

MCP IN PRODUCTION

MCP Just Had Its Biggest Spec Revision Ever

It's fixing the exact three things that break when you skip the checklist.

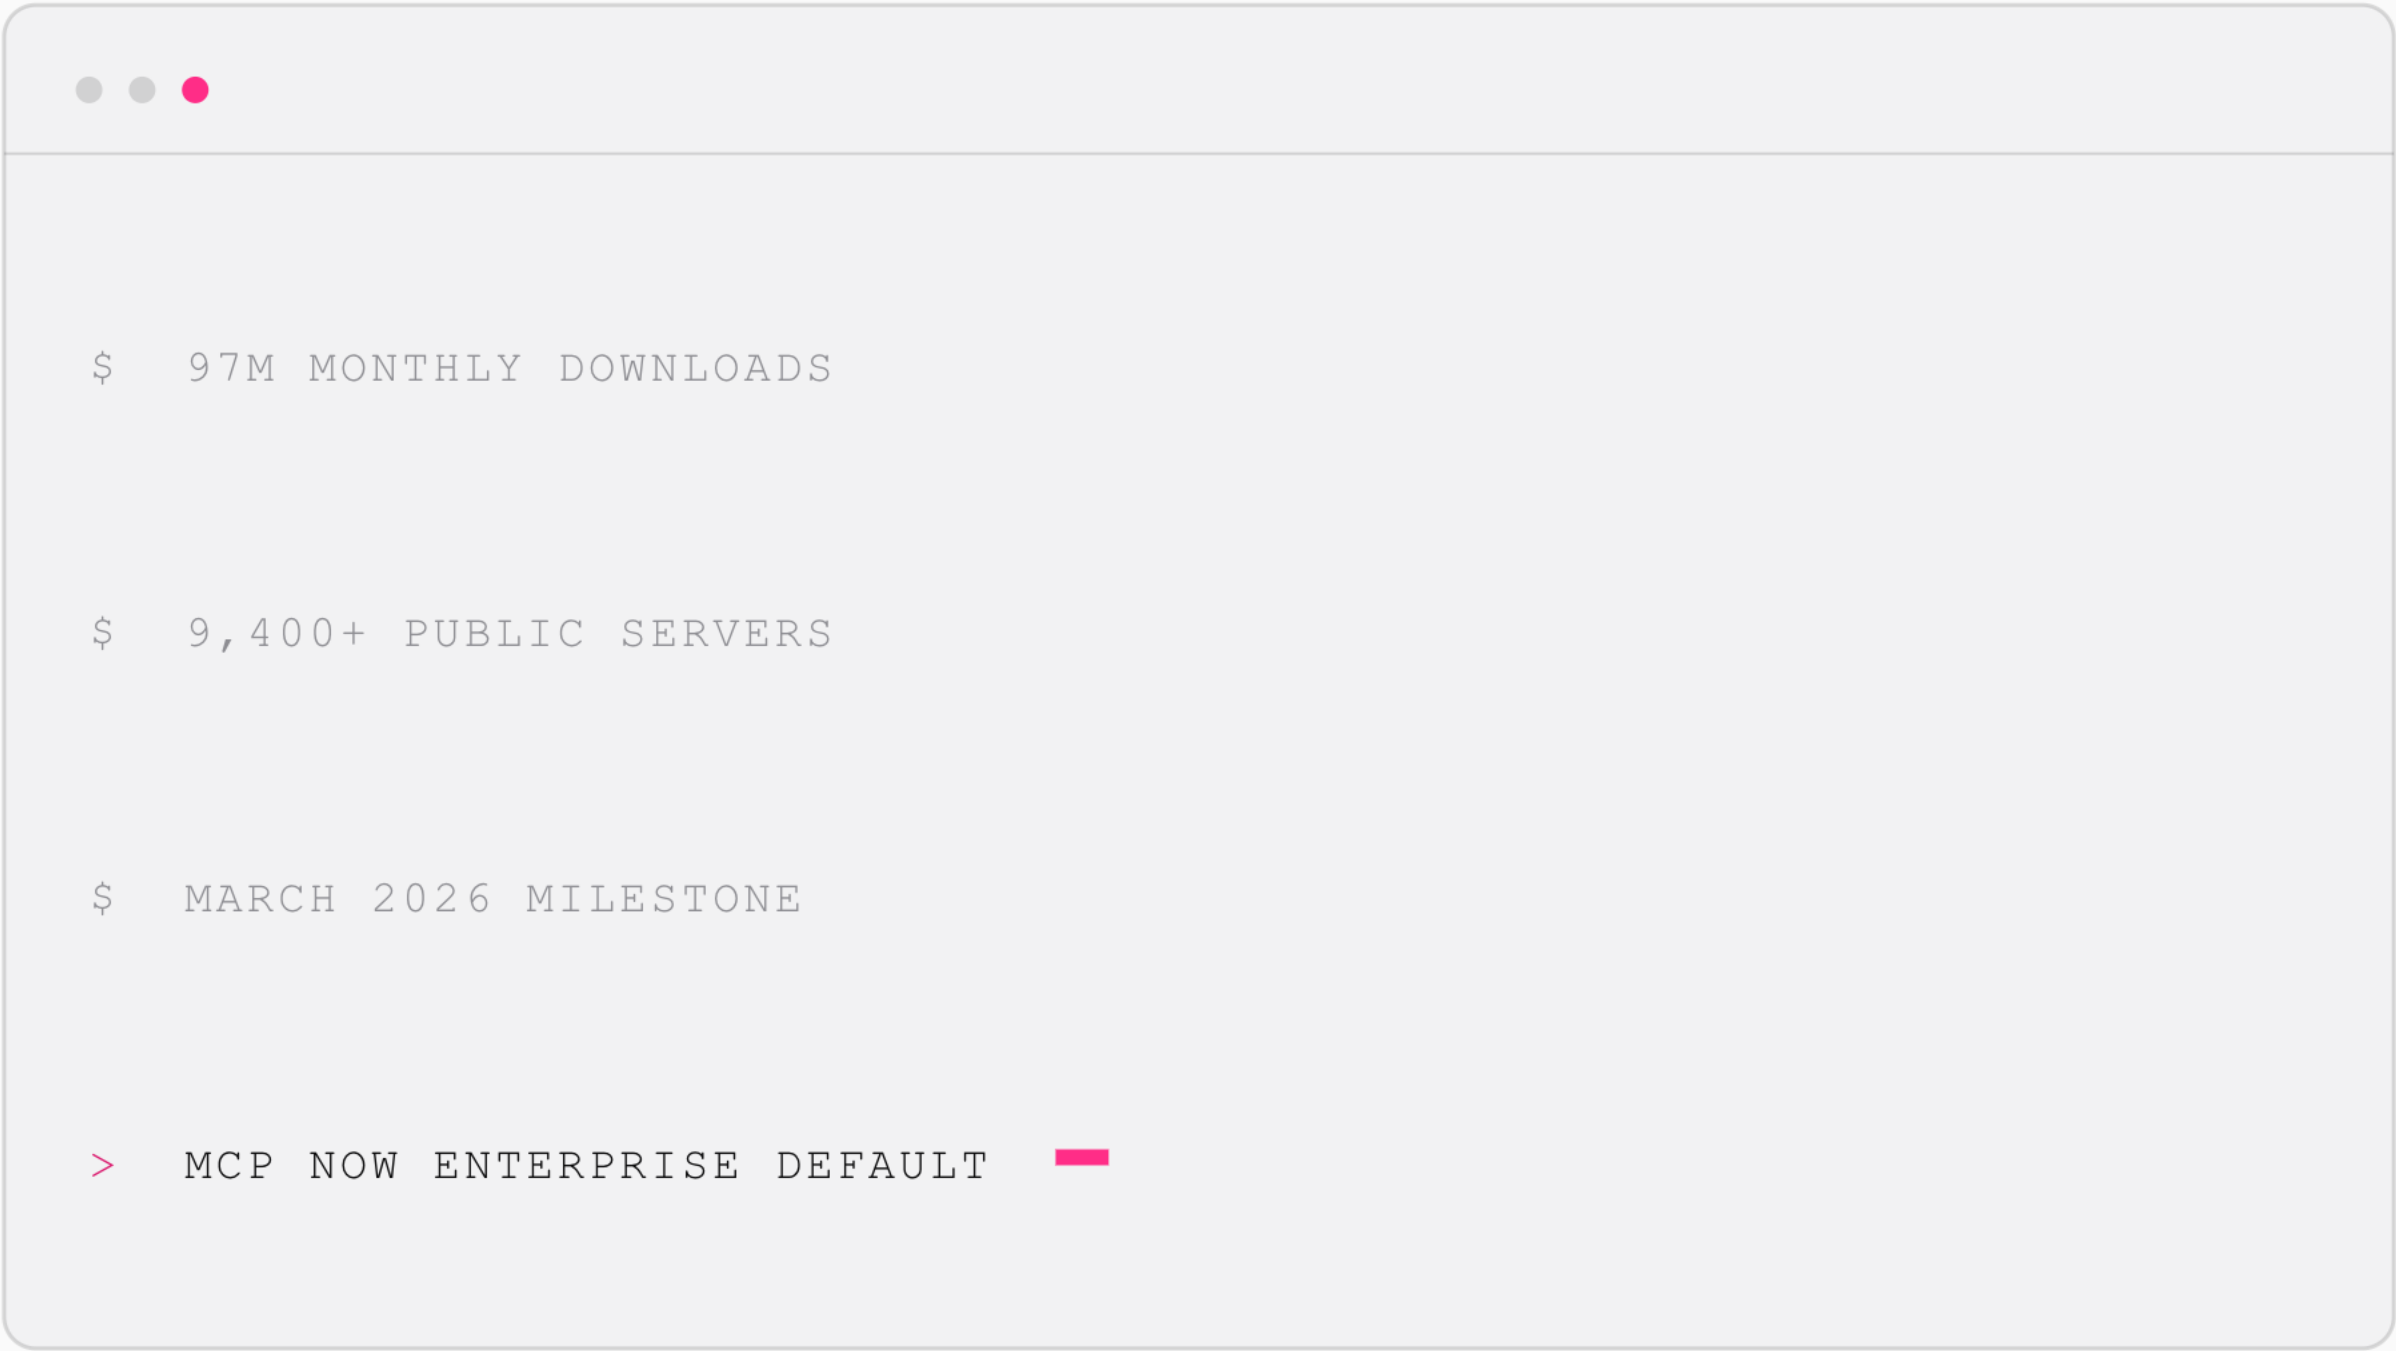

SWIPE 

ADOPTION SCALE

02 / 06

MCP Crossed 97 Million Monthly Downloads

By March 2026, across its TypeScript and Python SDKs. This is enterprise-default now.

SPEC UPDATE

03 / 06

What The July Revision Actually Fixes

Three production gaps enterprises kept hitting, addressed directly in the spec itself.

01

STATELESS CORE

02

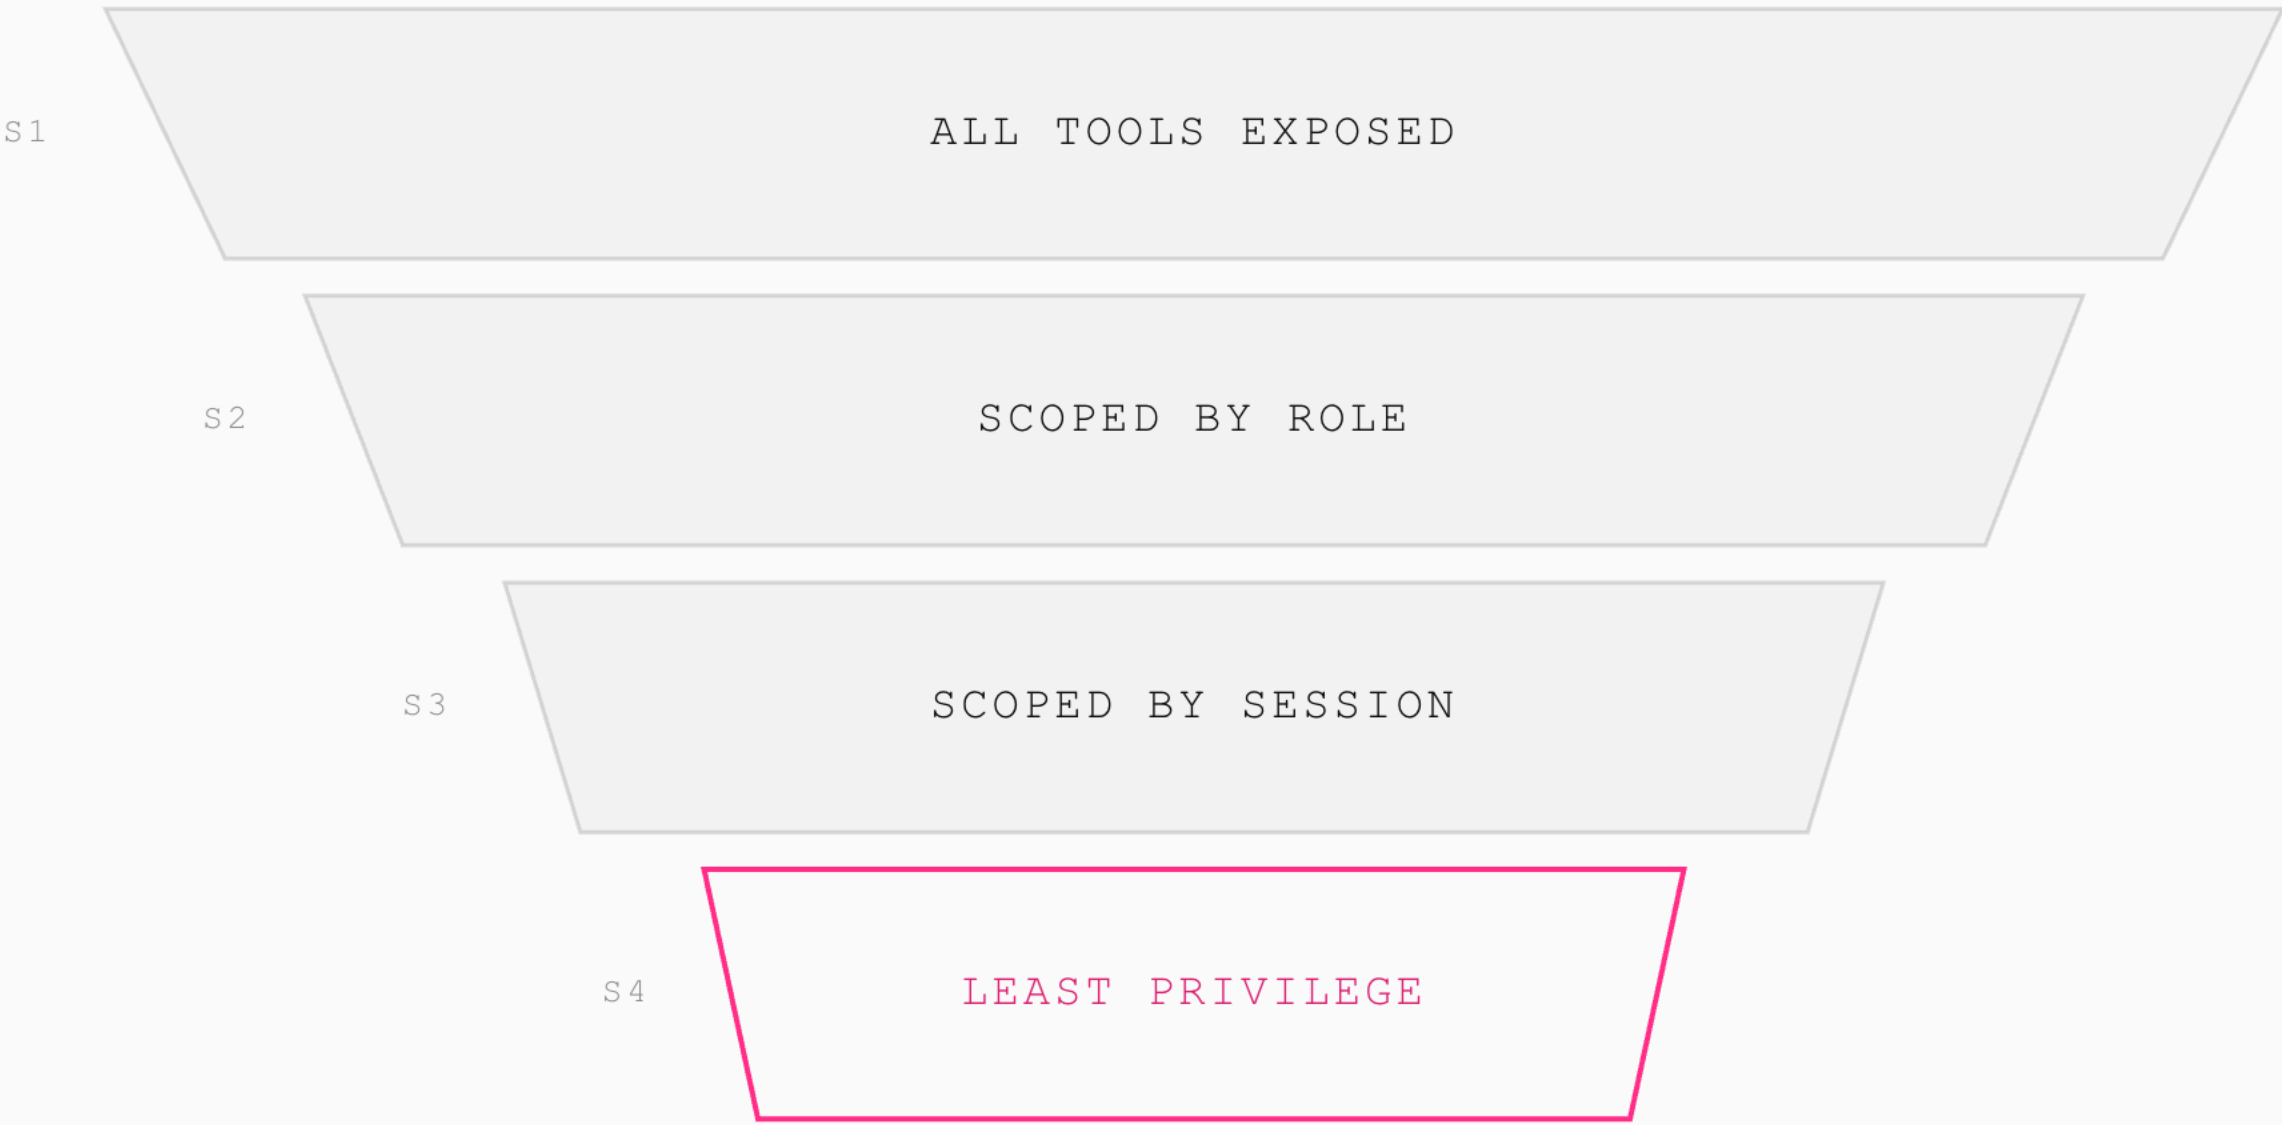

OAUTH OIDC AUTH

03

DEPRECATION
POLICY

Tool Exposure Should Narrow, Not Stay Open

Most setups expose every tool by default. That's the overexposure the spec is trying to close.

MY CHECKLIST

05 / 06

What I Check Before Any Server Ships

Audit trail, SSO auth, least-privilege scopes, a kill switch tested before launch.

AUDIT TRAIL WIRED

PASS

SSO INTEGRATED AUTH

PASS

LEAST PRIVILEGE SCOPES

PASS

KILL SWITCH TESTED
