

78% in Pilot. Fewer Than 15% in Production.

The model isn't why they failed.

The Pilot Works Because Everything Is Controlled

Fixed data. One task. Manual triggers. Remove
the guardrails and it collapses.

Production Needs What the Pilot Always Skipped

Retrieval that holds under load. Error-handled tool calls. Memory with scope. Rollback paths. None of it is optional.

Observability Is the First Thing Nobody Builds

You can't debug what you can't see. No logs, no drift detection, no alerts means no production.

The Control Stack Is the Product

Better prompts won't fix missing infrastructure.
The agent needs engineering discipline around it.
