

CAPITAL SIGNAL

\$8.7 Billion Skipped Every Software Company

August's four biggest AI funding rounds went to compute, hardware, and infrastructure. Zero went to a subscription.

ENTER

● EXHIBIT 02 · THE RAISES

Four Rounds, Zero Subscriptions

Databricks, Firmus, Castelion, and Etched raised a combined \$8.7 billion in August. Every one of them sells infrastructure or hardware, not software access.

● EXHIBIT 03 · AUGUST 2026

\$8.7 Billion In One Month

Databricks alone raised \$5 billion at a \$190 billion valuation, led by Coatue, Blackstone, MGX, and T. Rowe Price.

• EXHIBIT 04 · TWO BETS

Renting The Model Or Owning The Layer

Subscription vendors rent access to someone else's model on thin margin. Infrastructure owners set the terms everyone above them has to accept.

● EXHIBIT 05 · THE PRODUCT

What The Big Four Actually Sell

Compute capacity, physical facilities, chips, and capital itself. Not one login screen and a monthly invoice among them.

I Build Infrastructure, Not Dashboards

That was the bet at Verydian from day one.
