

USAGE DATA

One Prompt Beats Thirteen Rounds Of Chat

Anthropic's own data shows Claude Code sessions need far less back and forth than chat for the same output.

UNROLL THE DRAWING

SECTION 02 · THE GAP

Same Model, Completely Different Workflow

The median blog-writing chat takes thirteen rounds. The median blog-writing Claude Code session takes one prompt, per Anthropic's June 2026 report.

FIG. 2

SECTION 03 · MODEL GAP

Claude Code Runs On Opus More Often

54% of Claude Code sessions use Opus, compared to 10% of chat conversations. Part of the gap is the model, not just the habit.

SECTION 04 · FRONT-LOADED

What Goes Into One Good Prompt

Goal stated. Constraints named. Files pointed to. Done defined. Skip one and you're back to round two.

SECTION 05 · THE HABIT

Resolve The Ambiguity Before You Start

Load context, write the full prompt, hit enter once, then verify the output. The back and forth happens before the session, not during it.

Write Prompts Like You Mean It

The skill is loading context, not typing faster.
