

40% of Agent Projects Won't Survive 2027

Gartner's right. The cause isn't the model.

02 ·

They Built the Agent. Not the Infrastructure.

Solid models. Accurate outputs in testing. No governance, no observability. Still died in production.

03

Governance Nobody Follows Isn't Governance

Undefined ownership, no rollback path, missing monitoring.
The same failure pattern, repeated.

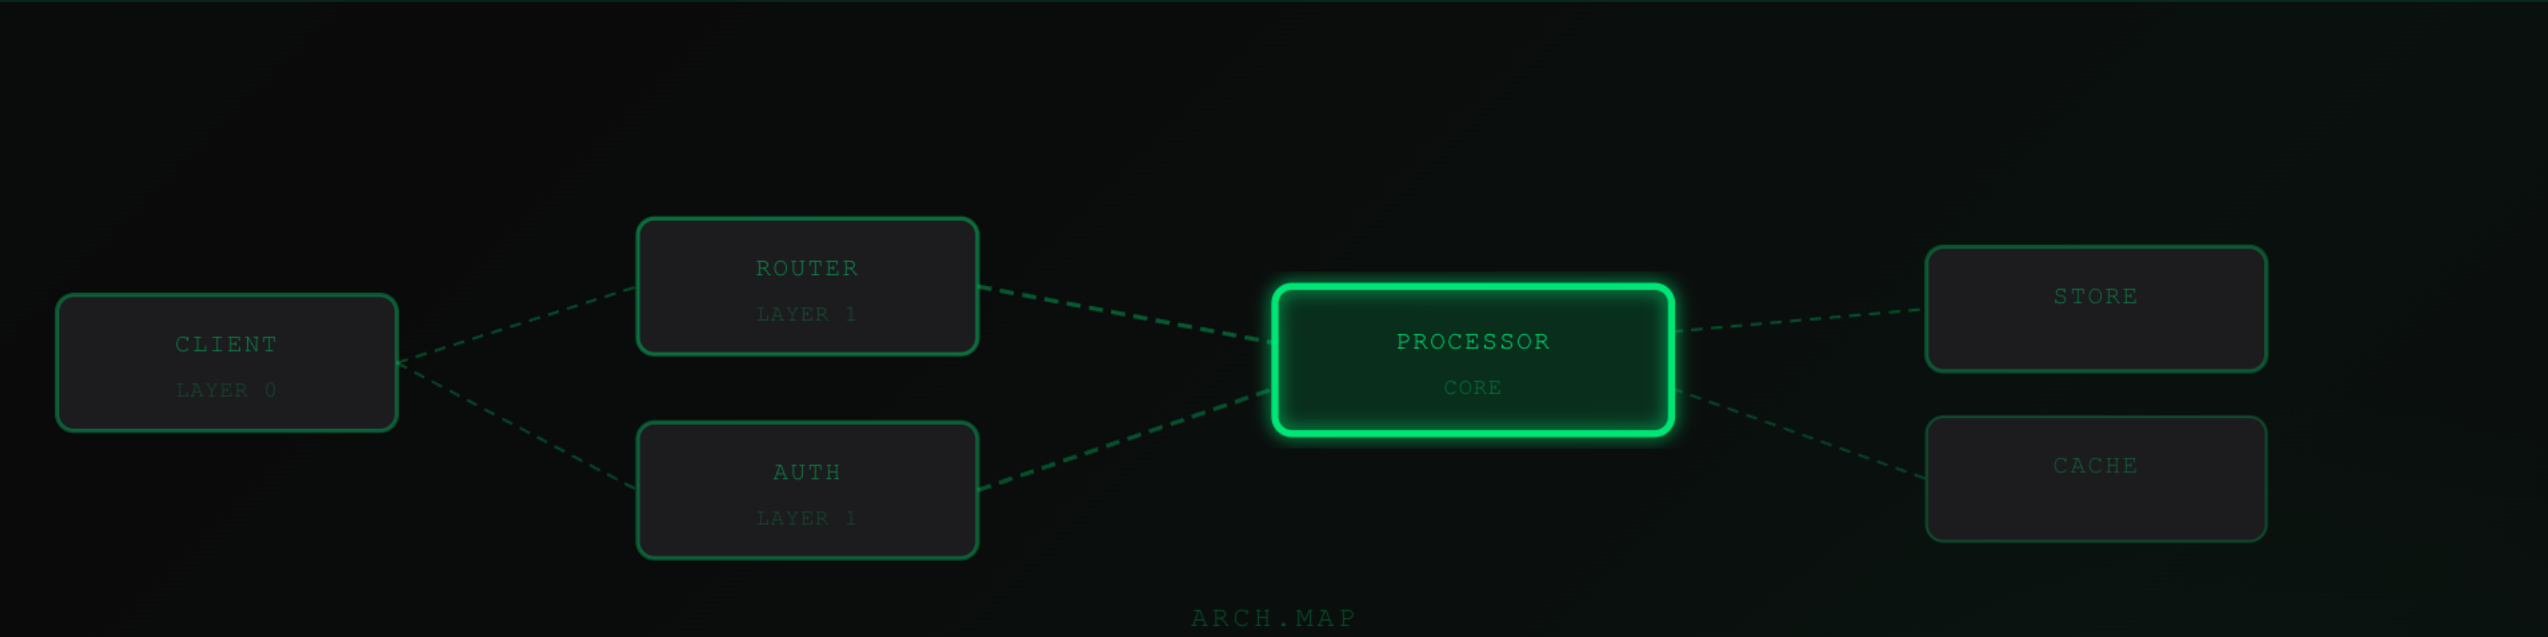

SYS.MATRIX

04 ·

An Agent in Production Is a Distributed System

Dynamic inputs, uncontrolled environment. It needs infrastructure discipline, not product thinking.

05 ·

Define Production-Ready Before You Build

Monitoring wired before the first deploy. Rollback ownership decided before it's needed.

EXEC.BRIEF / AI INFRASTRUCTURE

Follow me — I build in public

Build the Control Stack. Not Just the Agent.
