

THE FOUR PATTERNS

Every AI Automation Is One Of Four Patterns

Triage, enrichment, document intake, or content ops. Here's
how to tell which one you need.

READ ON —

THE MAP

The Four Patterns Driving Real ROI

Triage routes work. Enrichment adds context. Intake reads documents.
Content ops drafts and formats. Everything else is a variation.

THE RANKING

Triage And Intake Get Deployed Most

n8n's 2026 roadmap ranks these as the four highest-ROI patterns, and triage shows up in nearly every client build I run.

THE CONNECTOR

Enrichment Feeds Every Other Pattern

It sits in the middle. Triage needs enriched context to route correctly, and content ops needs it to write anything specific.
