

Five Operations That Went Autonomous First

And the four properties that made them ready.

PLAYBOOK.NODE

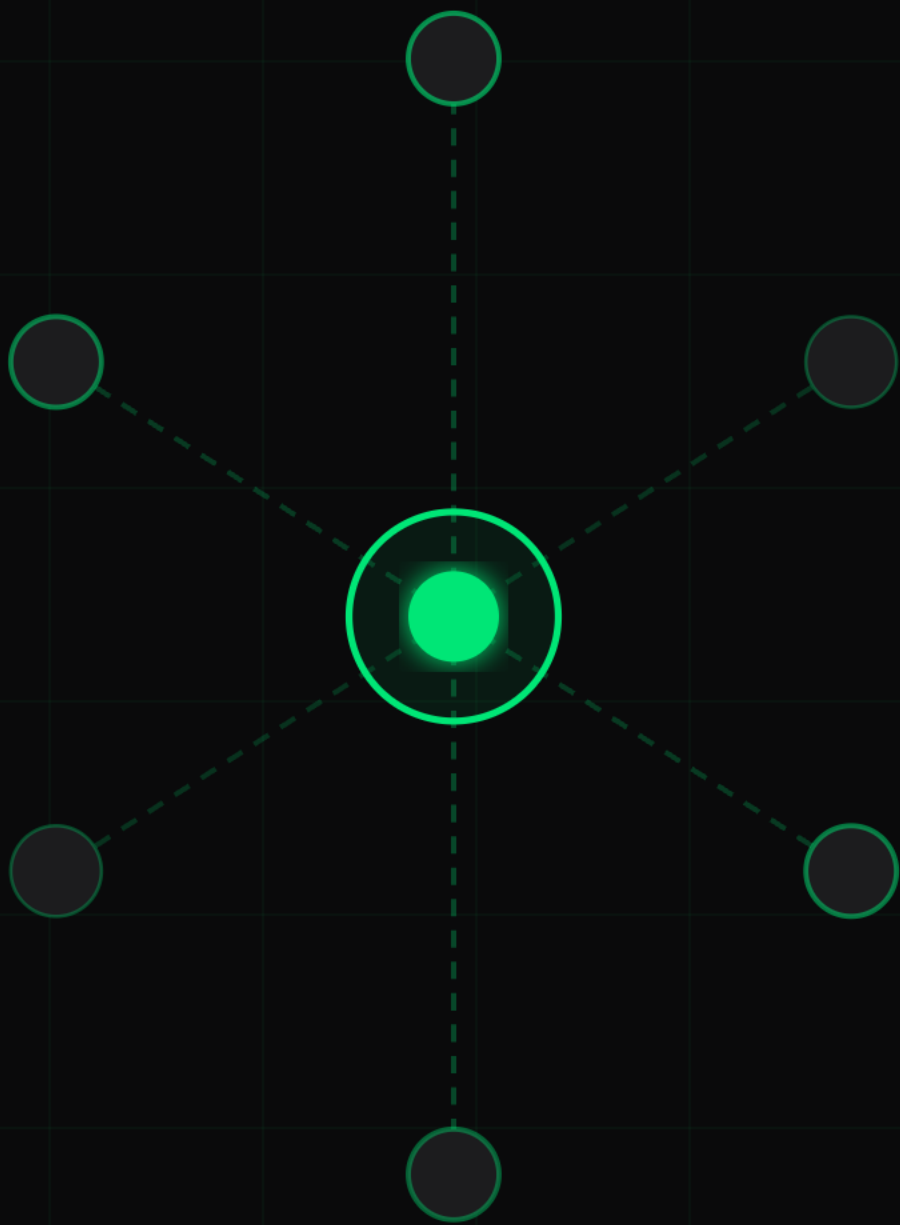

FRAMEWORK

02

Property One: Bounded Scope

Clear start, clear end. Danfoss B2B orders don't require open-ended judgment. They follow defined paths.

SYS.NETWORK

03

Property Two: Measurable Success Criteria

Ramp's code review either passes the rule set or it doesn't. No ambiguity about what good looks like.

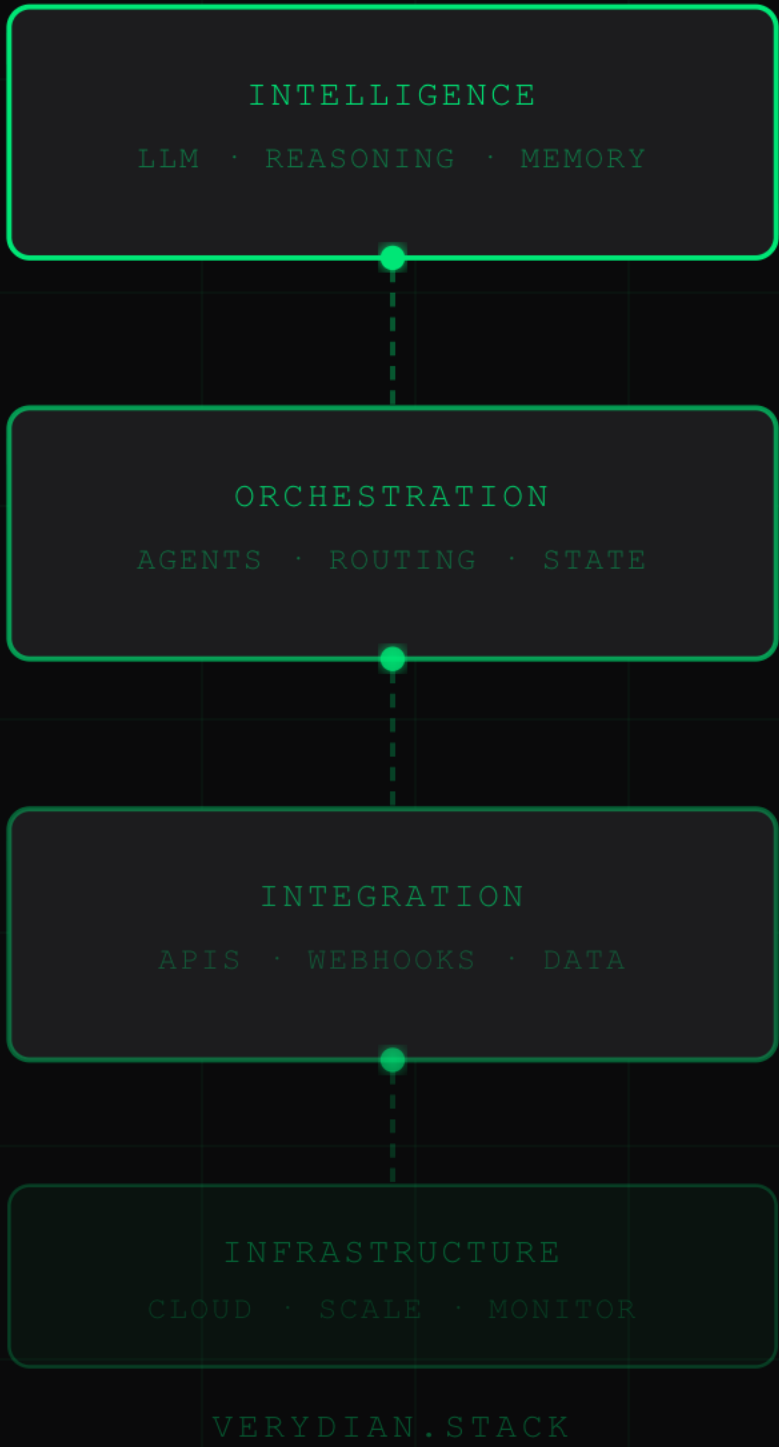

04

Property Three: High Repetition, Low Catastrophe Risk

Virgin Atlantic's test coverage runs hundreds of times a day. Wrong output is fixable, not irreversible.

PIPELINE

05

High-Value Is Not the Same as Ready

Supply chain has massive ROI potential. It also has messy scope and heavier governance. Start there and you stall.
