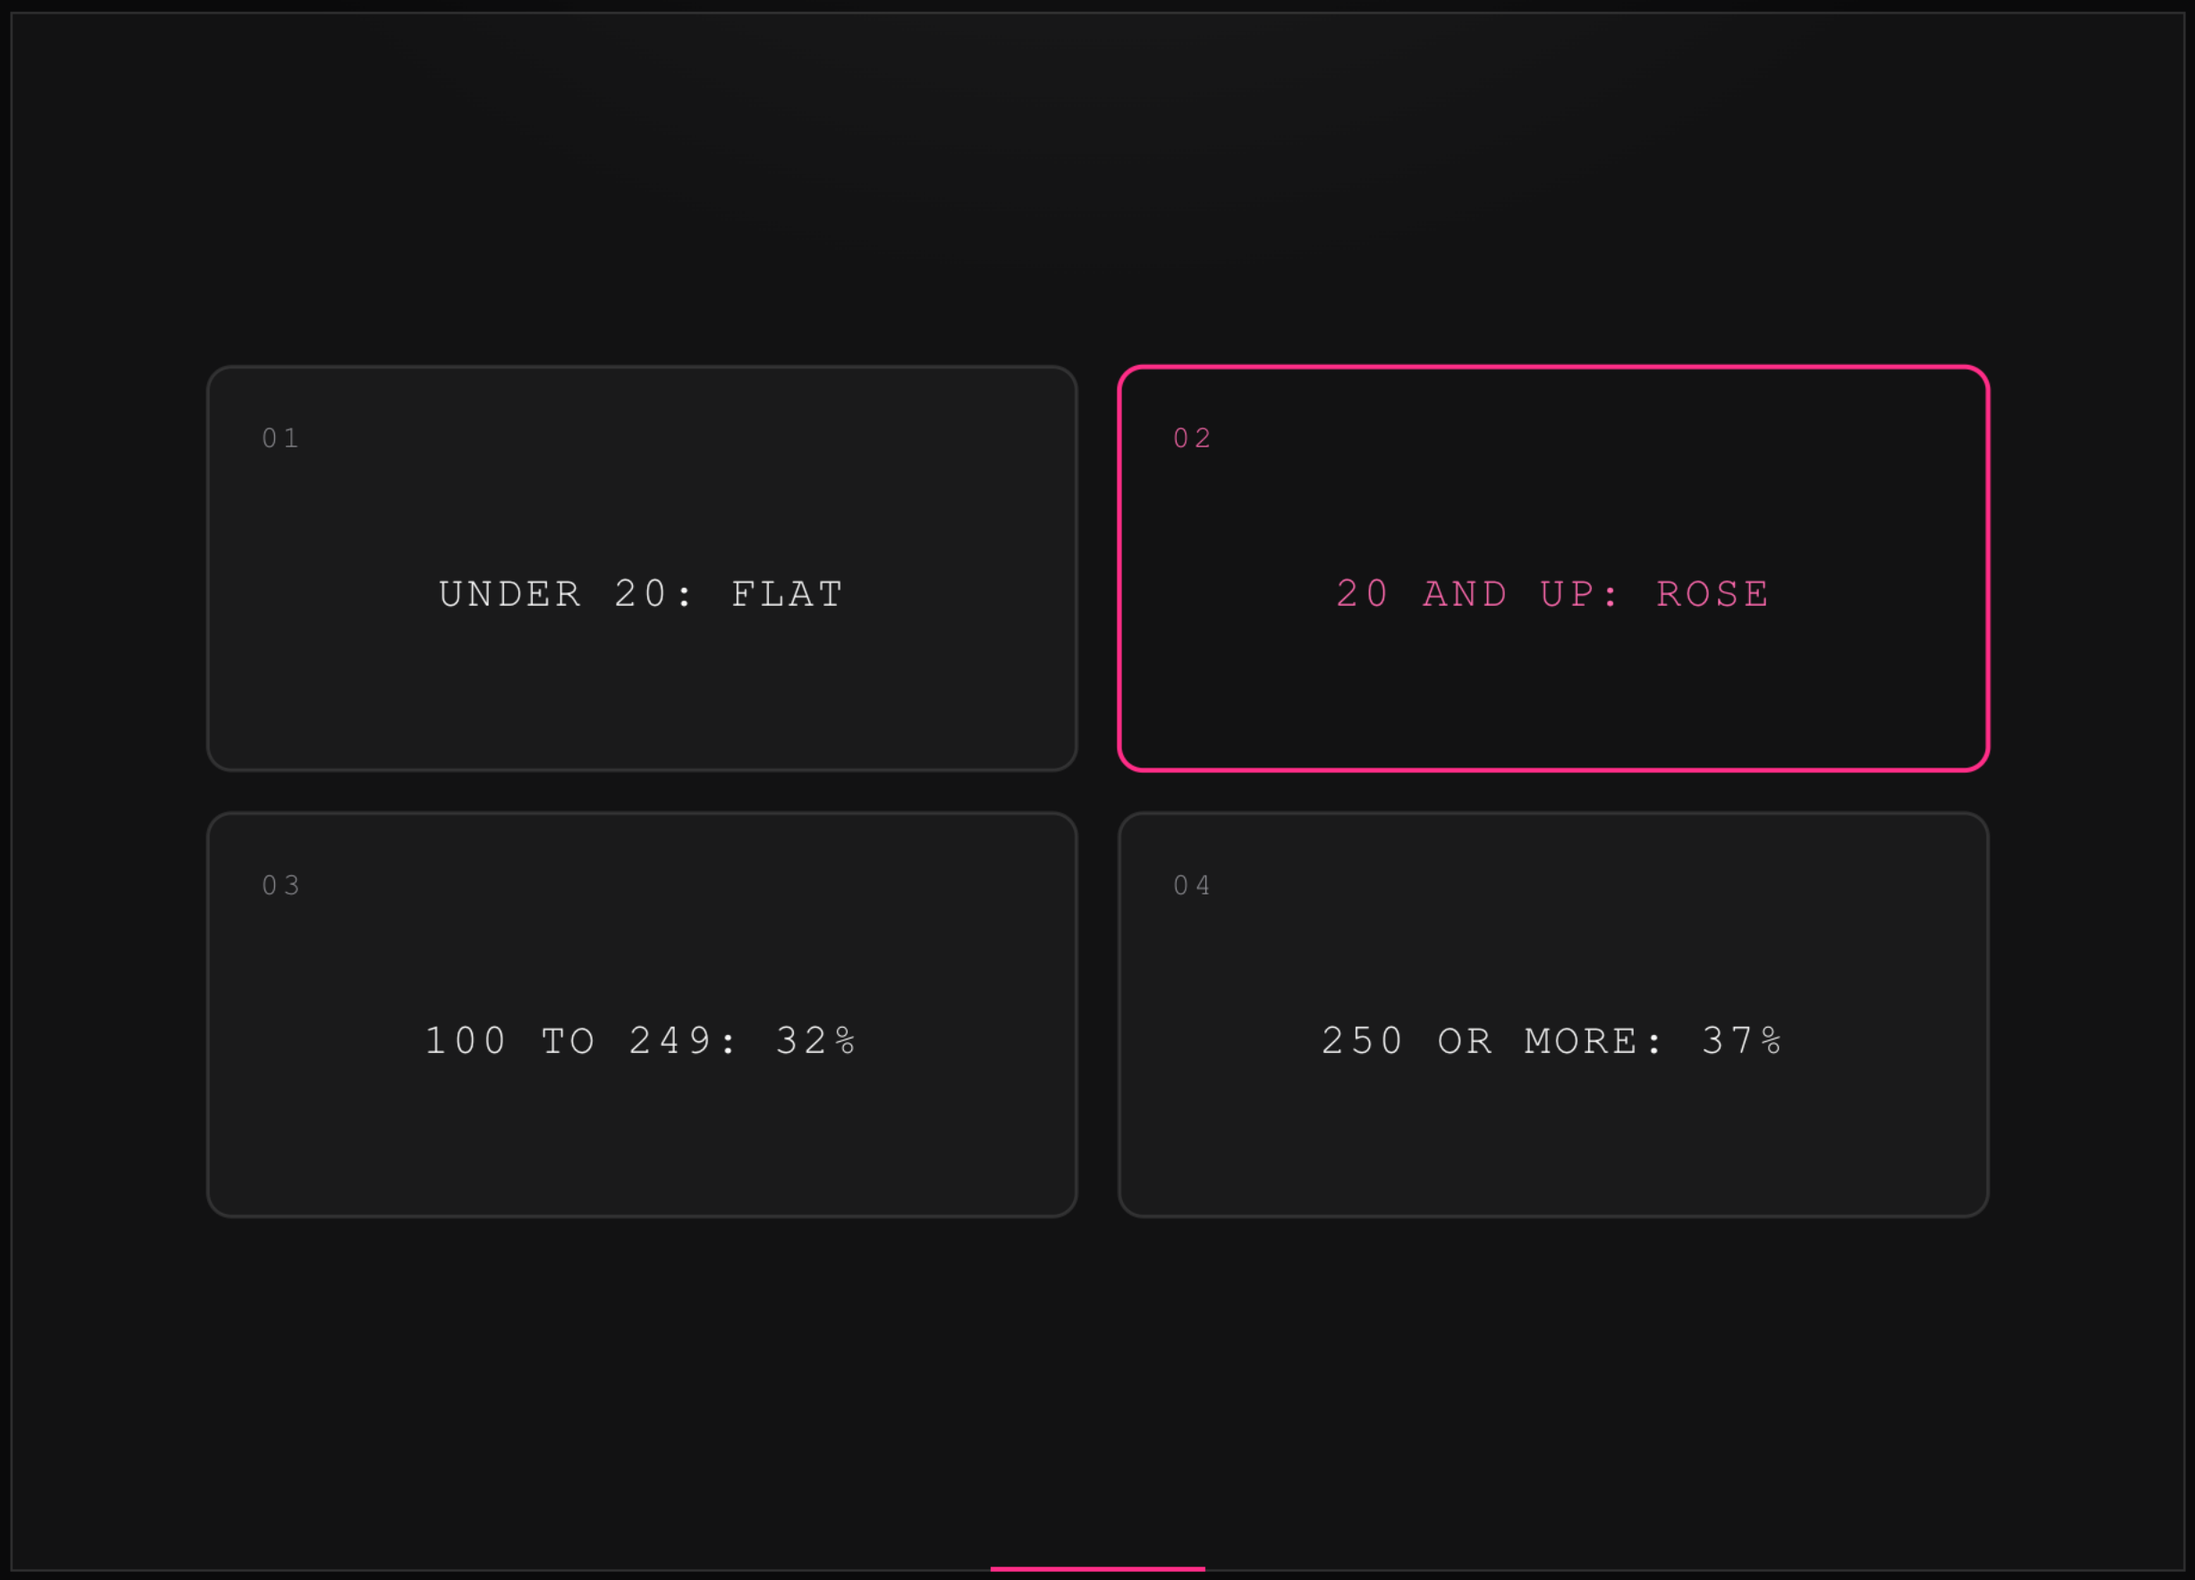

EXHIBIT 05 · THE 20 LINE

Use rose at 20 employees and up, not below

Census story, Dec 2025 to May 2026. Use rose among firms with 20 or more employees, with no significant change below 20. Larger firms: 32% at 100 to 249, 37% at 250 or more.

Three or fewer? You're with most adopters

List where your team uses AI today. These figures end in January and May 2026, so check the live survey before you quote them.
