

DIAGNOSE FIRST

The SQL Number Everyone Quotes Is Misleading

A 50% SQL lift from an AI SDR case study measured
something narrower than volume.

OPEN THE LEDGER

ENTRY 02 · THE REAL DRIVER

What Actually Drove The Lift

Standardized messaging and testable campaigns, plus rep time freed from manual sourcing.

BEFORE ALICE

— SOLO OUTREACH

— 1.0X SQLS

VS

AFTER ALICE

● SHARED PLAYBOOK

● 1.5X SQLS

ENTRY 04 · THE COMPONENTS

What An AI SDR Actually Touches

Lead sourcing, message drafting, segment testing, and reporting all run through one agent.

ENTRY 05 · THE DIAGNOSTIC

Ask This Before You Buy

Is the bottleneck volume, or is it that nobody can tell which message wins.
