

N8N CASE STUDY

One Approval Swap Recovered 200 Hours A Month

Delivery Hero's account-lockout automation is the realest AI ROI story this year, and nobody's presenting it.

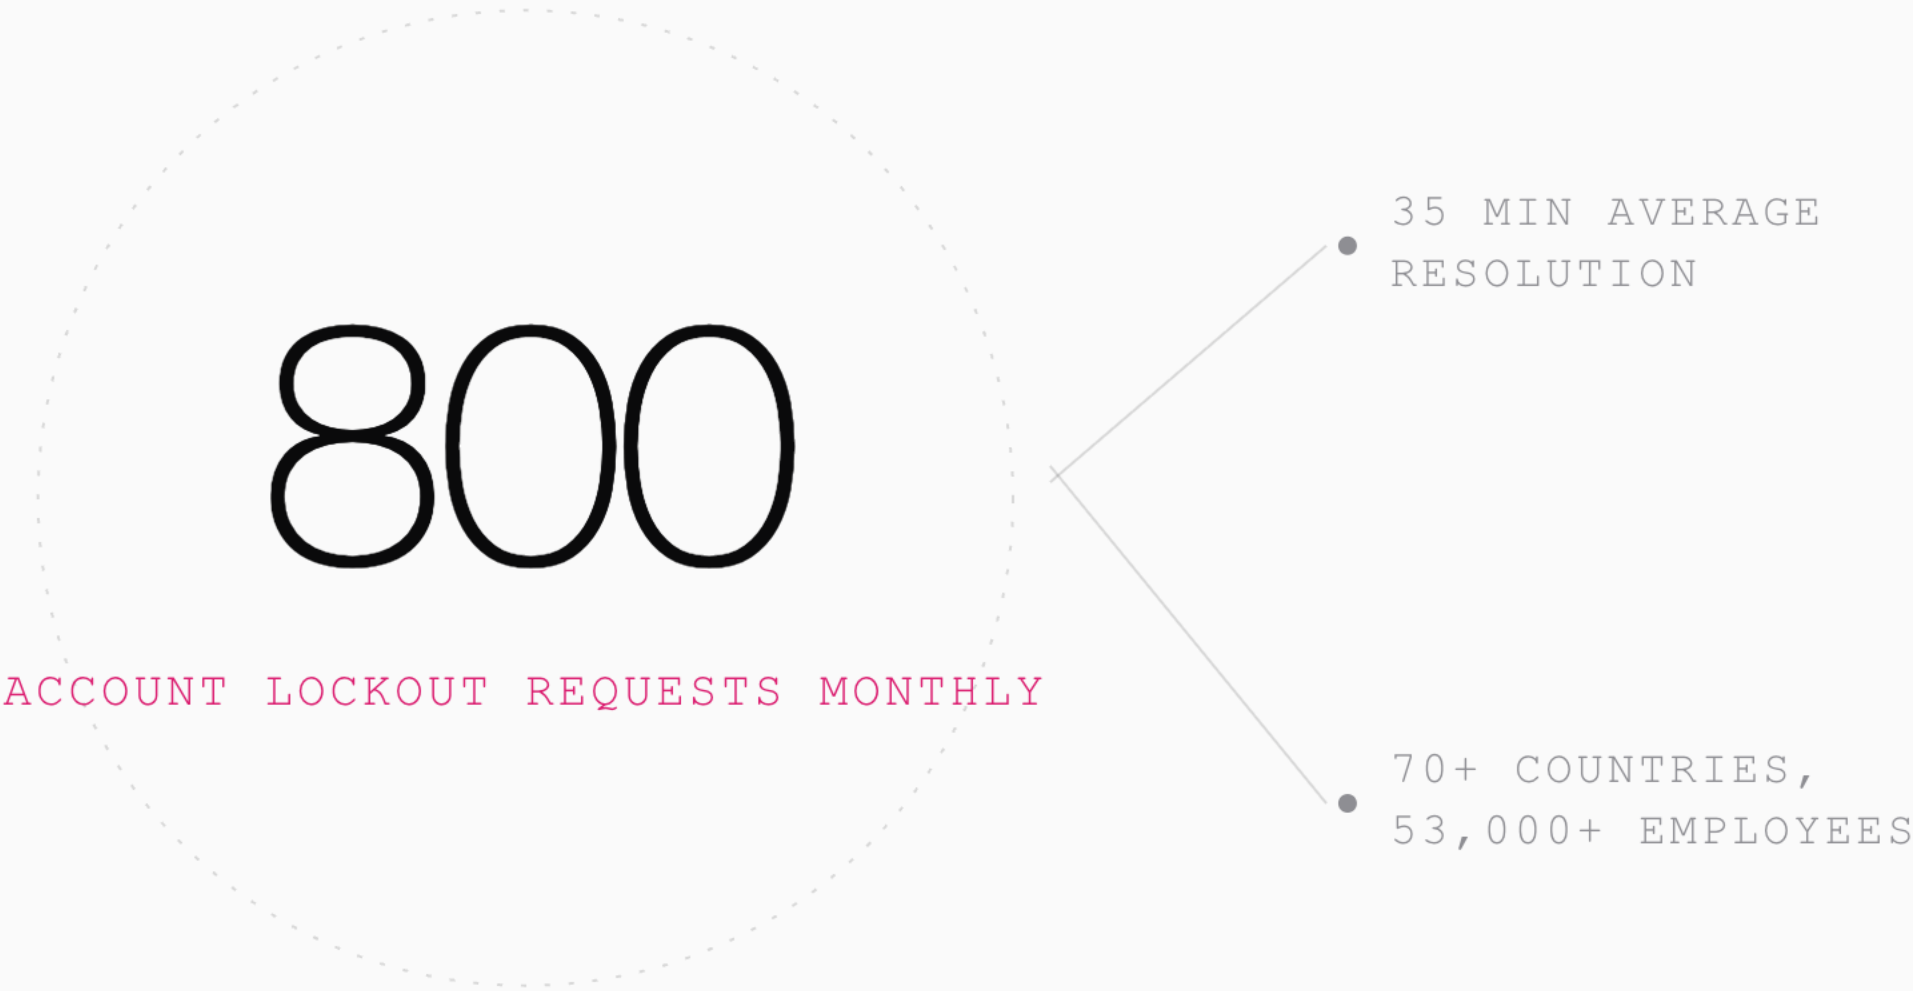

SWIPE 

THE MANUAL COST

02 / 06

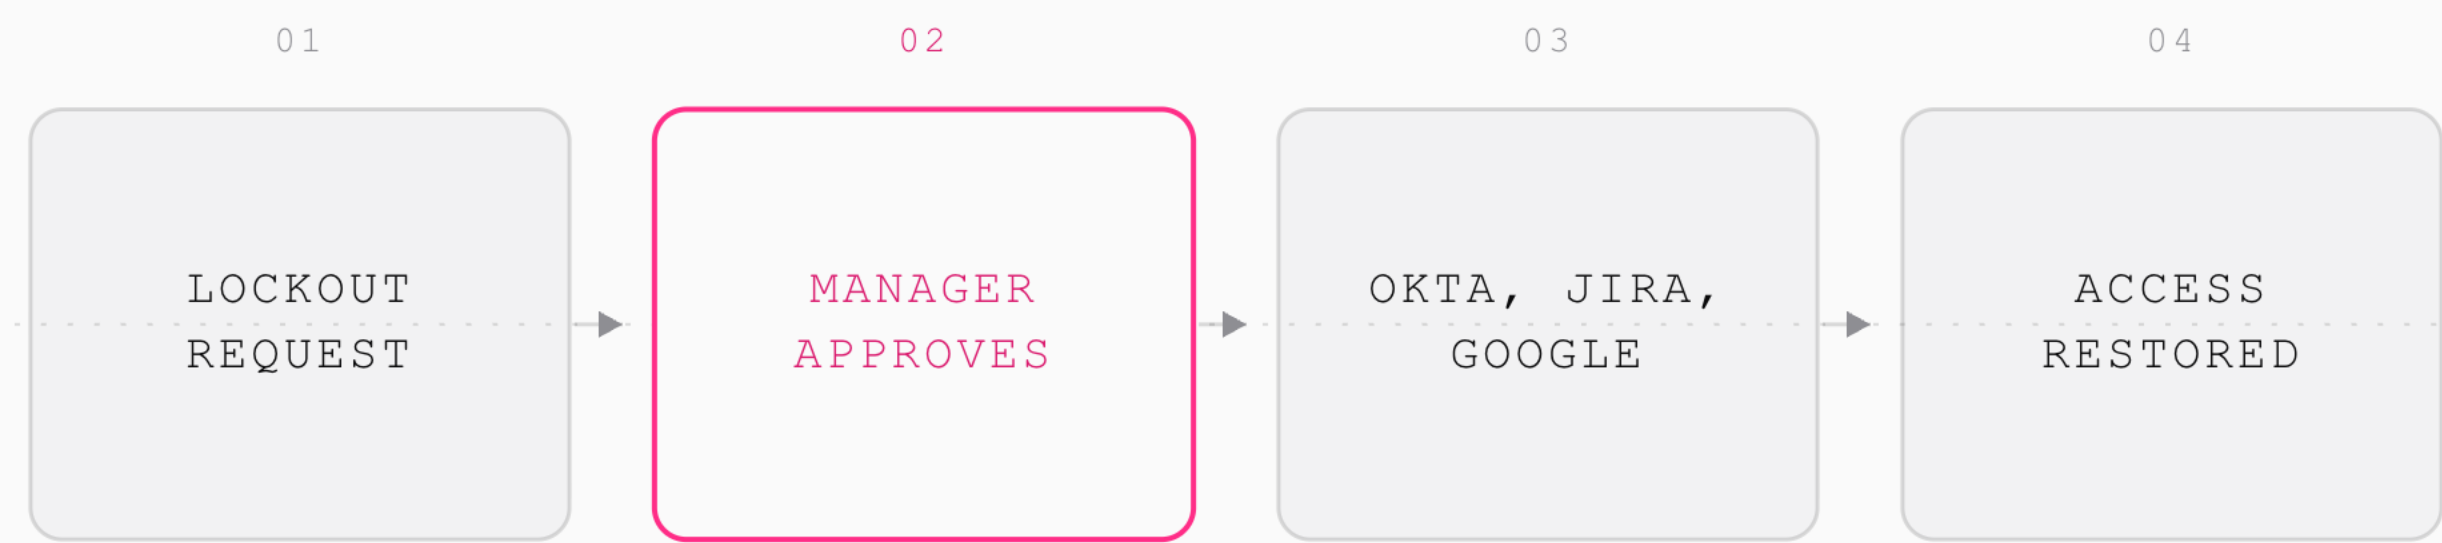

800 Lockouts A Month, 35 Minutes Each

Delivery Hero runs in 70+ countries with 53,000+ employees. Manual account-lockout resolution averaged 35 minutes per request, every time.

The Fix: Manager Approves, Then Direct API Calls

The employee's direct manager approves instead of the IT team. The workflow then calls Okta, Jira, and Google systems the moment authorization lands.

THE RESULT

04 / 06

35 Minutes Down To 20

Average resolution time dropped from 35 minutes to 20 across roughly 800 requests every month.

BEFORE

- 35 MINUTES EACH
- 800 REQUESTS MONTHLY

VS

AFTER

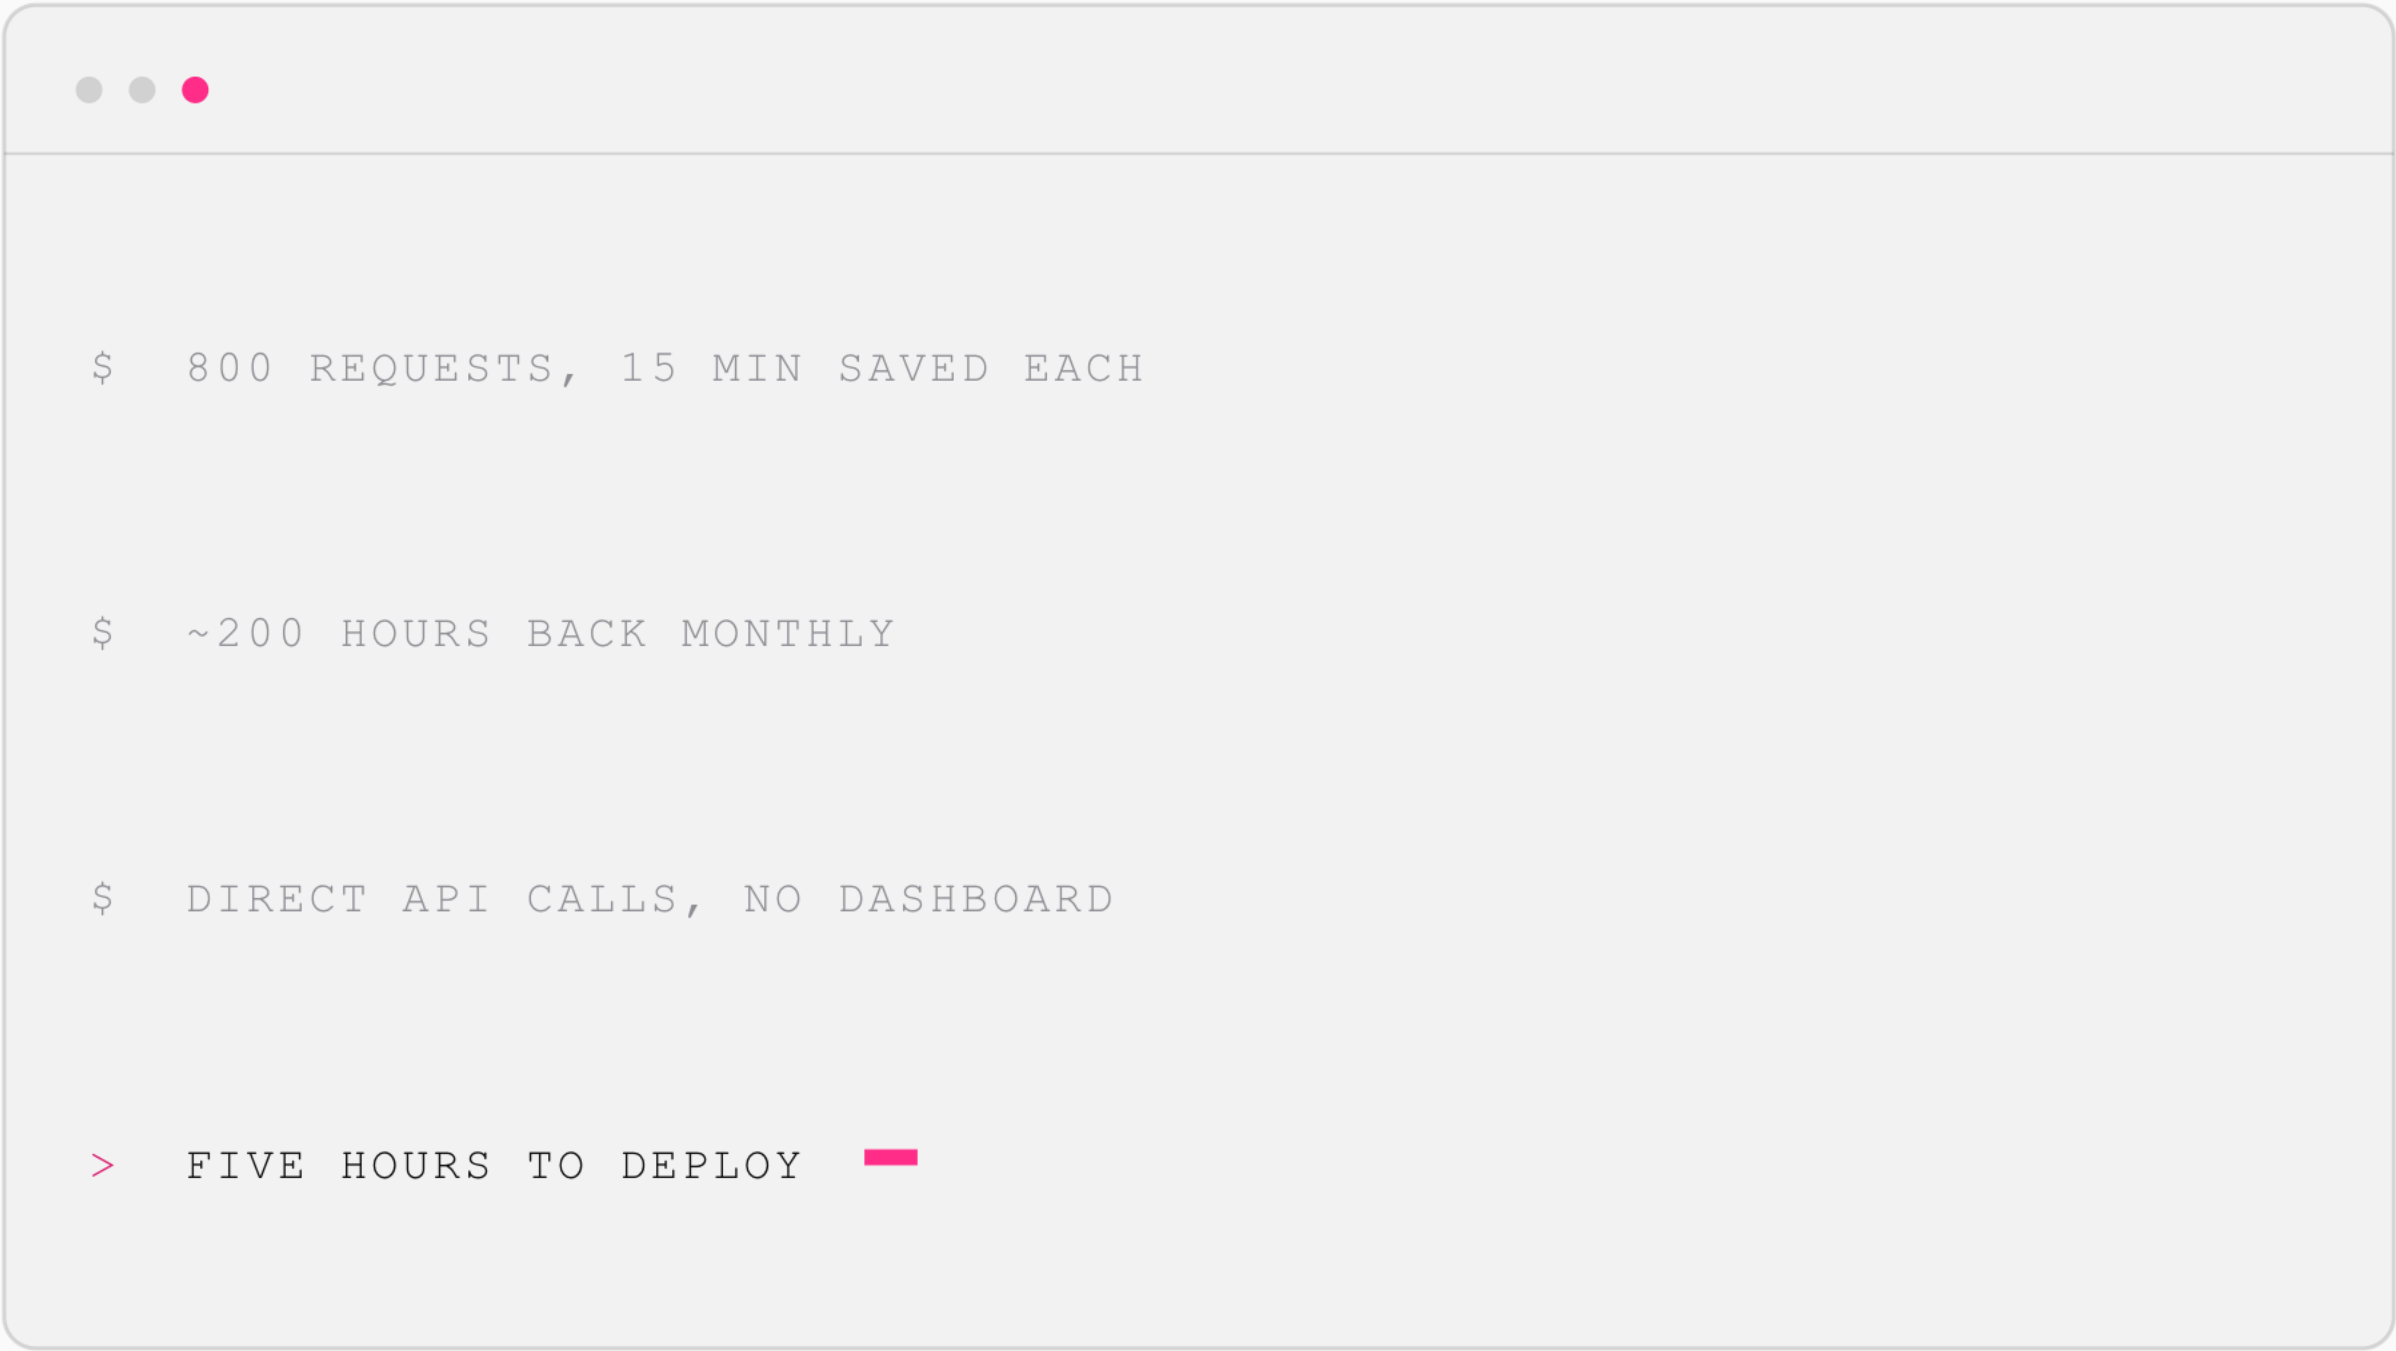

- 20 MINUTES EACH
- SAME 800 REQUESTS

THE MATH

05 / 06

200 Hours Recovered, Every Month

That 15-minute gap across 800 monthly requests adds up to roughly 200 hours of employee time back, every single month.

This Is What Real ROI Looks Like

Narrow scope, one approval step, direct system integration.
